Intelligent Building Solutions

ABB i-bus® KNX – User Operation – Design Ranges

6108/60-500

Control Element, 6gang with Universal Input, 5gang

Control element with a maximum of 6 control functions and an RTC extension unit (slave). Primary function for calling up the main function. Status bar for indication/display of operating or RTC functions. Operation is carried out via cover plate 6108/61-xxx. With actual value temperature display. With display of set-value temperature. With universal input with: - max. of 5 binary inputs - 4 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V - 2 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V and an external temperature sensor PT1000 / T6226. The bus can be connected via enclosed terminal block.

6109/05-500

Room Temperature Controller with 5gang Universal Input, FM

Room temperature controller without “local control” and without internal temperature sensor. With universal input with: - max. of 5 binary inputs - 4 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V - 2 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V and an external temperature sensor PT1000 / T6226. Master/slave configuration. With base-load operation. The bus can be connected via enclosed terminal block. Class of temperature controller 1 Contribution to space heating energy efficiency 1,0%.

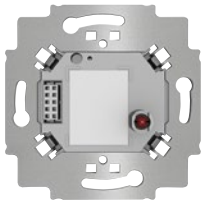
Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	6109/05-500	2CKA006181A0013			1

6109/08-500

Room Temperature Controller, Commercial, with 5gang Universal Input, FM

Room thermostat without “local control” incl. insert for centre plate for cooling element. With universal input with: - max. of 5 binary inputs - 4 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V - 2 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V and an external temperature sensor PT1000 / T6226. Can only be used with a cover plate 2114-xxx or 6541-xxx, with the exception of 6541-20. -21.-260 and -266. Master/slave configuration. With base-load operation. The bus can be connected via enclosed terminal block. Class of temperature controller 1 Contribution to space heating energy efficiency 1,0%.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	6109/08-500	2CKA006134A0313			1



6108/08-500

Room Temperature Controller, Commercial, FM

Room thermostat without “local operation” incl. insert for centre plate for cooling element. For controlling commercially available valve drives. Can only be used with a cover plate 2114-xxx or 6541-xxx, with the exception of 6541-20. -21.-260 and -266. For control of up to 5-level ventilation actuators Master/slave configuration. With base-load operation. The bus can be connected via enclosed terminal block.

ABB-tacteo KNX

The individual touch

Unique in design and function, the intuitive and individually configurable ABB-tacteo KNX sensor is as extraordinary as you are. The impressive, high-quality black or white glass sensor with its capacitive user interface offers virtually unlimited possibilities for intelligent building networking. Heating, ventilation, blinds and lighting can all be controlled to create comfortable everyday situations and put intelligent building management firmly in your hands. Discover more details at **abb.com/tacteo**

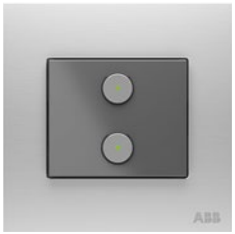
Intelligent Building Solutions

ABB i-bus® KNX – User Operation – Design Ranges – Millenium

The Millenium collection is the first metal range to incorage the KNX system, the most intelligent way of managing spaces and optimizing performance in terms of energy savings. Millenium is based on a combinable concept which creates a very comprehensive range, suitable for any types of needs. This makes it the ideal collection for all types of homes, hotels, offices and shops.

01	Switch Sensor 2gang KNX
02	Switch Sensor 4gang KNX
03	Switch Sensor 6gang KNX
04	Switch Sensor 6gang KNX with IR
05	Busch watchdog 180° KNX
06	Room Thermostat KNX

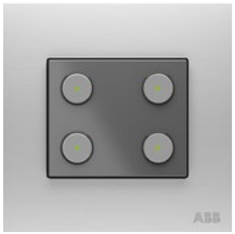
01



Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

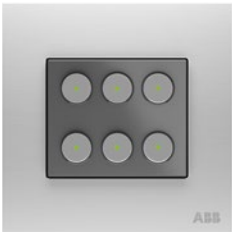
02



Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

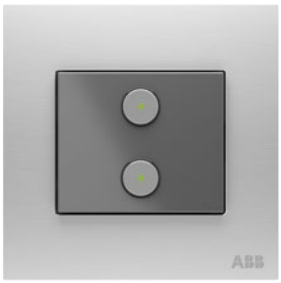
03

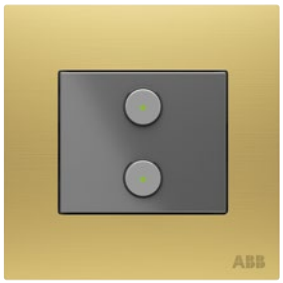


Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

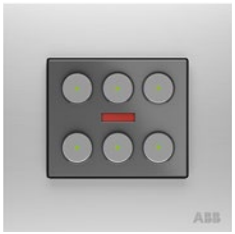
Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

Wide range. Millenium range offers special mounting plates for KNX sensors to reduce the height and improve the aesthetics for ultra slim design. The KNX sensors allow to replace the buttons with desired symbols in order to adjust the sensors to specific design and needs like light, blind, scene, RTC or fan coil. Millenium offers a wide and elegant choice of finishes in stainless steel material: from the Brush Stainless Steel, to the soft touch given by the Silk Black, and the luxury of the sophisticated gold finishes, Matt Gold and Antique Gold.





04



Function
Switching | Dimming | Blinds | Sending values | Scenes etc. | 6gang sensor with IR.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

05

Function
Movement sensor with up to four channels.
Detection range: frontal: 6 m, lateral: 6 m
Detection angle: 180 °
Brightness limit value:
5 Lux - 150 Lux
Mounting height: 1.1 m

06

Function
Control element with room thermostat function for triggering the heating, ventilation and fan-coil actuators. The controller is a thermostat for Fan Coil units in 2- and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode.

The Millenium range is only available in the following countries: China, Dubai, India, Kuweit, Oman, Qatar, Saudi Arabia, Singapore, UAE and UK.
Frames and special mounting plates for KNX sensores have to ordered by:
ABB, S.A.
Low Voltage Products-Niessen,
Oiartzun / Spain
www.abb.es/niessen

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)

Switch contacts for operating mode selection and dial for setpoint or fan speed adjustment.
Display elements: LCD showing operation modes.
Protection class (Device): IP 20
Temperature range (Device):
– 5 °C to 45 °C

TR/U 1.1

Transponder Reader MIFARE

The “transponder reader” is a flush-mounting device for British Standard wall boxes, designed to realize access control systems with a communication support based on KNX bus. It is equipped with one relay (4A @24 V AC/DC) and one input to be used for connecting external conventional card-holder (e.g. Millenium wiring accessories card-holder). The output can be programmed in three different ways: “Linked to access control”, receiving in this case switching commands from the device itself (according to transponder card validation); being a standard KNX Switch actuator output, able to be controlled by every KNX-standard devices; “linked to card-holder”, that means that the relay is switched according to closing/opening internal input contact available on transponder reader. The bicolor (red-green) LED placed on the front of the device allow you to monitor device operation and can be also switched ON/OFF in the proper color according to KNX telegram (for example for DND/MUR purposes).
The transponder reader requires a 12...24 V AC/DC external power supply to ensure its operation even with bus voltage failure.
The transponder reader is available for ABB Millenium wiring accessories range.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

TH/U 1.1

Transponder Holder MIFARE

The “transponder holder” is a flush-mounting device for British Standard wall boxes, designed to realize access control systems with a communication support based on KNX bus. It is equipped with one relay (4A @24V AC/DC) and one binary input to be used for connecting external conventional push-button for switch, dimmer and shutter functionalities, or for example for connecting window contact or similar. The output can be programmed as “Linked to access control”, receiving in this case switching commands from the device itself (according to card insertion/removal); or being a standard KNX Switch actuator output, able to be controlled by every KNX-standard devices. The bicolor (red-green) LED placed on the front of the device allow you to monitor device operation and can be also switched ON/OFF in the proper color according to KNX.
The transponder reader requires a 12...24 V AC/DC external power supply to ensure its operation even with bus voltage failure.
The transponder reader is available for ABB Millenium wiring accessories range.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

Zenit is based on a combinable concept which creates a very comprehensive range, suitable for any type of needs. Optimizing comfort, safety and efficiency of homes and buildings: Providing with complete comfort solutions to satisfy all type of needs and projects. Ensuring safety and protection of persons and goods. Saving energy by using only the amount of energy required.

Zenit offers two different mounting plates for KNX sensors corresponding to different market standards: VDE and NEMA.

04

LT/U 1.1.MC
LT/U 1.1.MS

Transponder Reader, Mylos

The transponder reader is used for access control in the hotel, residential and commercial sectors (office buildings, business centers, laboratories, etc.). The device is equipped with two bistable relays (8 A, 250 V AC), one of which can be assigned to control electronic lock, and three voltage-free, non-optically insulated inputs; the 5-V DC scanning voltage is available on the COM terminal.
The transponder reader requires a 10...32 V DC/12...24 V AC external power supply to ensure its operation even with bus voltage failure.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

PTI/U 1.1.MC

Transponder Holder, Mylos

The transponder holder is equipped with a slot into which the transponder card is inserted. In a hotel application, this allows occupancy recognition and notification at the supervisory level (e.g. on the front desk computer). Moreover, room status information can be managed by using special cards (minibar status, maintenance status, usability).
The device is equipped with two bistable relays (8 A, 250 Vac), and three voltage-free, non-optically insulated inputs; the 5-Vdc scanning voltage is generated by the device itself. The transponder holder has on the front four LEDs for signaling indications. It requires a 10...32 Vdc/12...24 Vac auxiliary power supply to ensure its operation even in case of KNX voltage failure.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

black	–	PTI/U 1.1.MS	2CSYK5200S			1

PRT/U 1.1.MC

Transponder Programming Device, Mylos

The devices allows the programming of transponder cards. The device is equipped with two bistable relays (8 A, 250 Vac), and three voltage-free, non-optically insulated inputs; the 5-Vdc scanning voltage is generated by the device itself. The transponder programming device has on the front four LEDs for signaling indications. It requires a 10...32Vdc/12...24Vac auxiliary power supply to ensure its operation even in case of KNX voltage failure.

CH/T 2

Set of 5 Transponder Cards for Chiara and Mylos design programs

The transponder card uses passive transponder technology operating in radio frequency, without the need for contact between the reader and the card itself. The transponder card is read by swiping it in front of the reader at a maximum distance of 20 mm.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

Round cover plates

Mylos Lucent

A great adventure in luminosity.
If the need is to surround youself with sparkling elements, the Lucent series is the most appropriate choice.
Made of special resins, each plate enhances with its glossy shades in every setting, like spots of light on Caravaggio canvases.
Mylos Lucent evokes elements such as alabaster and ice, also makes black shine, giving a technological aspect and thereby completing particularly high-tech spaces.

Alabaster white

Mylos Velvet

A touch of velvet in every gesture.

The Mylos Velvet finish draws inspiration from the creation of interiors in the automotive sector, a feather in the cap of Italian industrial tradition.

The technology applied to polymers makes it possible to obtain a matt scratchresistant finish and with an extraordinary soft tactile effect, just like velvet, to provide one's home with an original multisensorial elegance.

Mylos Metal

The prestige, the strength, the charm.
The skill in working metals is another typically Italian talent. The Mylos Metal civil series is the result of the process of die-casting of “zama”, a zinc alloy, finished with the shades of natural metals by means of precious painting and careful brushing for each and every piece. The finishes obtained range from silver to gold, through aluminium, steel and chromium, brushed and glossy, that evoke sensations of sophistication and preciousness.

Square Cover Plate

Mylos Etik

The design in perfect harmony with sustainability. Today, the development of a new product cannot ignore the impact on the environment in which we live. Every effort must be made with a view to obtaining an original but mainly sustainable result. ABB strongly believes in this commitment. And confirms this with Mylos Etik, the new finish that is good for all, including the environment.

Mylos Crystal

The elegance of glass, the naturalness of reflections.

The glass of the Mylos Crystal series is not just glass. It draws inspiration from the great master glass-makers of Murano, in the Venice Lagoon, already active in this art since the VIII century. The elegant satin effect which differs from the typical shiny glass effect is obtained by the sanding effect which consists in subjecting the glass slab to the abrasive action of sand. After treatment the transparent slab becomes opalescent. The result is an elegant yet sober finish suitable for the most sought-after settings, with a refined yet never excessive style.

Mylos Lucent
A great adventure in luminosity.
If the need is to surround youself with sparkling elements, the Lucent series is the most appropriate choice.
Made of special resins, each plate enhances with its glossy shades in every setting, like spots of light on Caravaggio canvases.
Mylos Lucent evokes elements such as alabaster and ice, also makes black shine, giving a technological aspect and thereby completing particularly high-tech spaces.

Mylos Velvet

A touch of velvet in every gesture.
The Mylos Velvet finish draws inspiration from the creation of interiors in the automotive sector, a feather in the cap of Italian industrial tradition.
The technology applied to polymers makes it possible to obtain a matt scratchresistant finish and with an extraordinary soft tactile effect, just like velvet, to provide one's home with an original multisensorial elegance.

ABB i-bus® KNX – User Operation – Design Ranges – Mylos

Mylos Metal

The prestige, the strength, the charm.

The skill in working metals is another typically Italian talent. The Mylos Metal civil series is the result of the process of die-casting of “zama”, a zinc alloy, finished with the shades of natural metals by means of precious painting and careful brushing for each and every piece. The finishes obtained range from silver to gold, through aluminium, steel and chromium, brushed and glossy, that evoke sensations of sophistication and preciousness.

WaveLINE Wireless Control – RF Sensors

01

02

03

04

05

01 SM WaveLINE movement detector, Article-No. 6747 AGM-204-500

The WaveLINE Busch-Watchdog 220 is a battery-operated movement detector. Since it is installed without cables it can be mounted in the most ideal position. The battery has a service life of 5 years.

02 WaveLINE media converter TP-RF, Article-No. 6770-500

The KNX and Busch radio control are coupled via the WaveLINE media converter TP-RF. Telegrams can be exchanged in both directions. One application serves to transmit the window sensor to the KNX system.

03 Window sensor, Article-No. 6720-64

The WaveLINE window sensor is retrofitted between the window and window handle, which means the original window handle is retained. The window handle is used for the following window positions: opened, tilted and closed.

04 Universal detector, Article-No. 6721-64

The WaveLINE universal detector is suited for skylights or sliding doors and is activated via a reed contact. The universal detector has a second channel which can be permanently wired to a floating contact (NO or NC contacts).

05 Remote control RF, Article-No. 6780-500

The remote control is used as mobile control for the WaveLINE. Loads can be controlled individually and scenes can be started.

WaveLINE Wireless Control – Transmitter

6731-214-500

6731-84-500

WaveLINE-Switch Sensor 1-fold

1gang wall-mounted transmitter independent of mains power supply. For switching and dimming. For controlling blinds and light scenes. 1 radio channel can be operated or up to 2 light scenes can be called up. For flush-mounted WaveLINE actuators 6701-101, 6702, 6703, 6704 and 6705-101. For LED display WaveLINE 6730-xxx. Compatible with WaveLINE KNX gateway TP-RF 6770. Send frequency: 868 MHz. Free-field range: approx. 100 m. Power supply: lithium button cell battery Type CR2032. Battery included in delivery; service life: typically 5 years.

