WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

Precautions for Correct Use

Do not use this product under ambient conditions that exceed the ratings.

● Design

Influence of Surrounding Metal

If the E2KQ-X is embedded in metal, maintain at least the following distances between the E2KQ-X and the metal.

* Be sure to ground the metal object, otherwise E2KQ-X operation will not be stable.

Influence of Surrounding Metal

(Unit: mm)

Model	Dimension	l	d	m	n
E2KQ-X10ME1		30	75	18	90

If a mounting bracket is used, be sure that at least the following distances are maintained.

Influence of Surrounding Metal

(Unit: mm)

Model	Dimension	G	H
E2KQ-X10ME1		30	35

Mutual Interference

When installing Sensors face-to-face or side-by-side, ensure that the minimum distances given in the following table are maintained.

Mutual Interference

(Unit: mm)

Model	Dimension	A	B
E2KQ-X10ME1		200	32

Effects of a High-frequency Electromagnetic Field

The Sensor may malfunction if there is an ultrasonic washer, high-frequency generator, or transceiver nearby.

For major measures, refer to *Noise of Warranty and Limitations of Liability* for Photoelectric Sensors.

● Mounting

Be sure to tighten each nut with torque not exceeding the following value.

Model	Torque
E2KQ-X10ME1	0.6 N·m

● Adjustment

Sensing Object

The maximum sensing distance will decrease if the sensing object is a non-grounded metal object or dielectric object.

● Sensing Object Material

The E2KQ-X can detect almost any type of object. The sensing distance of the E2KQ-X, however, will vary with the electrical characteristics of the object, such as the conductance and inductance of the object, and the water content and capacity of the object. The maximum sensing distance of the E2KQ-X will be obtained if the object is made of grounded metal.

● There are objects that cannot be detected indirectly. Therefore, be sure to test the E2KQ-X in a trial operation with the objects before using the E2KQ-X in actual applications.

Miscellaneous

Ambient Environment

The Sensor may malfunction if subjected to water, oil, chemicals, or condensation by falsely detecting these as sensing objects.

Environment

The E2KQ-X is of water-resistant construction. To increase the reliability of the E2KQ-X in operation, however, it is recommended that the E2KQ-X be protected with an appropriate cover so that the E2KQ-X will be free from sprayed water or machining oil.
The cable is not coated with Fluororesin, which must be taken into consideration when installing the E2KQ-X.