Intelligent Building Solutions

WaveLINE Wireless Control – Transmitter

6725-500

WaveLINE binary input, 2gang, 230 V

Radio control telegrams are sent when the two extension units are activated with mains voltage (AC 230 V~). Operation also possible via conventional push-buttons (2020 US, 2012/6 UK). The 2gang binary input has 5 function modes 2-channel switching; 2-channel dimming; 1-channel blind; Two-channel light scene control; Channel 1: Switching ON. Channel 2: Continuous switching ON/OFF.
In dependence of the selected function, it can be combined with WaveLINE actuators 6701-101, 6702, 6703, 6704, 6705-101. Compatible with WaveLINE KNX gateway TP-RF 6770. Repeater function can be activated for extended range. For universal attachment or installation. Phase and neutral conductor required. For installation in (deep) flush-mounted boxes to German Standard DIN 49073, Part 1. Send/receive frequency: 868 MHz. Free-field range: approx. 100 m. Control element: Adjustable potentiometer. Display elements: LED for status display. Rated voltage: 230 V~, +10 % / –10 %. Rated frequency: 50 Hz. Inputs: 2.
Polling voltage: 230 V~, potential-connected.

6747 AGM-204-500

Busch-Watchdog 220° WaveLINE

Wireless movement detector for detecting thermal motion. With display for detection and status indication. With ground and rear-field detection. With high-quality lens for optimum detection. Surveillance density: 84 sectors with 336 switching segments. With integrated dismantling protection. All functions controlled by microprocessor. With automatic range stabilization. With automatic interference suppression. With automatic dazzle-proofing. With automatic battery monitoring. Battery type: Lithium batteries 1250 mAh (L92 AAA 1.5 V). Battery included in delivery. Battery service life: typically 5 years, therefore practically maintenance-free. With brightness-independent test mode for evaluating the detection zone. Individual adjustment of detection range via enclosed protective foil which can be cut to size. Combinable with switch actuator WaveLINE, 1gang, with extension unit 6701-101. Compatible with WaveLINE KNX gateway TP-RF 6770. For standalone and group operation. Switch-off delay: 3 min. (single mode), individually adjustable at actuator (group mode). Send frequency: 868 MHz. Free-field range: approx. 100 m. Rated voltage: 4.5 V–. Detection range: frontal: 16 m, lateral: 16 m. Detection angle: 220 °. Brightness limit value: 0.5 Lux – 300 Lux, Daytime operation. Mounting height: 2.5 m.

Intelligent Building Solutions

WaveLINE Wireless Control – Actuators, RF/ KNX Media Converters

6701-101-500

Receiver WaveLINE, FM

For wireless switching of electrical loads. Functions via radio control: ON/OFF, timer and light scene control. Functions via the extension unit: ON/OFF, timer and sending a radio control telegram. Operation also possible via conventional push-buttons (2020 US, 2012/6 UK). For Busch-Watchdog WaveLINE. For wall mounted transmitter Waveline 6731-xxx, 6732-xxx and 6733-xxx. For remote control WaveLINE 6780. For WaveLINE window position sensor 6720-6x. For WaveLINE 6721-xx universal signalling unit. For Busch-EnergyControl 6762-xx. Compatible with WaveLINE KNX gateway TP-RF 6770. Controllable up to 32 transmission addresses. Send/receive frequency: 868 MHz. Free-field range: approx. 100 m. Control element: Adjustable potentiometer. Display elements: Status indication of output via LED. Rated voltage: 230 V~, +10 % / -10 %. Rated frequency: 50 Hz. Inputs: 1.
Polling voltage: 230 V~, Sensing pulse, L-wire.
Outputs: 1x Normally open contact, potential-bound.

6703-500

WaveLINE-Actuator 2-fold

For wireless switching of electrical loads. For operation mode 2gang switch, 2 separate outputs. For operation mode timer: output 1 (eg lighting), output 2: ON/Off delay in dependence of output 1 (eg fan control). For functions: ON/OFF and light scene control. For wall mounted transmitter Waveline 6731-xxx, 6732-xxx and 6733-xxx. For remote control WaveLINE 6780. For WaveLINE window position sensor 6720-6x. For WaveLINE 6721-xx universal signalling unit. For Busch-EnergyControl 6762-xx. Compatible with WaveLINE KNX gateway TP-RF 6770. Controllable up to 32 transmission addresses. Send/receive frequency: 868 MHz. Free-field range: approx. 100 m. Control element: Adjustable potentiometer. Display elements: Status indication of output via LED. Rated voltage: 230 V~, +10 % / –10 %.
Rated frequency: 50 Hz. Outputs: 2x Normally open contact, potential-bound.

Intelligent Building Solutions

WaveLINE Wireless Control – Window Sensor, Universal Detector

6720-64

Window sensor WaveLINE

For monitoring and transmission of the current window handle position (window open, closed, tilted). The WaveLINE window sensor transmits the current window handle position immediately upon operation. Existing window handle is used. The WaveLINE window sensor is installed between the existing window handle and window frame. Suitable for window handle: 7 mm square fastener, 43 mm attachment screw separation, lifter dia. 10 and 12 mm, max. mounting plate size 34 x 77 mm (WxH). No wire laying required. Accessories for assembly (square fastener extension, screws, adapter for lifter) of the WaveLINE window position sensor included in delivery. Battery included in delivery. Battery service life: typically 5 years, therefore practically maintenance-free. Monitoring of battery life and transmission of battery condition. For LED display WaveLINE 6730-xxx. For flush-mounted WaveLINE actuators 6701-101, 6702, 6703, 6704 and 6705-101. Compatible with WaveLINE KNX gateway TP-RF 6770. Free-field range: approx. 100 m. Send frequency: 868 MHz.

[1] Surface painted

6721-64

Universal alarm unit Wave

For monitoring and transmission of the state (open, closed) of dormer windows, skylights, doors and gates. For window surveillance with open fireplace and extractor hood pursuant to Article 4 of the German Fire Prevention Regulations. Additional connection option for an external, potential-free sensor (choice of normally closed or normally open contact). Isolated evaluation and monitoring of channels. The WaveLINE universal sensor immediately transmits the current information when there is a change in state. Addition cyclic transmission for monitoring of the transmission link and the fault-free state of equipment. Attachment of WaveLINE universal sensor and magnets by using adhesive foil or screws. Accessories (adhesive foil, screws, magnet) included in delivery. Battery included in delivery. Battery service life: typically 5 years, therefore practically maintenance-free. Monitoring of battery life and transmission of battery condition. For LED display WaveLINE 6730-xxx. For flush-mounted WaveLINE actuators 6701-101, 6702, 6703, 6704 and 6705-101. Compatible with WaveLINE KNX gateway TP-RF 6770.
External sensor max. wire length: 5 m. External sensor terminal connection diameter : 0.14...0.5 mm² (single wire). Free-field range: approx. 100 m. Send frequency: 868 MHz.

Freedom
Home becomes smart

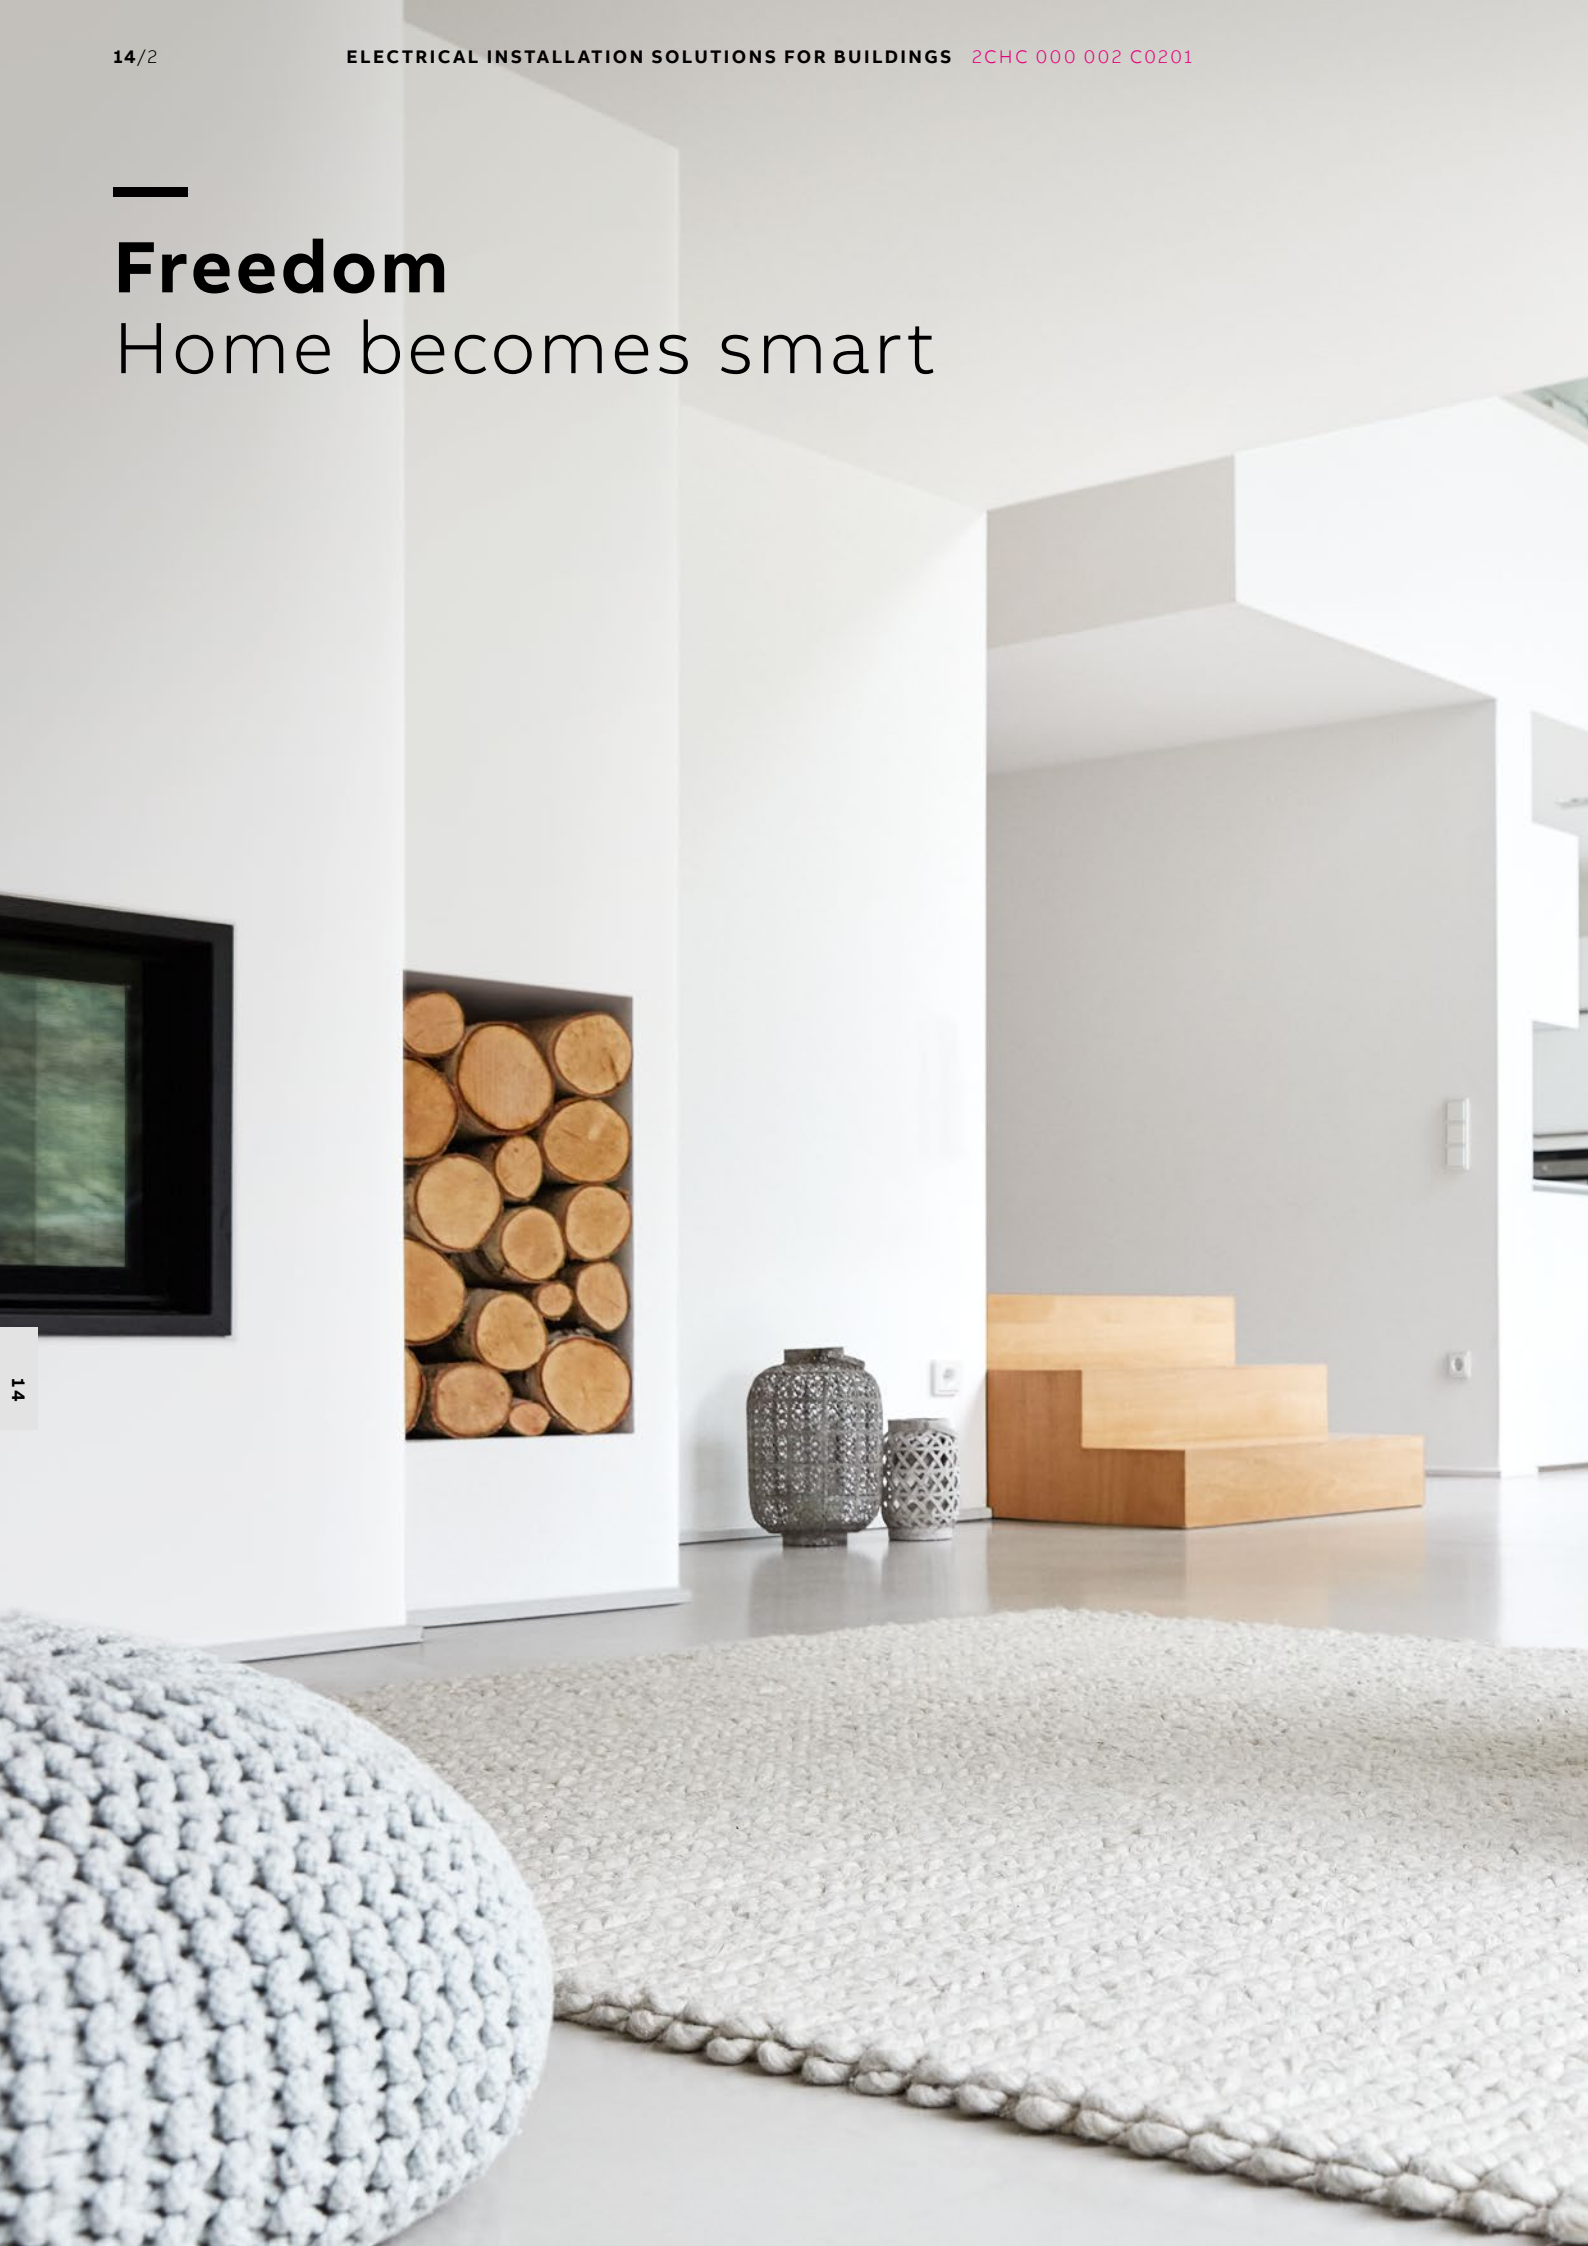

ABB-free@home®
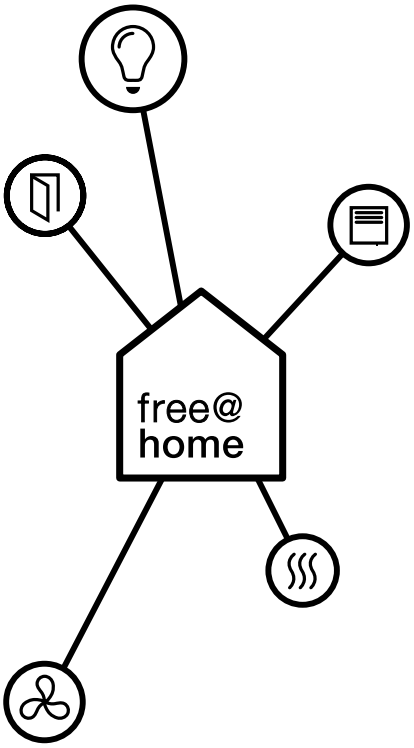
Endless installation possibilities

Perfect daily routine. With ABB-free@home® the entire home can be controlled as usual with switches, and now even more practical: with the smartphone, tablet, or computer. Via touch or voice control.



- Blind
- Light
- Heating
- Air-conditioning
- Door communication

Open for new ideas
With ABB-free@home® everyone can determine for themselves how they want to use the smart living technologies. Both individual functions, such as heating or control of blinds, or a combination of different functions can be implemented. Over the course of time the system can also be flexibly extended, if one so desires. Freedom of choice at all times.

Blinds
Whether blind, roller blind, awning or roller door – with ABB-free@home®, sun protection and energy-saving could not be easier. Opening and closing, as well as adjustment of slats can be automated and controlled. In addition, a weather station for protection during a storm, a timer or astro function can be used. It automatically adjusts the blind according to sunrise and sunset. The relevant data are combined in the System Access Point and are precisely implemented.

Light control
Life begins with light.
With ABB-free@home® it can be optimally used, whether for illuminating individual rooms or the entire house. For example, with striking light scenes – for different moods and to suit the occasion. A pleasant side effect here is the cost-saving and environmentally friendly use of energy.

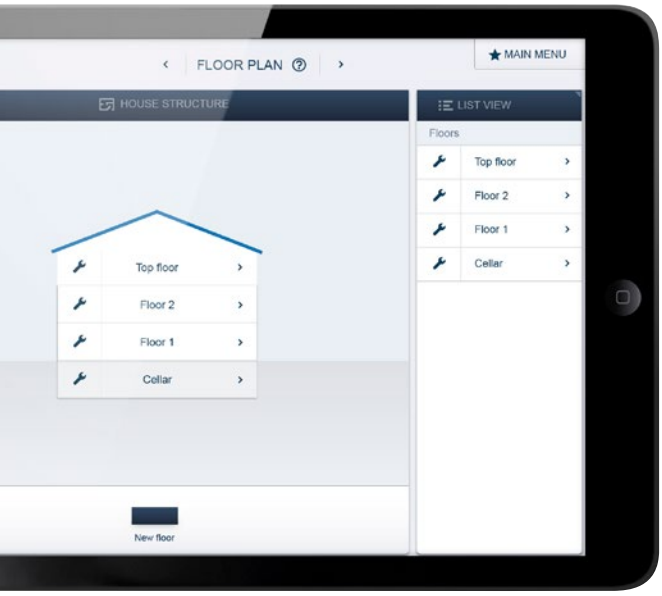
Heating and air-conditioning
Comfortable and energy-saving. The optimum room temperature can be adjusted according to the actual requirement. The heating can be automatically shut off when the windows are open. This reduces energy consumption. The ideal temperature is never the same. Depending on the time of the day, the room temperature controller provides your personal feelgood temperature. The heating valves are controlled wirelessly – with radio controlled thermal actuating drives. The room temperature controllers can be integrated into the switch combination. And the window contacts are networked wirelessly.

Door communication
The ABB-Welcome door communication system can be integrated into ABB-free@home®. The door communication and home automation can be used together with ABB-free@home-Touch 7". For example, the light switches on when the doorbell rings to see visitors more clearly. And for reasons of safety, the video camera records pictures of visitors at the door when no one is home.

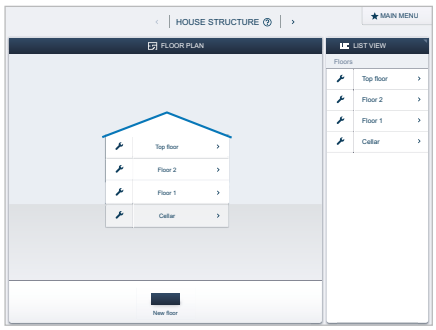
Pictures shown on the display
Practical and convenient. The pictures recorded by the video camera can be displayed on the tablet or smartphone via the ABB-Welcome app. This allows visitors who ring the bell to be recognised even when you are not at home (requires the ABB-Welcome IP gateway and ABB-Welcome outdoor video station).

So easy, anyone can do it
Creating scenes

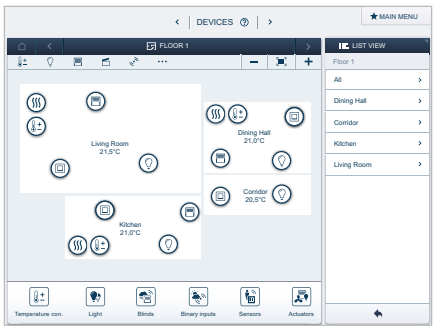
Intuitive operation. The ABB-free@home® app is easy to understand. To start with, all available devices in the rooms are activated in the display, allowing the favourite settings to be made immediately via drag-and-drop.



Easy to install – and even easier to operate
The ABB-free@home® app has been optimised for use in daily life. The wizard guides one through the system. The most important functions are clearly marked with self-explanatory icons. It makes no difference whether the components are connected in the two-wire bus or wirelessly. One has control over a uniform system. For maximum security, a personal password can be activated when logging in. This protects the home automation system against unauthorized access and tampering.

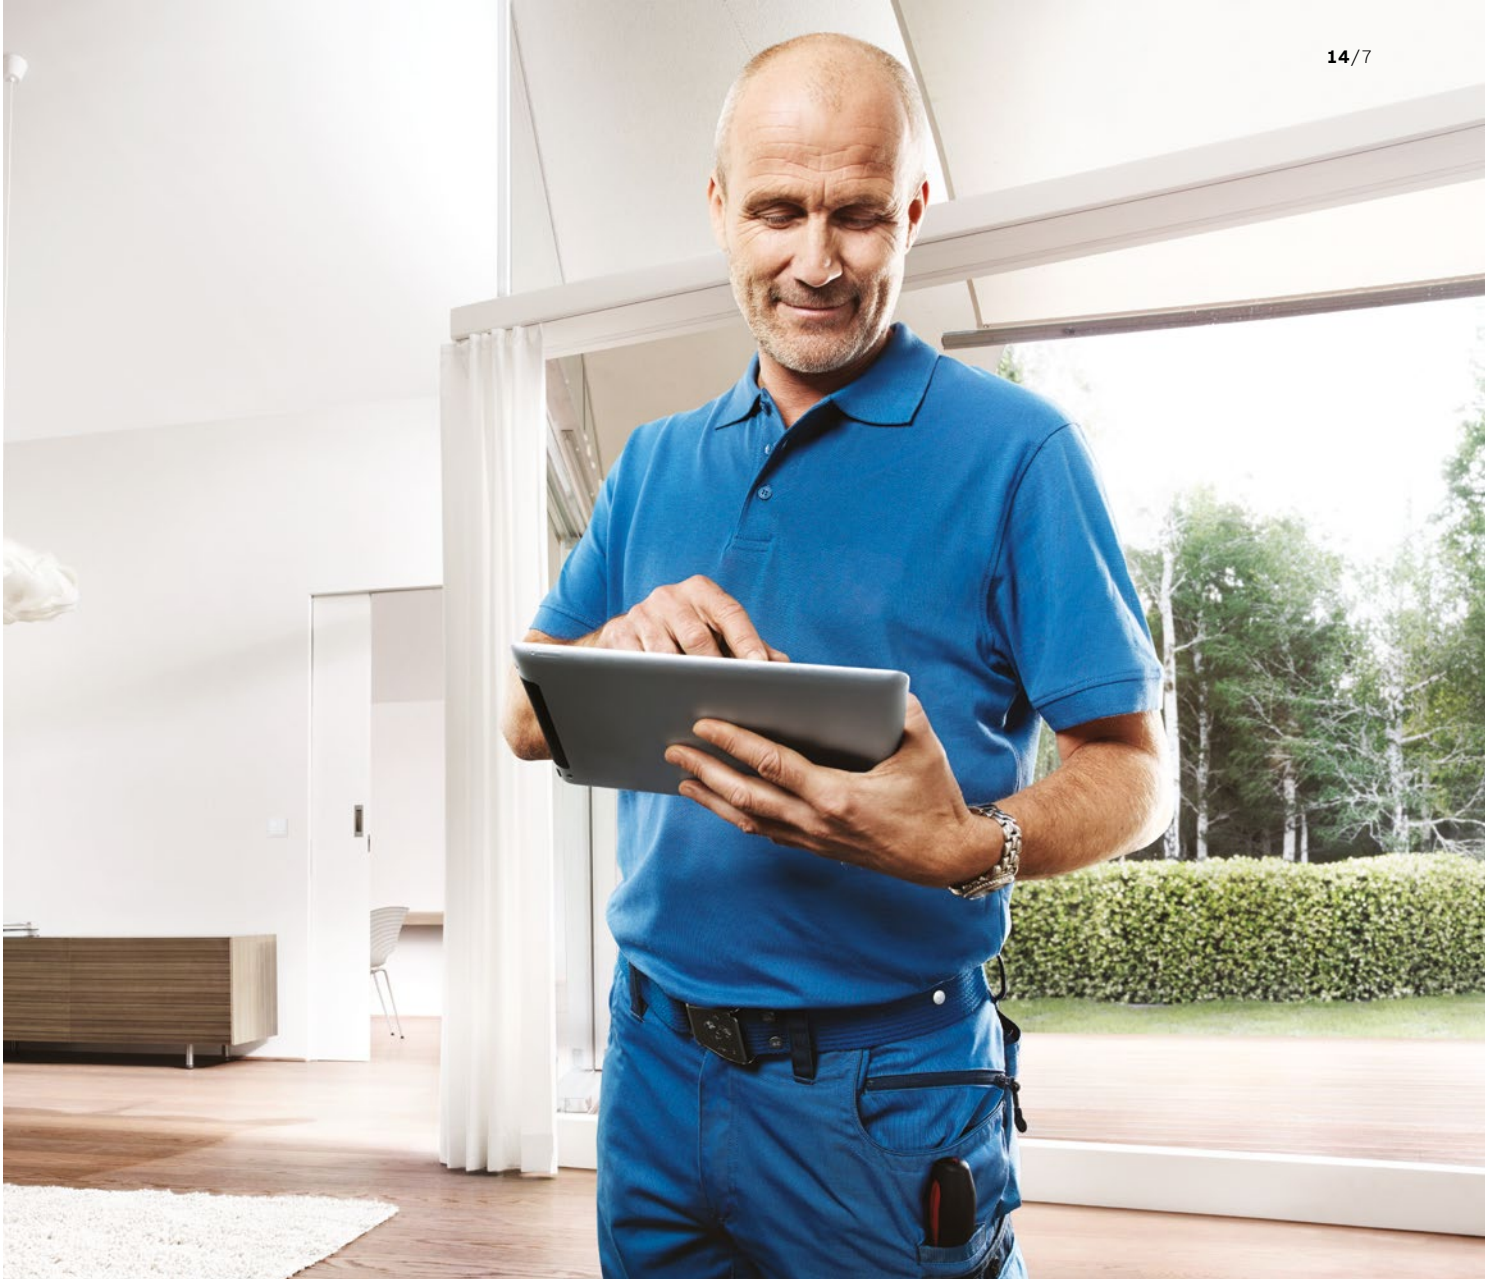


The house
First the electrician sets up the floor plan with its floors and rooms.



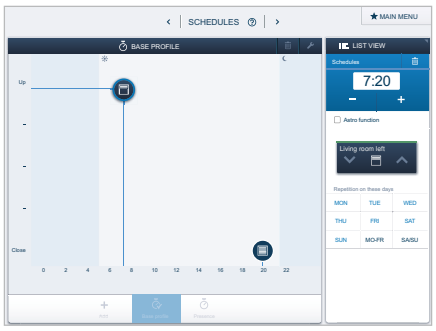
Assigning
Then the sensors in the app are integrated in the floor plan and assigned in the system.

Combining
And finally, the elements can be combined according to individual preferences and requirements.

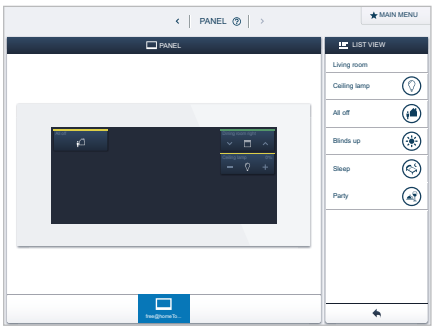


Simple and time-saving
The electrician performs the initial configuration of the system via app. Operation is particularly fast and saves on costly billable hours.

Scene control
The user can easily combine the switches and devices available in each room to create personal scenes. The lighting scene for an evening on the sofa, for example.



Time control
Roller blinds can be automatically moved and lights can be switched at any time or dependent on sunrise or sundown.



Panel setting
The most important functions can be controlled from a central location in the house and easily changed later at any time.

Simply effortless
This saves valuable labour time

Now easier than ever. Only a few components are needed to install ABB-free@home®. For the direct activation of light, the entire system only requires a bus cable, the sensor/actuator unit, a power supply and a System Access Point for programming.

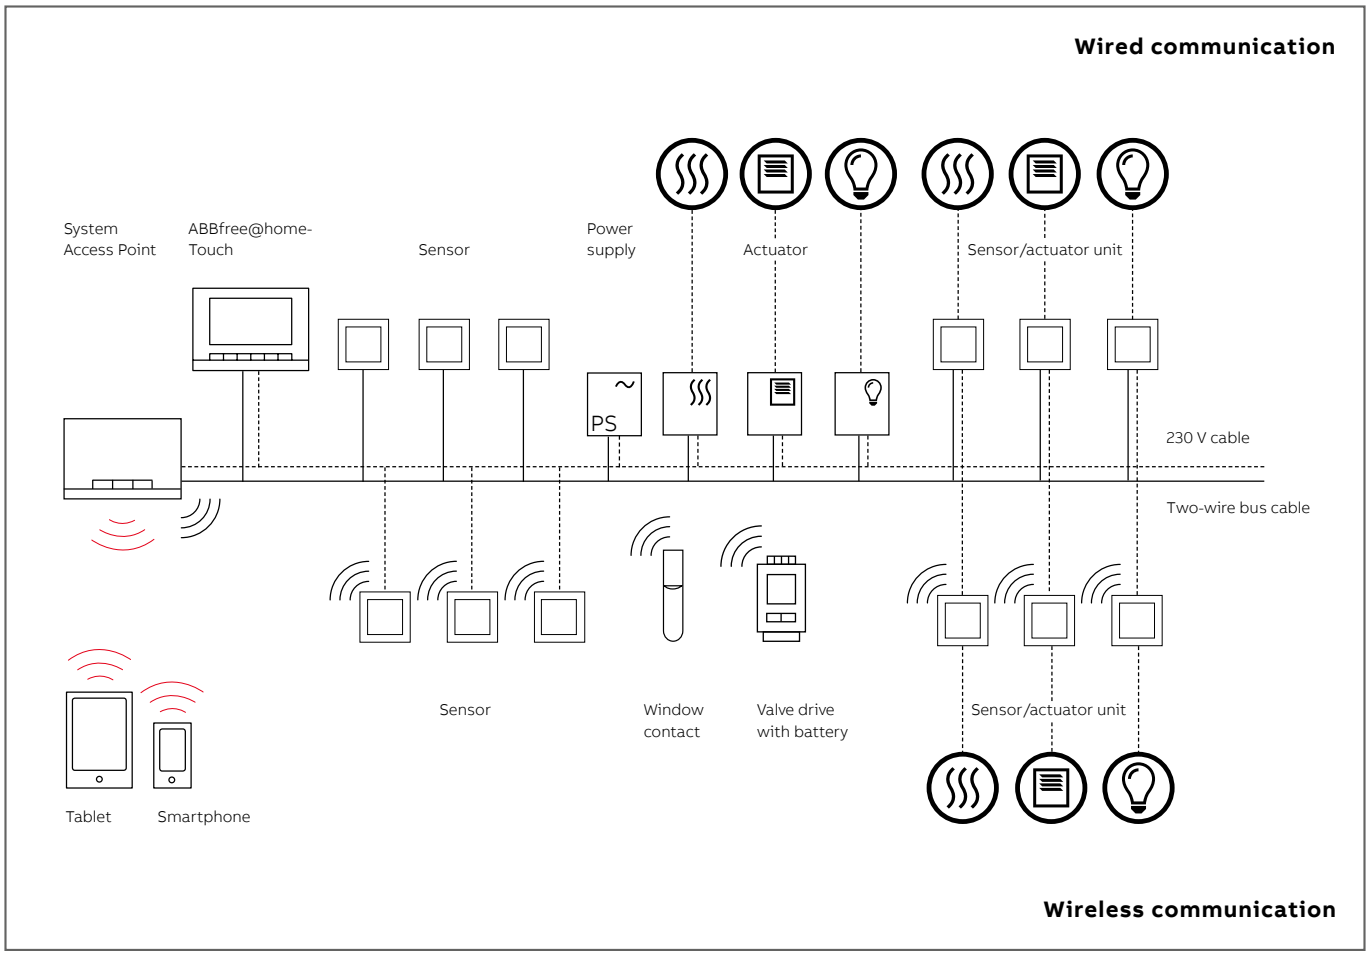
05 Power supply

The System Access Point
The nerve centre of the ABB-free@home® system is the System Access Point. It provides access for computer, tablet or smartphone via WLAN. This allows the functions of the system to be defined and remotely controlled – even after installation. The System Access Point can also be combined with a network router – via LAN or WLAN. Just connect and you're done. For convenience, the System Access Point creates its own WLAN and the software necessary for project planning and commissioning is already on board. This makes you independent from the structural conditions and no additional software is required. As soon as you are finished with programming you can save the status and restore it again at any time.

The actuators and sensors
Actuators for switching, dimming and control are available for ABB-free@home®. The flush-mounted binary inputs also allow the integration of conventional switches and devices, such as window contacts, for example. Push-buttons, room temperature controllers and movement detectors are available as sensors.



Central distribution board with rail-mounting actuator
The installation of central rail-mounting actuators in the consumer unit makes the installation of the sensors even easier – as only the bus line is located in the flush-mounted box. With this method, the costs for each channel can be reduced.

Sensor/actuator unit for decentralised control
All in one. With the sensor/actuator unit, both the sensor and actuator are located in a single device to save space. The basic function of the unit is pre-configured, which makes programming the basic function unnecessary – but possible if required. The 230-volt line is wired as usual.

Sensor/actuator unit
The sensor/actuator unit combines a control element and, for example, a switch actuator in the single flush-mounted housing. It is installed in the same way as a flush-mounted switch. The device has already been pre-programmed: this means the light can be switched on directly after installation – without any programming. The sensor/actuator unit can, of course, be freely re-configured via the user interface, just like all other sensors and actuators.

Simply effortless

This saves valuable labour time

System Access Point, wireless[1)]
For ABB-free@home®
For commissioning and remote control of the ABB-free@home® system.
Allows the execution of astro and time programs.
Commissioning and remote control is executed via the web interface or app.
No additional commissioning software is required.
Easy commissioning with WLAN ad-hoc mode.
Connection to the home network via WLAN client mode or via CAT cable.
The bus can be connected via enclosed terminal block.
Display elements: LED for status display.
Bus voltage: 24 V
Rated frequency: 50 Hz/60 Hz
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C

1) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

External antenna
For ABB-free@home®
For use with System Access Point SAP-S-2 and SAP-S-127.2.
Feed the ABB-free@home® wireless signal to the outside when the internal antenna of the System Access Point is shielded due to structural conditions.
With magnetic base.
Cable length: 1.5 m

ABB-free@home®

System devices

Basic free@home radiator thermostat, wireless [1) 2)]
For ABB-free@home®
For temperature control of hydronic heating radiators.
With integrated temperature sensor, controller and actuating drive.
Local operation for the switchover between comfort mode and Off.
No wire laying required.
Communication with the free@home system is carried out wireless.
Setpoint adjustement via the free@home app or a temperature controller extension (e.g. RTC-F-1).
“Window open” detection when combined with Window sensor Wireless (WBI-S-1-XX-WL).
With lime protection function.
With frost protection function.
Quiet operation.
Installation with sleeve nut M 30 x 1.5.
Fits many popular valve bases (e.g. Braukmann, Heimeier, Honeywell, Junkers, MNG).
The adapters for Danfoss RAV, Danfoss RA and Danfoss RAVL are included in the scope of supply.
Adapters for additional valves are available as accessories.
Battery included in scope supply.
Battery type: 2 x AA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 63 mm x 48 mm x 84 mm

WIRELESS	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
NEW	232453	HA-S-1-WL	2CKA006200A0133			1

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

Comfort free@home radiator thermostat, wireless [1) 2)]
For ABB-free@home®
For temperature control of hydronic heating radiators.
With integrated temperature sensor, controller and actuating drive.
Local operation for the switchover between comfort mode, eco mode and Off.
No wire laying required.
With integrated Display and control knob for Setpoint temperature adjustment.
Setpoint adjustement locally, via the free@home app or a temperature controller extension (e.g. RTC-F-1).
Integrated “Window open” detection or can be linked with WBI-S-X-WL.
With lime protection function.
With frost protection function.
Quiet operation.
Installation with sleeve nut M 30 x 1.5.
Fits many popular valve bases (e.g. Braukmann, Heimeier, Honeywell, Junkers, MNG).
The adapters for Danfoss RAV, Danfoss RA and Danfoss RAVL are included in the scope of supply.
Adapters for additional valves are available as accessories.
Battery included in scope supply.

free@home window sensor, wireless [1) 2)]
For ABB-free@home®
For monitoring of the current window handle position.
The status can be visualized on the free@home panel and in the free@home app.
The window sensor is installed between the existing window handle and the window frame.
Existing window handle is used.
Suitable for window handle: 7 mm square fastener, 43 mm
attachment screw separation, lifter dia. 10 and 12 mm, max.
mounting plate size 34 x 77 mm (WxH). No wire laying required.
Mounting accessories (square extension, screws, adapter for cams) are included.
Battery included.
Low Battery notification via the free@home app.
Protection class (Device): IP 43
Temperature range (Device): -5 °C to 50 °C
Dimensions: (L x W x D): 168 mm x 38 mm x 13 mm

WIRELESS	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit

free@home universal detector, wireless [1) 2)]
For monitoring of the state (open, closed) of windows, skylights, doors and gates with a magnetic contact.
Additional connection option for an external, potential-free sensor
(choice of normally closed or normally open contact).
The status can be visualized on the free@home panel and in the free@home app.
The magnetic contact and the potential-free input can be monitored separately.
The universal detector and the magnets are fixed with adhesive film or screws.
Accessories (adhesive foil, screws, magnet) included in delivery.
Battery type: CR2
Low Battery notification via the free@home app.
External sensor max. wire length: 5 m
External sensor terminal connection diameter : 0.14...0.5 mm² (single wire)
Protection class (Device): IP 43
Temperature range (Device): -5 °C to 50 °C
Dimensions: (L x W x D): 118 mm x 30 mm x 22 mm

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

ABB-free@home®

System devices

Weather station
For ABB-free@home®
For recording and transmitting of brightness, temperature, wind speed and rain.
Weather data can be linked with actuators to automatically control functions.
Weather data can be visualized in the ABB-free@home® web interface and the ABB-free@home® app.
Wind speed measuring range 2 - 30 m/s
The bus can be connected via enclosed terminal block.
Rated voltage: 110 V~ - 230 V~
Rated frequency: 50 Hz - 60 Hz
Bus voltage: 24 V-
Inputs: 4
Protection class (Device): IP 44
Temperature range (Device): -20 °C to 55 °C
Temperature range (Sensor):
Brightness limit value: 1 Lux - 100000 Lux
Dimensions: (L x W x D): 108 mm x 121 mm x 227 mm

	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.

ABB-free@home®
Displays

ABB-free@homeTouch 7" [1) 2)]
Indoor video station with 17.8 cm (7") touch display
For ABB-free@home® and ABB-Welcome®.
For the central control of up to 16 configurable ABB-free@home® functions and display of the video image of an outdoor door communication station.
During the conversation a picture of the visitor can be taken and stored in the picture memory. For door calls during absence three pictures of the visitor are automatically stored in the picture memory.
With hands-free function, volume is adjustable.
Easy operation keys for door openers, mute function and light.
Different bell sounds are adjustable for door and floor ringing; five polyphone bell sounds are available.
Volume of bell sounds is adjustable.
SD card slot for extension of the picture memory.
Suitable as room temperature controller extension unit.
For surface mounting.
The bus can be connected via enclosed terminal block.
Display size: 17,8 cm (7")
Display resolution: 800 x 480
Display elements: TFT Touch Display
Protection class (Device): IP 30
Dimensions: (L x W x D): 155 mm x 218 mm x 29 mm

	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit

625 black	182383	DP7-S-625	2CKA008300A0357			1

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

ABB-free@home®
Displays

ABB-free@homeTouch 4.3"
For the central control of up to 16 configurable ABB-free@home® functions.
For the display of configurable system messages.
A configurable primary function can be triggered with a multi-touch gesture.
Capacitive touch screen with closed glass surface. With integrated room temperature controller and temperature sensor. In connection with temperature sensor DP4-T-1 the integrated room temperature controller can be fitted with a remote sensor.
Suitable as room temperature controller extension unit (up to 8).
Requires additional power supply 24 VDC; e.g. 6358-101
Display size: 10.9 cm (4.3")
Display resolution: 480 x 854
Mounting height: 8 mm
Control element: freely programmable touch surfaces, Display elements: 1 LCD display,
Bus voltage: 24 V-,
Protection class (Device): IP 20, Temperature range (Device): -5 °C to 40 °C,
Dimensions: (L x W x D): 104 mm x 143 mm x 53 mm,
No additional commissioning software is required., Programming only with bus voltage applied via the web interface of the System Access Point.

Sensor unit, 1gang [1) 2)]
For ABB-free@home®
For transmitting switching, push-button, dimming and blind commands to an ABB-free@home® actuator.
Only to be used in combination with ABB-free@home® 1gang rockers.
The bus can be connected via enclosed terminal block.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 23 mm
Mounting depth: 9 mm

Sensor unit, 1gang, wireless [1) 2)]
For ABB-free@home®
For transmitting switching, push-button, dimming and blind commands to an ABB-free@home® actuator.
Communication with the free@home system is carried out wireless.
Only to be used in combination with ABB-free@home® 1gang rockers.
The bus can be connected via enclosed terminal block.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Rated voltage: 230 V~
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 45 mm
Mounting depth: 32 mm

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

Room thermostat [1) 2)]
For ABB-free@home®
Heating/cooling operation.
Control element with room temperature controller function for controlling commercially available actuating drives in connection with HA-M-0.6.1, HA-M-0.12.1, FCA-M-2.3.1.
With display of set-value temperature.
Only to be used in combination with ABB-free@home® room temperature controller cover plates CP-RTC-xxx.
The bus can be connected via enclosed terminal block.
Control element: Floating rocker for the selection of set values and operating modes
Display elements: LCD showing operation modes
Bus voltage: 24 V
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 14 mm

ABB-free@home®

VDE

Room temperature controller/heating actuator, wireless [1) 2)]
For ABB-free@home®
Heating/cooling operation. Communication with the free@home system is carried out wireless.
Control element with room temperature controller function.
With display of set-value temperature.
With integrated switch actuator, e.g. for controlling thermoelectric actuating drives in heating/cooling systems or electric floor heating systems. RTC function is available also without prior programming (preconfigured).
In connection with temperature sensor DP4-T-1 the integrated room temperature controller can be fitted with a remote sensor.
3 wire connection (neutral conductor required).
Only to be used in combination with ABB-free@home® room temperature controller cover plates CP-RTC-XXX.
With fixing claws.
Control element: Floating rocker for the selection of set values and operating modes
Display elements: LCD showing operation modes
Rated voltage: 230 V~
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Supply voltage: 230 V~
Suitable for: ohmic
Rated current: 16 A
Output voltage: 230 V~
Rated power: 3 680 W
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 48 mm
Mounting depth: 32 mm

Switch actuator sensor, 1/1gang [1) 2)]
For ABB-free@home®
For switching 127 V~/230 V~ consumers.
With integrated switch actuator.
Switching function is available also without prior programming (pre-configured).
Configuration can be changed later via the web interface (groups, scenes, etc.).
Only to be used in combination with ABB-free@home® 1gang rockers.
The bus can be connected via enclosed terminal block.
When installing in the flush-mounted box, a spatial division between the bus cable and 127 V/230 V installation cable is to be adhered to! If this minimum distance is not possible, use electronic boxes or insulating tubes.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Outputs: 1x Normally open contact, potential free
Suitable for: ohmic
Rated current: 10 A
Output voltage: 230 V~
Rated power: 2300 W
Suitable for: capacitive
Rated current: 10 AX
Rated power: 2300 VA
Suitable for: inductive
Rated current: 10 AX

Blind actuator sensor, 2/1gang, wireless [1) 2)]
For ABB-free@home®
For controlling blind or awning motors.
Communication with the free@home system is carried out wireless.
With integrated blind actuator.
Blind function is available also without prior programming (left sensor channel is pre-configured). Configuration can be changed later via the web interface (groups, scenes, etc.).
The right sensor channel for programming additional functions (groups, scenes, etc.).
Only to be used in combination with ABB-free@home® 2gang rockers.
The bus can be connected via enclosed terminal block.
When installing in the flush-mounted box, a spatial division between the bus cable and 127 V/230 V installation cable is to be adhered to! If this minimum distance is not possible, use electronic boxes or insulating tubes.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Outputs: 1x Change-over contacts/normally open contact, potential-bound
Suitable for: Operation mode Blind
Rated current: 4 A
Output voltage: 230 V~
Rated power: 920 VA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 45 mm
Mounting depth: 32 mm

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

Movement detector/switch actuator, 1gang [1) 2)]
For ABB-free@home®
With select lens for detection with animal access.
For automatic switching of ABB-free@home® actuators dependent on movement and brightness. Switch-off delay of the actuator can be programmed via the web interface of the System Access Point. For switching 127 V~/230 V~ consumers. With integrated switch actuator. Switching function is available also without prior programming (pre-configured). Configuration can be changed later via the web interface (groups, scenes, etc.).
The bus can be connected via enclosed terminal block. When installing in the flush-mounted box, a spatial division between the bus cable and 127 V/230 V installation cable is to be adhered to! If this minimum distance is not possible, use electronic boxes or insulating tubes.
Bus voltage: 24 V
Outputs: 1x Normally open contact, potential free
Suitable for: ohmic
Rated current: 10 A
Output voltage: 230 V~
Rated power: 2300 W
Suitable for: capacitive
Rated current: 10 AX
Rated power: 2300 VA
Suitable for: inductive
Rated current: 10 AX
Rated power: 2300 VA
Detection range: frontal: 6 m, lateral: 3 m
Detection angle: 180 °
Brightness limit value: 1 Lux - 500 Lux
Mounting height: 1.1 m - 1.3 m
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 53 mm
Mounting depth: 32 mm
Position for installation: vertical

Switch/actuator, 2/4gang + 1 actuator
For switching 230 V~ devices. With integrated actuator. Switching function is available pre-configured. To be used with ABB-free@home® Zenit cover plates for 4 fold push buttons.
Outputs: 1× normally open contact, potential free
Suitable for: resistive
Rated current: 10 A
Rated power: 2300 W
Suitable for: capacitive
Rated current: 10 AX
Protection class of device: IP 20
Mounting depth: 31.5 mm
Dimensions (H × W × D): 44 mm x 44 mm x 40.9 mm

Switch/dimmer, 1/2gang + 1 dimmer
For dimming 230 V~ loads. With integrated universal dimming actuator
for controlling different lamps. The dimming function is available pre-configured.
To be used with ABB-free@home® Zenit cover plates for 2 fold push buttons.
Outputs: 1× dimming channel
Suitable for: 230 V incandescent lamps and low-voltage halogen lamps with conventional transformers
or electronic transformers
Rated power: 10–180 W/VA
Suitable for: LEDi and energy-saving bulbs
Rated power: 2–80 W/VA
Protection class of device: IP 20

ABB-free@home®
Zenit/Millenium

Room temperature controller/heating actuator, wireless [1) 2)]
For ABB-free@home®
Heating/cooling operation.
Control element with room temperature controller function.
With display of set-value temperature.
With integrated switch actuator, e.g. for controlling thermoelectric actuating drives in heating/cooling systems or electric floor heating systems.
RTC function is available also without prior programming (preconfigured).
In connection with temperature sensor DP4-T-1 the integrated room temperature controller can be fitted with a remote sensor.
3 wire connection (neutral conductor required).
Only to be used in combination with ABB-free@home® room temperature controller cover plates CP-RTC-XXX. With fixing claws.
Control element: Floating rocker for the selection of set values and operating modes
Display elements: LCD showing operation modes
Rated voltage: 230 V~
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Supply voltage: 230 V~
Suitable for: ohmic
Rated current: 16 A
Output voltage: 230 V~
Rated power: 3680 W
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 48 mm
Mounting depth: 32 mm

Notes

ABB-free@home®

DINRail

Power supply
For ABB-free@home®
Power supply with integrated choke.
Fast diagnosis due to LED display for operational readiness and errors.
The bus can be connected via enclosed terminal block.
Display elements: Operational load/overload LED
Rated voltage: 127 - 230 V~, +10 % / -15 %
Secondary: 30 V, +2 V / --2 V
Rated frequency: 50 Hz/60 Hz
Outputs: 1
Rated current: 640 mA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm
Module width: 4 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	941839	PS-M-64.1.1	2CDG510001R0011			1

Switch actuator, 4gang [1) 2)]
For ABB-free@home®
For switching 4 independent 127 V~/230 V~ loads.
Each contact has a manual operation function independent of auxiliary voltage for additionally displaying the contact setting.
The bus can be connected via enclosed terminal block.
Control element: Relay control element
Display elements: Relay control element
Bus voltage: 24 V
Outputs: 4
Suitable for: AC1
Rated current: 16 A, cos ϕ 0.8
Output voltage: 230 V~
Suitable for: AC3
Rated current: 8 A, cos ϕ 0.45
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm
Module width: 4 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	942089	SA-M-0.4.1	2CDG510006R0011			1

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

Heating actuator, 6gang [1) 2)]
For ABB-free@home®
For controlling thermoelectric actuating drives in heating/cooling systems.
The outputs are protected against short-circuit and overload.
The bus can be connected via enclosed terminal block.
Bus voltage: 24 V
Outputs: 6
Suitable for: ohmic
Rated current: 160 mA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm
Module width: 4 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	941815	HA-M-0.6.1	2CDG510008R0011			1

Heating actuator, 12gang [1) 2)]
For ABB-free@home®
For controlling thermoelectric actuating drives in heating/cooling systems.
The outputs are protected against short-circuit and overload.
The bus can be connected via enclosed terminal block.
Bus voltage: 24 V
Outputs: 12
Suitable for: ohmic
Rated current: 160 mA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 144 mm x 64 mm
Module width: 8 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	941808	HA-M-0.12.1	2CDG510009R0011			1

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

ABB-free@home®

DINRail

I/O actuator, 8 gang
For ABB-free@home®
Combination device with 8 binary inputs and 8 switch actuators.
Conventional push-buttons or auxiliary contacts can be connected to 8 channels.
The information of the contact enquiry can be used for activating ABB-free@home® actuators or for recording status information.
The contact polling voltage is made available by the device itself.
Maximum cable length at a cable cross-section of 1.5 mm² < 100 m
For switching 8 independent 230 V~ loads.
Bus voltage: 24 V
Inputs: 8
Polling voltage: 32 V-
Outputs: 8 Normally open contact, potential free (for 1 fan)
Suitable for: AC1
Rated current: 6 A, cos ϕ 0.8
Output voltage: 230 V~
Suitable for: AC3
Rated current: 6 A, cos ϕ0.45
Output voltage: 230 V~
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 144 mm x 64.5 mm
Module width: 8 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	945561	SA-M-8.8.1	2CDG510007R0011			1

Fan coil actuator, MDRC
For ABB-free@home®
For controlling blower convectors.
Supports 2-pipe and 4-pipe system for heating and cooling.
The fan speed levels can be switched using a changeover or step switch function.
Three contacts for switching a three-stage fan.
Two contacts for activating the heating and cooling valves.
Supports 24V and 230V valves.
With two binary inputs for connecting dewpoint and condensation contacts.
The scanning voltage is provided by the device.
The bus connection is provided via the enclosed bus terminal.
Bus voltage: 24 V
Inputs: 2
Polling voltage: 10 V-
Outputs: 3 Normally open contact, potential free
Suitable for: AC3
Rated current: 6 A
Output voltage: 230 V~
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 108 mm x 64.5 mm
Module width: 6 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	180433	FCA-M-2.3.1	2CDG510010R0011			1

Blind actuator, 4gang [1) 2)]
For ABB-free@home®
For controlling 4 independent blind or roller shutter drives.
The outputs are inversely blocked.
The bus can be connected via enclosed terminal block.
Bus voltage: 24 V
Outputs: 4
Suitable for: AC3
Rated current: 6 A, cos ϕ 0.45
Output voltage: 230 V~
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm
Module width: 4 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	941785	BA-M-0.4.1	2CDG510011R0011			1

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

ABB-free@home®

DINRail

Dimming actuator, 4gang [1) 2) 3)]

For ABB-free@home®

Multi-channel universal dimming actuator for controlling LEDs, incandescent lamps, 230 V halogen lamps, low-voltage halogen lamps with conventional or electronic transformers, and dimmable energy-saving halogen lamps.
For dimmable Retrofit-LEDs (LEDi).
Increasing the max. load via channel bridging possible.
The outputs can be switched parallel in any combination.
Outputs automatically recognise the connected load.
In addition, the operating mode can be selected manually.
Status indication of the channels via LED.
The bus can be connected via enclosed terminal block.
Display elements: Outputs status indication via LED.
Bus voltage: 24 V
Rated voltage: 230 V~
Rated frequency: 50 Hz/60 Hz
Outputs: 4x dimming channel
Suitable for: 230 V incandescent lamps and low-voltage halogen lamps with conventional transformers or electronic transformer.
Rated power: 10 - 315 W/VA
Suitable for: LEDi and energy-saving bulbs; typical
Rated power: 2 - 80 W/VA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 144 mm x 64 mm
Module width: 8 MW

	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	180358	DA-M-0.4.2	2CKA006220A0395			1

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

Dimming actuator, 4gang [1) 2)]
For ABB-free@home®
Multi-channel universal dimming actuator for controlling LEDs, incandescent lamps, 127 V/230 V halogen lamps, low-voltage halogen lamps with conventional or electronic transformers, and dimmable energy-saving halogen lam
For dimmable Retrofit-LEDs (LEDi).
Increasing the max. load via channel bridging possible.
The outputs can be switched parallel in any combination.
Outputs automatically recognise the connected load.
In addition, the operating mode can be selected manually.
Status indication of the channels via LED.
The bus can be connected via enclosed terminal block.
Display elements: Outputs status indication via LED.
Bus voltage: 24 V
Rated voltage: 127 V~
Rated frequency: 50 Hz/60 Hz
Outputs: 4x dimming channel
Suitable for: 127 V/230 V incandescent lamps and low-voltage halogen lamps with conventional transformers or electronic transformer.
Rated power: 5 - 150 W/VA
Suitable for: LEDi and energy-saving bulbs; typical
Rated power: 2 - 40 W/VA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 144 mm x 64 mm
Module width: 8 MW

	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB-free@home®

DINRail

Binary input, 4gang 1) 2)
For ABB-free@home®
The device detects AC/DC signals of 10 - 230 V via 4 channels. The information of the signal evaluation can be used for controlling ABB-free@home® actuators or for recording status information.
The bus can be connected via enclosed terminal block.
Bus voltage: 24 V
Inputs: 4
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 36 mm x 64 mm
Module width: 2 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	941778	BI-M-4.0.1	2CDG510004R0011			1

2gang binary input, flush-mounted [1) 2)]
For ABB-free@home®
Conventional push-buttons or auxiliary contacts can be connected to 2 channels. The information of the contact enquiry can be used for activating ABB-free@home® actuators or for recording status information.
The contact polling voltage is made available from the binary input itself. Extension of the connecting cables possible by a maximum of 10 m.
Flush-mounted device for installation in a 60 mm device box or distribution box.
The bus can be connected via enclosed terminal block.
Bus voltage: 24 V
Inputs: 2
Polling voltage: 20 V-,
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 39 mm x 40 mm x 12 mm

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	941679	BI-F-2.0.1	2CDG510002R0011			1

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

4gang binary input, flush-mounted [1) 2)]
For ABB-free@home®
Conventional push-buttons or auxiliary contacts can be connected to 4 channels. The information of the contact enquiry can be used for activating ABB-free@home® actuators or for recording status information.
The contact polling voltage is made available from the binary input itself. Extension of the connecting cables possible by a maximum of 10 m.
Flush-mounted device for installation in a 60 mm device box or distribution box.
The bus can be connected via enclosed terminal block.
Bus voltage: 24 V

Door entry system
Simple but impressive

Thanks to its intuitive design, using the ABB-Welcome indoor station is as easy as saying, “hello”. Even without prior experience, residents will instantly understand the easily recognized symbols and functions at a glance.

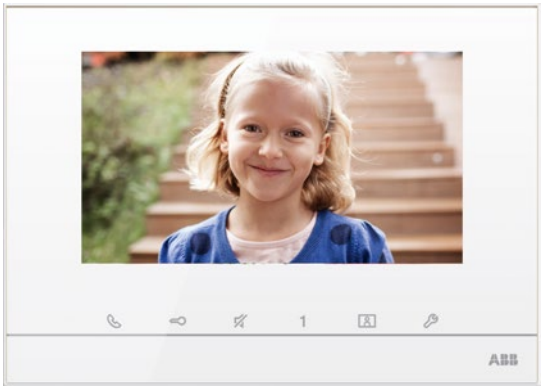

ABB-Welcome is designed with a beautiful modern style, and an elegant look. It is more than just a robust door entry system; ABB-Welcome also helps you to create an atmosphere of comfort, harmony and style in your home.

Communication
For receiving and ending calls.

Door opener
Open the electric door lock.

Mute function
Switch off the microphone of the indoor station during a conversation, and prevent the visitor at the front door from listening in. It can also be used to switch off the bell. The bell switches back on automatically after 10 hours.

1

Programmable button
For customized function, e.g. intercom, second lock control, relay actuator control for light switch or additional lock, etc.

Snapshot
For instantly taking a photo of visitors at the front door during communication.

Settings
For individually configuring the device.

Installation is as easy as 1-2-3. The screwless, snap-in design is used on both the outdoor and indoor stations. This makes installation an easy, quick and enjoyable process for both surface- and flush-mounted versions.

ABB-Welcome is the perfect compliment to your home. And, simple installation makes it easy for ABB-Welcome to become part of your life.

Welcome - Outdoor stations

Outdoor station-stainless steel

Audio outdoor station, stainless steel

- Clean design with brushed stainless steel.
- Surface mounting, flush mounting and cavity wall set
- Different mode setting is possible for pushbutton, such as light switch and calling guard
- Weatherproof: Dustproof and waterproof as IP54, and vandal proof as IK07
- Product dimensions: size 1/2: 200 x 125 x 39 mm. size 1/3: 274 x 125 x 39 mm.

Article No.	Order No.	Description	Pack Qty
M21011P1-S		Audio outdoor station, 1 pushbutton, stainless steel	1/19
M21013N3-S		Audio outdoor station, without pushbuttons, size 1/2, stainless steel	1/19
M21013N6-S		Audio outdoor station, without pushbuttons, size 1/3, stainless steel	1/12

Video outdoor station,1 button and 2 button optional

- Clean design with brushed stainless steel
- Surface mounting, flush mounting and cavity wall set
- Different mode setting is possible for pushbutton, such as light switch and calling guard
- Weatherproof: Dustproof and waterproof as IP54, and vandal proof as IK07
- Product dimensions: size 1/3: 274 x 125 x 41 mm. size 1/4: 347 x 125 x 41 mm.

Article No.	Order No.	Description	Pack Qty

Article No.	Order No.	Description	Pack Qty
83173-500-01		Proximity badge, IC card	

Quick composition guide for modular pushbutton outdoor station
(3-row or 4-row pushbutton)

Welcome provides a wide range of outdoor stations with pushbuttons by the combination of the modules, covers and boxes.

For pushbutton outdoor stations, it multiples the application by setting as one column or double column for the same pushbutton module. The setting is made by the audio modules. We refer to the pushbutton status as “single row” or “double row.”
3-row and 4-row pushbutton are optional for application.

To compose a pushbutton outdoor station, audio module (with no pushbutton, with 1-row or 2-row pushbutton), pushbutton module (3-row or 4-row pushbutton), cover frame and flush mounted boxes are compulsory. If surface mounting is required, a rain hood is needed.

There is a quick composition table for pushbutton outdoor station on pages 10-11. Please follow the guide below and refer to the table to choose the items needed for the desired pushbutton outdoor station.

Step 1:
Audio or video?
Please refer to page 10 for audio pushbutton outdoor station and page 11 for video pushbutton outdoor station.

Step 2:
3-row or 4-row pushbutton?
Please refer to the 3-row or 4-row pushbutton table for different pushbutton applications.

* It is technically possible but not aesthetically pleasing to combine audio module with pushbutton and 3-row pushbutton module. For better appearance as an outdoor station, the composition of pushbuttons follows the rule that every pushbutton should have the same height. Thus, if 3-row pushbutton module is used, audio module with pushbutton and 4-row pushbutton module are not recommended.

Step 3:
How many calls are needed?
Please decide whether single row or double row pushbutton is needed, then please turn to the button ranges to quickly locate the possible composition.

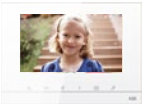
* In case the light and call guard functions are required for the outdoor station, then the total buttons should be the combination of the apartment no. and button number for the extra functions.
** If it's not certain whether single or double pushbuttons for one row is optimal, it is possible to turn to the pushbutton range to see all the possibilities.

Step 4:
Choose the right composition by balancing cost and aesthetics

* There may be more than one possibility of combining outdoor stations by choosing 3-row module or 4-row pushbutton module, choosing a nameplate module or not and setting as single row or double row for the same pushbutton module. It is advisable to consider both cost and aesthetics when making this decision.

Door entry system

Welcome - Indoor stations



7" video hands-free indoor station

- Both push button version and all touch version are available.
- Large 17.8 cm (7") color display with intuitive touch control.
- 6 buttons for communication, unlocking, mute, programmable button (can be set as intercom, call guard unit, etc.), surveillance and setting.
- During resident's absence, voice message of the resident will be played automatically in case of door calls, and three photos of the visitor will be automatically stored.
- The number of pictures that can be stored is decided by the capacity of the SD card (not provided).
- Call transfer among different apartments and guard unit is available.
- Doctor function for automatic unlock.
- 5 ringtones for different call sources, i.e. from default outdoor station, secondary outdoor station,door bell, intercom or guard unit.
- Send SOS alarm to guard unit in emergency.
- Surface mounting and desktop mounting (desktop bracket 42311D is needed).
- The detailed user manual can be downloaded through scanning the QR code on the screen.
- Product dimensions: 155 x 218 x 29 mm.

Welcome - System devices

System controller

- As the “brain” of the individual system, it manages the communication between the outdoor station and the indoor station.
- Two working modes : “all on” and “one on”.
- If in “all on” mode, and the apartment contains more than 1 video indoor station, all the screens in the apartment will be on while only one is on if in “one on” mode.
- It can also serve as auxiliary BUS power supply when connected to gateway in certain mode.
- 1 LED for normal working condition indication.
- Overheat, short-circuit and lightening protection.
- Product dimensions: 90 x 144 x 65 mm.

Article No.	Order No.	Description	Pack Qty
M2300		System controller, 1.2A output, MDRC 8U	1/10

Mini system controller

- As the “brain” of the individual system, it manages the communications between the outdoor station and the indoor station.
- Two working modes: “all on” and “one on”.
- If in “all on” mode, and the apartment contains more than 1 video indoor station, all the screens in the apartment will be on while only one is on if in “one on” mode.
- It can also serve as auxiliary BUS power supply when connected to gateway in certain mode.
- 1 LED for normal working condition indication.
- Overheat, short-circuit and lightening protection.
- Product dimensions: 90 x 72 x 65 mm.

Article No.	Order No.	Description	Pack Qty
M2301		Mini system controller, 0.65A output, MDRC 4U	1/10

Gateway

- It offers 5 different modes which can be set by dip switch: apartment gateway, floor gateway, building gateway, auxiliary BUS power supply interface and line amplifier.
- Product dimensions: 90 x 72 x 65 mm.

Article No.	Order No.	Description	Pack Qty
M2302		Gateway, MDRC 4U	1/10

Video outdoor distributor

- Used for buildings with more than 1 outdoor station.
- 2-way inputs are connected to different outdoor stations.
- Product dimensions: 90 x 36 x 65 mm.

Article No.	Order No.	Description	Pack Qty
83325/2-500-01		Video outdoor distributor, MDRC 2U	1/20

Door entry system

Welcome - System devices

Guard unit

- 4.3" touch screen and 6 touch film buttons can ensure the communication with calls from outdoor station, indoor station or other guard unit (if any).
- It can be manually or automatically set into intercept mode to increase security level for all users or only certain individuals.
- Surveillance can be done through the camera of outdoor stations or integrated analog camera.
- Missed calls and alarm messages stored in the memory can be reviewed.
- It can be surface mounted on the wall or desktop mounted (desktop bracket 42311D is needed).
- Product dimensions: 144 x 198 x 45 mm.

Article No.	Order No.	Description	Pack Qty
M2303		Guard Unit	1/15

Video distributor

- This compact device supports 4-way outputs connected to different apartments or different high-rise buildings.
- Flush-mounted into box or surface mounted through the hole in the middle, or DIN rail mounted via DIN adaptor(Article no. 53001DR)
- Product dimensions: 45 x 45 x 26 mm.

Article No.	Order No.	Description	Pack Qty
M2304		Video distributor, FM	1/18

Switch actuator

- This compact device has 3 working modes: extend door bell, door opener and time relay.
- Local pushbutton can be connected as control input.
- The switching duration of unlock or switching on lightings is adjustable.
- Flush-mounted or DIN rail mounted via DIN adaptor(Article no. 53001DR)
- Product dimensions: 51 x 51 x 29 mm.

Article No.	Order No.	Description	Pack Qty
M2305		Switch actuator, FM	1/18

BNC connector

- Used to connect the external camera to the camera interface or outdoor station’s camera module.
- The connector accepts a BNC plug connection directly.
- Product dimensions: 42 x 15 x 14 mm.

Article No.	Order No.	Description	Pack Qty
55001BC		BNC connector	1/10

Camera interface

- Supports up to 4 analog 3rd party cameras for one device.
- Supports camera connection to the existing video/audio outdoor station.
- Supports transfer of image from guard unit to the indoor station.
- Supports the camera for viewing the area of the floor (for example with the connection from indoor station to this interface, where it connects to the analog camera.
- Supports input and output of video signal of outdoor station to 3rd party VDR during the call, which can be viewed from the video indoor station).
- Supports installation in DIN, surface mounted.
- Product dimensions: 77 x 61 x 25 mm.

Article No.	Order No.	Description	Pack Qty
83327-500-01		4-way analog camera interface	1/18

DIN rail adaptor

- One DIN rail adaptor fit for all the flush mounted devices: video distributor, switch actuator, and camera interface
- Adjustable and consistent looking cover can be taken out if needed.
- Product dimensions: 90 x 72 x 65 mm.

Article No.	Order No.	Description	Pack Qty
53001DR		DIN rail adaptor	1/10

IP Gateway & ABB-Welcome App

- The installation of the ABB-Welcome App enables to use smartphones and tablets (iOS and Android) as virtual video indoor station.
- Both WIFI and remote access under 3G/4G through internet service provider.
- IP Gateway acts as a PC interface to program the telephone gateway more efficiently.
  New features:
- Enables the integration with ABB Comfort touch as indoor station.
- Supports to monitor multi-cameras connected with camera interface
- Supports intercom calls, including home to home & room to room call by ABB-Welcome App
- Supports to communicate with guard unit by ABB-Welcome App
- Supports to control relay actuator, and one actuator can be activated during the call if necessary by ABB-Welcome App
- Supports to control two locks during the call by ABB-Welcome App
- Supports to make a SOS call if there is emergency by ABB-Welcome App
- Notification function of App is always available: while App is open in the foreground, background or even closed totally.
- Product dimensions: 90 x 180 x 65 mm.

Article No.	Order No.	Description	Pack Qty
83342-500-01		IP Gateway, MDRC 10U	1/24

Telephone Gateway

- PSTN Telephone integrated as audio indoor station.
- Unlock the door, switch the light, communication can be done through normal telephone.
- Any mobile device can be set as extended indoor station.
- Efficient programming through PC by IP Gateway.
- Product dimensions: 90 x 72 x 65 mm.

Article No.	Order No.	Description	Pack Qty
83350-500-01		Telephone Gateway	1/10

Door entry system

Welcome - System devices

Lift control module

- Enhance security to allow authorized visitor/resident to ONLY go to the designated floor while unauthorized visitor can not activate any floor button in the lift.
- Efficient programming through PC by dedicated commissioning software.
- Each module supports up to 16 floors, total up to 16 modules can be cascaded.
  Size of relay mode: 216 x 110 x 45 mm; size of M adaptor: 90 x 72 x 65 mm.

Article No.	Order No.	Description	Pack Qty
M2307		Lift control relay module	1/30
M2306		M adaptor (two functions: PC adaptor and lift control module)	1/10

NEW

2-wire adaptor

- supports to connect PC with management software into 2-wire DES system
- PC management software supports centralized management of user card no. /user names/
  logic addresses, registration/deletion/change.
- Supports the building system without floor system
- PC management software records system logs, e,g unlock log, SOS log.
- PC management software supports to configure lift control modules.
- 2-wire adaptor dimensions: 90 x 180 x 65 mm

Article No.	Order No.	Description	Pack Qty
M2308		2-wire adaptor, MDRC 10U	1/24

NEW

External camera

- Analogue camera solutions for the camera interface from the ABB-Welcome range
- Three types are optional for different application, normal camera/dome camera/mini dome camera
- Image Sensor: 1/3” 1.3MP SONY Exmor CMOS.
- Effective Pixels: 1305(H)×1049(V).
- Resolution: 700TVL
- Horizontal detection angle: 30 °- 90° (manually adjustable for video camera & dome camera); 75°(fixed for mini dome camera)
- S/N Ratio: ≥50 dB
- Min. illumination (Day): 0.1 Lux @ F2.0
- Min. illumination (Night): 0 Lux @ F2.0
- Video signal: 1 x CVBS, 1Vpp, 75 Ohm (BNC)
- White Balance: AWB, 1 800 K – 10 800 K
- Lens: 2.8-12 mm (manually adjustable for video camera & dome camera); 3.6 mm (fixed for mini dome camera)
- IR Range: 50 m (video camera), 40 m (dome camera), 30 m (mini dome camera)
- Input Voltage: DC 12 V +/- 10 %
- Dustproof and waterproof as IP 66
- Product dimensions:
  Video camera: 286 x 86 x 77 mm
  Dome camera: 130 x 119 x 104 mm
  Mini dome camera: 105 x 94 x 83 mm

Outdoor stations

Stainless steel

Video keypad outdoor station, stainless steel

Description	Video outdoor station with display, transponder and keypad serves as communication device with the indoor station, guard unit or property management.	
Features	- 1M pixel high definition and with 130° wide angle view camera (anti-fog) - Supports to open the door by passwords(public/private), NFC cellphones, C/NFC cards or ID cards. - Elevator calling after door is released - Surveillance by residents, guard unit or property management - Customized welcome message on outdoor display - Call forward in security mode - Support 3rd party access control system - After flush-mounted installation, the outdoor station sticks out 7 mm above the wall	
Technical details	- Flush mounting - Dustproof and waterproof as IP54, vandal proof as IK07 - Dimensions: 347 x 135 x 49 mm	
Version	With ID	With IC/NFC
Article no. **Order no.**	H81371K-S 2TMA100010X0007	H81372K-S 2TMA100010X0008

Video keypad outdoor station, stainless steel

Description	Video outdoor station with transponder and pushbutton(s) serves as end device for the communication with the indoor station, guard unit or property management.			
Features	- 1M pixel high definition and 130° wide angle view camera (anti-fog) - Available with 1 or 2 pushbuttons - Supports to unlock by passwords or cards (IC/NFC), call to resident / guard unit - Surveillance by residents or guard unit possible - Support 3rd party access control system - After flush-mounted installation, the outdoor station sticks out 7 mm above the wall			
Technical details	- Flush mounting and surface mounting - Dustproof and waterproof as IP54, vandal proof as IK07 - Dimensions: 247 x 135 x 49 mm			
Version	1 pushbutton	1 pushbutton, with NFC/IC card reader	2 pushbuttons	2 pushbuttons, with NFC/IC card reader
Article no. **Order no.**	H81371P1-S 2TMA100010X0003	H81372P1-S 2TMA100010X0004	H81371P2-S 2TMA100010X0005	H81372P2-S 2TMA100010X0006

IC/ID-card reader to stainless steel

Description	The stand-alone card reader allows to unlock doors and gives access only to authorized users.
Features	- Supports entering the home with ID/ IC cards - 3 LED indicators
Technical details	- Dustproof and waterproof: IP44 - Product dimension: 125 x 120 x 25 mm
Order no. **Article no.**	YSM14-CR+ 2TMA060090X0001

Outdoor stations
Aluminum

Mini video outdoor station, aluminum

Description	Mini outdoor station with transponder and pushbutton(s) serves as communication device with the indoor station, guard unit or property management.			
Features	- 0.3M pixel and 100°wide angle view camera - (anti-fog with inside heater) - 1 or 2 pushbuttons with up to 2 locks connections - With ID card reader (64 cards) - Surveillance by residents or guard unit - Supports 3rd party access control system - After flush-mounted installation, the outdoor station sticks out 10 mm above the wall			
Technical details	- Compact size, surface mounted by wiegand output and flush mounted - Dustproof and waterproof as IP54, vandal proof to IK07 - Dimensions for flush-mounted: 180 x 105 x 43 mm - Dimensions for surface-mounted: 168 x 99 x 26 mm			
Version	1 push button, ID, surface-mounted	2 push button, ID, surface-mounted	1 push button, ID, flush-mounted	2 push button, ID flush-mounted
Article no. **Order no.**	H81312P1- 2TMA110010A0001	H81312P2-A 2TMA110010A0002	H81362P1-A 2TMA110010A0003	H81362P2-A 2TMA110010A0004

Secondary mini video outdoor station, aluminum

Description	The secondary outdoor station is equipped with one pushbutton. It serves for calling the resident for a second confirmation directly at the front door.
Features	- 0.3M pixel and 100° wide angle view camera (anti-fog) - One push button only - Surveillance only by residents - Support 3rd party access control system - After flush-mounted installation, the outdoor station sticks out 10 mm above the wall
Technical details	- Flush mounted installation - Dustproof and waterproof as IP54, vandal proof as IK07 - Product dimension: 180 x 105 x 43 mm
Article no. **Order no.**	H81361P1-A 2TMA110010A0005

Outdoor stations
Accessories

Flush-mounted box, size 1/3, aluminum

Description	Mounting of outdoor stations into the wall.
Features	- The anodized aluminum flush box is fitted with knock down holes for cabling from left, right, bottom or back. - The product is packed with accessories to ensure quality installation.
Technical details	- Product dimension: 263 x 110 x 42 mm
Article no. **Order no.**	41023F+ 2TMA110160A0001

Flush-mounted box, size 1/4, aluminum

Description	Mounting of outdoor stations into the wall.
Features	- The anodized aluminum flush box is fitted with knock down holes for cabling from left, right, bottom or back. - The product is packed with accessories to ensure quality installation.
Technical details	- Product dimension: 336 x 110 x 42 mm
Article no. **Order no.**	41024F+ 2TMA110160A0002

Pre-installation box

Description	Serves for the mounting of mini outdoor station into the wall for higher stability.
Features	- The anodized pre-installation box is fitted with knock down holes for cabling from left right, bottom or back. - The product is packed with accessories to ensure quality installation.
Technical details	- Product dimension: 174 x 98 x 45 mm
Article no. **Order no.**	41361F 2TMA110010N0001

Indoor stations

7" video hands-free indoor station

Description	Indoor video station displays everything what is happening in front of the front door. It supports multiple functions to control surveillance and communication with other indoor stations, outdoor stations and guard units.		
Features	- Large 17.8 cm (7") color display with a TFT touch control screen, resolution 1024 x 600 pixel. - 6 quick buttons for calls with visitors, guard unit or property management, unlock the door, mute signal or sound, text mes sage to guard or property management, intercom home-to home or apartment-to-apartment, absent audio messaging to residents and visitors - Supports second call waiting with picture in picture mode and the showing of the third incoming call as missing call - Integrated multimedia player for pictures and video - 3 different colors: white, black, gold		
Technical details	- Surface-mounted installation - Dustproof and waterproof: IP30 - Product dimensions: 216 x 153 x 25 mm		
Version	white color	black color	gold color
Article no. **Order no.**	H82351-W 2TMA110050W0001	H82351-B 2TMA110050B0001	H82351-G 2TMA110050G0001

Guard unit

Description	The guard unit provides access to various services using the intuitive icons menu on the screen. Communication is possible with indoor stations, outdoor stations and other guard units.
Features	- Stainless steel desktop frame with 7" white color display with intuitive control - 6 mechanical shortcut buttons - Both handset and hands-free communication possible - Unlock the door, call foward, surveillance of outdoor station and community IP camera, door release, alarm messages - Additionally with installation file for property management office including Windows version, server installation and client installation - Property management software supports the communication with outdoor and indoor station and guard unit, surveillance of outdoor station and community IP camera, receiving alarm information, bulletin and text messaging with indoor stations, we come message for outdoor station, card management, history storage include intercom and unlock the doors
Technical details	- Desktop mounted - Dustproof and waterproof: IP30 - Product dimensions: 332 x 239 x 127mm
Article no. **Order no.**	HSM36-GU 2TMA110050W0002

System devices

Power supply

Description	Power supply supplies the power for system devices.
Features	- Includes battery backup interface for mains failur - Supports over-voltage, over-current, over-heat and short-circuit protection.
Technical details	- Lightning proof, dustproof and waterproof: IP30 - Product dimensions: 175 x 90 x 65 mm
Article no. **Order no.**	YSM01-PS 2TMA010080N00001

Elevator control

Description	Lift control module servers as the communication interface to the elevator system. Relay module supplies the relays output to communicate with dry contact input of elevator.	
Features	- High security by allowing authorized visitors/residents to go ONLY to the designated floor. - Authorize elevator floor access for visitor after door has been released - Authorize elevator floor access for neighbor during apartment to apartment - intercom Calling the elevator via indoor station before going out - Efficient programming through PC by dedicated commissioning software. - Up to 16 modules can be cascaded.	
Technical details	- Surface mounted - Size of relay mode: 210 x 110 x 45 mm - Size of M adaptor 71 x 90 x 65 mm.	
Version	Lift control module	Relay module
Article no. **Order no.**	YSM23-LC 2TMA010150G0001	4825-Y 2TMA010150G0003

IP Gateway

Description	The IP gateway serves as apartment entry gateway to gain security for your home private devices.
Features	- Dual LAN port to isolate private devices from public device - Supports ABB-Welcome IP app connection (Android and iOS) - Supports multiple indoor station(s) in one apartment
Technical details	- Lightning proof, dustproof and waterproof: IP30 - Product dimension: 107 x 90 x 65 mm
Article no. **Order no.**	H8301 2TMA110160H0001

Intrusion alarm systems
Intrusion Systems – We make buildings safe and secure

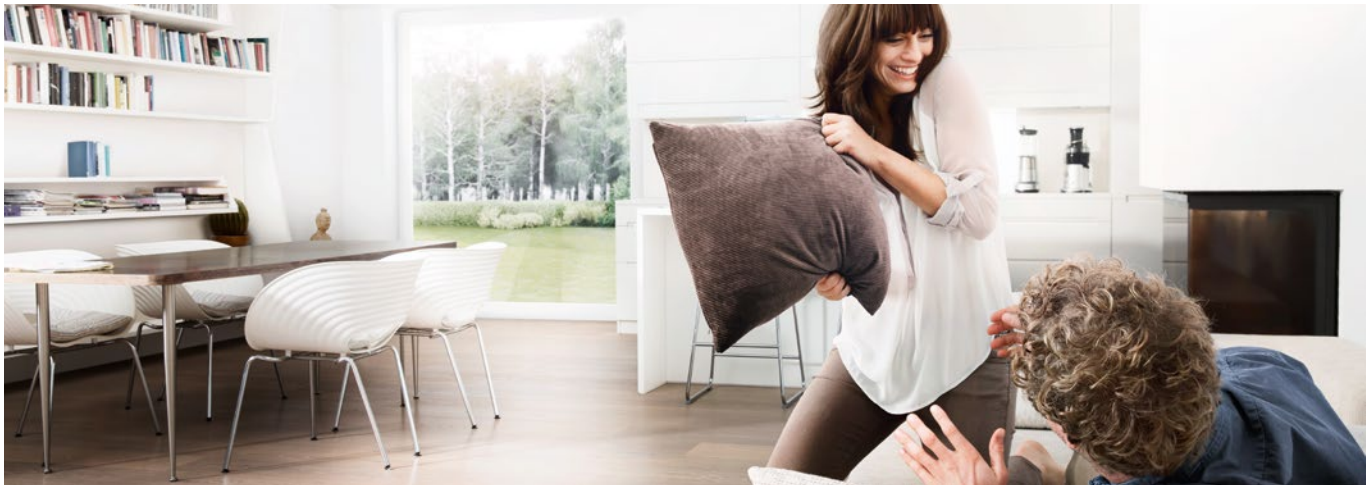

ABB combines reliable alarm technology with easy-to-use home and building automation technologies. This allows the entire system to react directly in cases of emergency. The ABB offer includes a perfect solution: alarm panels, arming modules and alarm sensors (glass break sensors, motion detectors and more). The security system can be connected to building automation systems to become a smarter solution.
We offer reliable Intrusion Alarm Systems for intrusion-, hold-up- and technical alarms. The intrusion alarm systems are conform to the requirements of EN 50131.

Highest safety & security in case of an alarm
If an alarm is triggered, lights can be switched on and shutters can be opened as an additional deterrent. Even when you're at home, ABB solution can, for example, ensure the peripheral protection of your house and, in the event of an alarm, also switch on lights together with the siren and open the shutters.

Being safe at home, even when the alarm system is not activated
Imagine the following: you are at home, some intruders may try to gain access at night or using unwatched entrances. The alarm system is switched off. You can activate the panic function by a press of a button: lights switch on, blinds roll up.

Increased comfort and safety
By disarming the security system, the system switches the lights on in the entrance area and sets the heating to comfort mode. All the security sensors, such as those for water, gas, and smoke are active at all times. If there is an alarm, they control useful functions such as sockets, shutters and lights.

Intrusion alarm systems

Alarm Systems

This section shows the Alarm Systems that are available from ABB from the protection of small to medium properties, residential as well as commercial.

Central Unit **NEW**

The central unit is at the heart of the ABB-secure@home® system; it complies with EN 50131-1 grade 2 class I standard.
It communicates with other system devices based on radio frequency with two-way protocol, by making the following features available to the user:

- management of anti-intrusion and home safety devices;
- management of anti-panic signaling;
- alarm notification via voice or SMS messages to the programmed telephone numbers;
- interfacing ABB-free@home® to integrate safety and home automation systems.

The central unit, equipped with a backup battery, indicates a power failure and its subsequent recovery inside the home.
Via the integrated GSM unit, available into some specific models, it can send alarms both in speech synthesis and SMS messages, to a maximum of 12 telephone numbers. In addition, the GSM unit enables the reception of commands through SMS messages.
Spare rechargeable battery pack (Order code: 2CSY255111R0801).

Motion Detectors

Motion Detectors – Indoor

SMD-W1.1A

Indoor Passive IR Motion Detector **NEW**

The indoor passive IR motion detector reveal the presence of intruders inside the controlled area, providing pet immunity. The is equipped with a passive IR sensor with Fresnel lens and by default it operates with a wide-ranging coverage (90° angle and 11 m distance); it is possible, through a different configuration, to make it operate with a long-distance coverage (10° angle and 17 m distance). This device communicates bidirectionally with the central unit that supervises it at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds that can be different for input and output).
It is possible to configure these parameters during the system commissioning.
Spare lithium battery (Order code: 2CSY255331R0802).

SKP-W2.1A
SMD-W2.1D

Dual Passive IR Perimeter Motion Detector **NEW**

The dual passive IR perimeter motion detector protects doors and/or windows using a tent-type cover on the opening and two infrared sensors. The device is also equipped with an extra input (it can be disabled, leaving only the active IR mode) where you can connect an external wired magnetic contact (with its anti-tampering).
The detector provides the anti-masking feature (that can be disabled).
It is supervised by the central unit at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds that can be different for input and output). It is possible to configure these parameters during the system commissioning.

Motion Detectors – Outdoor

SMD-W4.1A

Perimeter Bidirectional Dual Passive IR Motion Detector NEW

The perimeter bidirectional dual passive IR motion detector allows the external control of the building's perimeter, ideal for the protection of doors and windows. It has to be installed on a wall.
Inside the machine there are four infrared detectors, two per side; both sensors on one side, coupled, can be adjusted horizontally at 0° or 3°. In the vertical direction, for each side, the upper sensor is fixed, while the lower one is adjustable to 4 positions (with detection distance of 2, 5, 8 and 12 m).
The alarm is triggered only if both sensors, even on just one side, detect a presence; this operation mode makes the device particularly suitable to avoid false signals due to the presence of pets. This device communicates bidirectionally with the central unit, that supervises it at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds that can be different for input and output). It is possible to configure these parameters during the system commissioning.

		Type code	Order code		kg	pc.
white	–	SMD-W4.1A	2CSY254971R0202		0.57	1

SMD-W5.1A

Compact Dual Passive IR Perimeter Motion Detector NEW

This compact-size device allows to control the building's external perimeter and it is particularly suitable for the protection of doors and windows. it has to be installed on the wall.
The curtain-type detection area (5° detection angle) has an adjustable length from 2 to 5 meters.
The device is internally fitted with two infrared detectors, one of which is adjustable.
The alarm is triggered only if both sensors detect a presence; this operation mode makes the device particularly suitable to avoid false signals due to the presence of pets.
The detector provides also an anti-masking function.
It communicates bidirectionally with the central unit that supervises it at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds, that can be different for input and output).
It is possible to configure these parameters during the system commissioning.
Spare lithium battery (Order code: 2CSY255331R0802).

		Type code	Order code		kg	pc.
white	–	SMD-W5.1A	2CSY254981R0203		0.32	1

Intrusion alarm systems

Alarm Systems

SMD-W3.1A

Outdoor Dual Passive IR Motion Detector **NEW**

The outdoor dual passive IR motion detector is suitable to control the building's external areas. It has to be installed on wall or pole.
The device integrates two infrared detectors: the upper one is fixed, the lower one is vertically adjustable in 5 positions (with 2, 3, 6, 8 and 12 m average coverage area). The alarm is triggered only if both sensors detect a presence; this operation mode makes the device particularly suitable to avoid false signals due to the presence of pets.
The horizontal detection area is 90°. It can be rotated according to six possible angle positions. The detector provides an anti-masking function (that can be disabled).
This device communicates bidirectionally with the central unit that supervises it at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds that can be different for input and output). It is possible to configure these parameters during the system commissioning.
Spare lithium battery (Order code: 2CSY255331R0802).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SMD-W3.1A	2CSY255211R0201		0.55	1

SMD-W6.1A

Outdoor Dual Passive IR Motion Detector for Height **NEW**

This device, specific to be installed on the wall at a height of 2.5 - 3 m, allows to control building's external areas. Through the two IR detectors, the device indicates the presence of intruders avoiding false alarm alerts.
The detector provides an anti-masking function (that can be disabled).
This device communicates bidirectionally with the central unit that supervises it at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds that can be different for input and output).
It is possible to configure these parameters during the system commissioning.
Spare lithium battery (Order code: 2CSY255331R0802).

Magnetic Contacts

SMC-W1.1D
SMC-W1.1A

Perimeter Magnet Reed Contact Detector NEW

The perimeter magnet reed contact detector controls doors, windows and detects their opening or closing through the internal reed contact and the external magnet. This device communicates bidirectionally with the central unit that supervises it at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds that can be different for input and output).
It is possible to configure these parameters during the system commissioning.
Spare lithium battery (Order code: 2CSY255331R0802).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SMC-W1.1A	2CSY255791R0104		0.165	1
brown	–	SMC-W1.1D	2CSY255731R0104		0.165	1

Magnetic Contacts – Accessories

SMC-W3.1A

Magnet Reed Contact for Surface/Flush Mounting NEW

The device signals the opening of windows or doors. As flush mounting device, it can be instaled in 8 millimetes round holes; to be installed as surface mounting, it needs the provided adapter.
It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x) or to a dual passive IR perimeter motion detector (SMD-W2.1x); for this purpose it is equipped with a 1.2 meter connection cable.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SMC-W3.1A	2CSY295241R0606		0.12	1
brown	–	SMC-W3.1D	2CSY295201R0606		0.12	1

SMC-W2.1

Rolling Door Magnet Reed Contact NEW

The device signals the opening of overhead or rolling doors. It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x) or to a dual passive IR perimeter motion detector (SMD-W2.1x); for this purpose it is equipped with a 1.2 meter connection cable.
It is made of aluminum with high resistance to the transit of heavy vehicles.
The minimum fixing distance is 20 millimeters from ferrous materials and 25 mm from non-ferrous materials.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SMC-W2.1	2CSY255341R0602		0.12	1

Intrusion alarm systems

Alarm Systems

SLM-W1.1

Roller Shutter Sensor NEW

The device detects the lifting of shutters through the movement of the retractable rope.
It is made of thermoplastic material; the rope is 3.5 m long.
It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SLM-W1.1	2CSY255001R0603		0.28	1

SGB-W1.1A

Shock Inertial Sensor NEW

This device detects a possible shock occurred on a door, window or the surface on which it is installed. Equipped with a 2-meter connection cable, it must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x). Assembly: projecting on door/window/generic surfaces using screws or double-sided adhesive tape.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SGB-W1.1A	2CSY255871R0604		0.07	1

Technical Detectors

STD-W1.1

Secure@home Wireless Interface Module for Busch-Smoke Alarm NEW

The module is required for interfacing the smoke detectors (article no. 6800-0-2721) or heat detectors (article no. 6800-0-2723) to the central unit.
The module is equipped with an integrated lithium battery – minimum battery life: 10 years.
The device features a bidirectional communication with the central unit that supervises it with a programmable supervision interval (typically every 15 minutes). It is possible to configure this parameter during the system commissioning.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	STD-W1.1	2CSY254961R0701		0.02	1

STD-W5.1A

Water Detector **NEW**

It detects the presence of water. The minimum detectable level of the liquid is 1 millimeter, but it can be adjusted to higher levels.
It is equipped with an anti-tamper (breakage or removal), self-diagnostics and control of battery charge device.
The detector ic composed by the interface module and the flood detection probe. It features a bidirectional communication with the central unit that supervises it with a programmable supervision interval (typically every 15 minutes).iIt is possible to configure this parameter during the system commissioning.
Spare lithium battery (Order code: 2CSY255331R0802).

Arming Systems

SAD-W1.1F

Preconfigured Remote Control **NEW**

The remote control is a mobile system device used to manage the anti-intrusion system in the simplest way. It has 5 with symbolic identification.
One key is freely configurable and the other 4 keys are pre-configured with the following functions: external arming, internal arming, disarming and panic alarm. All the keys are equipped with LEDs.
Spare lithium button battery, 3V (CR2032) are normally available on the market.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
glass black	–	SAD-W1.1F	2CSY202821R0305		0.07	1

SAD-W2.1F

Remote Control **NEW**

The remote control is a mobile system device used to manage the anti-intrusion system in the simplest way. It has 5 fully configurable keys with numerical identification; each of them can be confiured to arm/disarm the anti-intrusion zones, but also to trigger secial functions such as anti-theft alarm, panic alarm, first aid alarm. All the keys are equipped with fully configurable LEDs.
Spare lithium button battery, 3V (CR2032) normally available on the market.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

Batteries and Installation Material

SBA-W1.1

Rechargeable Battery Pack, Ni-Mh, 6 V, 1.6 Ah **NEW**

This is the central units' dedicated battery pack. It is rechargeable, therefore it normally must not be replaced. Buy a spare battery only if its duration is significantly decreased, which could mean that the battery has reached its end-of-life.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SBA-W1.1	2CSY255111R0801		0.02	1

SBA-W2.1

Lithium Battery, 3 V, 1.4 Ah **NEW**

This lithium batteries are the ones used by all the ABB-secure@home safety and security sensors.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SBA-W2.1	2CSY255331R0802		0.01	1

SBA-W3.1

Battery Pack, LR20, 7.5 V, 12 Ah **NEW**

This is the outdoor sirens's dedicated battery pack.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SBA-W3.1	2CSY254991R0803		0.40	1

SIM-W1.1

Wireless Repeater **NEW**

This device repeats the signal between detectors, remote controls, sirens and central units, extending the range to the radio frequency transmissions.
The repeater features a bidirectional communication with the central unit that supervises it with a programmable supervision interval (typically every 15 minutes).It is possible to configure these parameters during the system commissioning.
Up to 4 repeaters can be configured for each central unit; each repeater has a list of devices to be managed: the update of the devices list for a repeater is done directly through specific functions of the central unit.
The device can be powered by a plug-in 220 V power supply; in this case the battery has a backup function in the event of a mains power failure.
It is equipped with an anti-tamper (breakage or removal), self-diagnostics and control of battery charge device.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

Intrusion alarm systems

Alarm Systems

Alarm System – ABB safe&smart

Alarm Panels

GM/A 8.1

KNX Security Panel, SM

for the protection of small to medium residential or commercial properties against intrusion and technical faults. The Security Panel is suitable for up to five logical areas. It has 8 integrated zones for detectors, a Security Bus for Bus-detectors, Bus-Zone Modules and Setting devices, Ethernet connection (RJ45) for programming, operating and displaying system status via Web-Browser and an integrated KNX interface. The Security Panel GM/A 8.1 complies with the requirements to VdS classes A, B and C, to the European Standard EN 50131, Grade 1 to 3 and to ISO/IEC 62642 Grade 1 to 3.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	GM/A 8.1	2CDG110150R0011		10.5	1

EIM/XB
EIM/XC

Dualtech Bus Motion Detector, 15 m

For direct connection to the security-bus of the Intrusion Alarm Panel GM/A 8.1. The Dual-Motion Detector combines proven passive infra-red technology with temperature independent microwave technology. The combination of both functional principles results in a detector featuring high immunity to false alarms, even with unfavourable ambient conditions, and which still has high detection security. The detectors are registered for VdS classes B/EN Grade 2 and C/EN Grade 3 (anti-masking monitored). They facilitate monitoring of an area with an IR range of up to 15 m.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

Surface mounting, white	–	SAD/GAP	2CDG220021R0011		0.131	1

Intrusion alarm systems

Alarm Systems

Batteries

SAK17

Sealed Lead Acid Battery, 12 V DC

Sealed lead acid battery for power backup up of alarm systems. Maintenance free.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
17 Ah	–	SAK17	GHV9240001V0013		7.15	1

Intrusion alarm systems

Motion Detectors

Motion detectors directly evaluate movements within closed rooms. The change to specific physical variables is evaluated and signaled as an attempted intrusion. The passive infrared detector is used for normal environmental influences.
For critical environmental influences a combination of passive infrared and microwave, so called dual technologie, is used.
Compatible systems: ABB safe&smart, KNX.

IR/KB

Passive IR Motion Detector, 15 m

For conventional wiring to zone inputs of an Intrusion Alarm Panel or a KNX Sercurity Terminal. With a volumetric lens for interior monitoring. Can be optionally set for hall monitoring function up to 15 m. Color: RAL 9010 pure white; for use up to VdS class B/EN Grade 2.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
VdS B/EN Grade 2	–	IR/KB	2CDG230027R0011		0.15	1

EIM/KB

Dualtech Motion Detector, 15 m

The dual detector is based on proven infrared technology and microwave detection. The detector enables a detection range of 15 m with 17 zones on 6 levels. The range of the infra-red component and the microwave can be adjusted separately using a jumper. Up to VdS class C/EN Grade 3; Color RAL 9010 pure white.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

SMC-W3.1A

Magnet Reed Contact for Surface/Flush Mounting NEW

The device signals the opening of windows or doors. As flush mounting device, it can be instaled in 8 millimetes round holes; to be installed as surface mounting, it needs the provided adapter.
It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x) or to a dual passive IR perimeter motion detector (SMD-W2.1x); for this purpose it is equipped with a 1.2 meter connection cable.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SMC-W3.1A	2CSY295241R0606		0.12	1
brown	–	SMC-W3.1D	2CSY295201R0606		0.12	1

RTK

Rolling Door Magnet Reed Contact Set

For monitoring opening or rolling doors or other large doors in the industrial field. Contents: 1 magnet, 1 reed contact with 2 m connection cable 4 x 0.14 mm², 1 m protective tubing and 1 set of mounting accessories. Degree of protection: IP 68; Environmental class to VdS 4; VdS class B.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	RTK	GHQ3201973R0021		0.43	1

SMC-W2.1

Rolling Door Magnet Reed Contact **NEW**

The device signals the opening of overhead or rolling doors. It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x) or to a dual passive IR perimeter motion detector (SMD-W2.1x); for this purpose it is equipped with a 1.2 meter connection cable.

It is made of aluminum with high resistance to the transit of heavy vehicles.

The minimum fixing distance is 20 millimeters from ferrous materials and 25 mm from non-ferrous materials.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SMC-W2.1	2CSY255341R0602		0.12	1

Intrusion alarm systems

Glass Break Detectors

Glass break detectors evaluate glass breakage of glass surfaces from windows or doors. Compatible systems: ABB safe&smart, ABB-secure@home, KNX.

SPGS/W

Glass Break Sensor

For opening surveillance of windows and doors, complete for bolting or drilling. VdS class B.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SPGS/W	GHV9220004V0009		0.11	1
brown	–	SPGS/B	GHV9220004V0010		0.11	1

AGM

Acoustic Glass Break Detector

Acoustic Glassbreak Detector evaluates typical glass-breakage noises. Built in microphone.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	AGM	GHV9210030V0010		0.09	1

SGB-W1.1A

Shock Inertial Sensor NEW

This device detects a possible shock occurred on a door, window or the surface on which it is installed. Equipped with a 2-meter connection cable, it must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x). Assembly: projecting on door/window/generic surfaces using screws or double-sided adhesive tape.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SGB-W1.1A	2CSY255871R0604		0.07	1

LKS

Loctite Adhesive for Glass Break Detector

Loctite Adhesive for mounting Glass Break Sensors SPGS.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	LKS	GHQ4001906R0001		0.06	1

GP2

Tester for Glass Break Detector

Mechanical tester for SPGS.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	GP2	GHV9220004V0004		0.1	1

Intrusion alarm systems

Lock Monitoring

The lock monitoring of windows, doors, hatches or other access points for their unlocked or locked state ensures that every access point is locked before the building is left. Also it helps to reduce false alarms in the building. Compatible systems: ABB safe&smart, ABB-secure@home, KNX.

WRK/W

Lock Bolt Switching Contact with Cable

For installation in the strike plate, for lock monitoring on doors. Water-tight IP 67, with 2.5 m connection cable LIYY 3 x 0.14 mm². VdS class C.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	WRK/W	2CDG250003R0011		0.03	1

VSUE

Window Lock Monitoring Contact

Lock monitoring is carried out with a special magnet and a reed contact. The magnet is mounted on the push rod of the window sash while the reed contact is mounted on the frame. The connection cable LIYY 4 x 0.14 mm² is 4 m in length. VdS class C.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	VSUE	GHV9210018V0022		0.09	1

SLM-W1.1

Roller Shutter Sensor **NEW**

The device detects the lifting of shutters through the movement of the retractable rope.
It is made of thermoplastic material; the rope is 3.5 m long.
It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SLM-W1.1	2CSY255001R0603		0.07	1

Intrusion alarm systems

Panic Buttons

Panic buttons are push buttons which can be pressed by a person in danger. The actuation of a panic button immediately leads to an alarm. In case of a hold-up alarm the panic button can be used to trigger a remote alarm only. Compatible systems: ABB safe&smart, KNX.

ND/W

Emergency Call Button, white

For manual alarm tripping. Complies with the police regulations since it features permanent trip recognition, momentary-contact function, with cover contact. Surface mount version. Colour: white. VdS class C.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
Surface mounting	–	ND/W	GHQ7132443R0011		0.15	1
Flush mounting	–	NDU/W	GHQ7132443R0021		0.15	1

NDA/W

Cover Plate for Emergency Call Button

Used primarily in the banking sector or other institutions, where unintentional alarm triggering is possible due to public access.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	NDA/W	GHQ7132443R0004		0.03	1

Intrusion alarm systems

Technical Detectors

No matter whether they are smoke, gas or water leakage, the right detector will recognize it.

SGL

Gas Detector

For measurement and evaluation of the concentration of natural gas or liquefied gas in the air. The detector requires a 10 – 30 V DC voltage supply and has a normally open relay output contact for connection to the intrusion alarm panels features an LED display and a Piezo buzzer. For ceiling and wall mounting.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SGL	GHQ3050008R0001		0.16	1

SWM 4

Water Detector for Zone Inputs

A resin-encapsulated water detector with gold-plated Termipoint pins, detects water ingress, e.g., pipe fractures, ingress of groundwater and sewage, water damage caused by washing machines and dishwashers etc. before the damage becomes too expensive.
For operation directly on detector circuits of intrusion alarm panels or security terminals.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SWM 4	GHQ4030001R0004		0.16	1

SWM 4/RN

Water Detector with Relay Output

Features a potential free changeover contact output, an LED parallel output and a LED display. The detector resets itself automatically when the affected area dries out. The device draws its power from an external 10 ... 23 V DC voltage source.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SWM4/RN	GHQ4030001R0012		0.23	1

6833/01-84

Busch-Smoke Alarm® ProfessionalLine

For early detection of smouldering fires and open fires with smoke development indoors according to the photooptical measurement principle (Tyndall). With installed Lithium battery. Battery life min. 10 years. With test button and muting. Can be networked with up to 12 detectors using the radio module. Can be networked via 2-wire twisted pair cable with up to 12 detectors. Acoustic alarm: installed horn (85 dBA). Cyclic functional test. Including attachment material – VdS certified. Conform to EN 14604 studio white.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

Intrusion alarm systems

Technical Detectors

FC650/O

Optical Smoke Detector

Optical smoke detector in threshold alarm technology that detects smoke according to the scattered-light principle The detectors feature an alarm indicator on the detector head that is visible from all angles, and which can be be triggered with a permanent magnet for test purposes. A detector base is provided for mounting and cable connection purposes into which the detector is simply screwed in via the bayonet connection. Each detector is equipped with an alarm LED, which displays the stored alarm in the event of an a alarm Detector/base diameter: 110 mm. VdS approved.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	FC650/O	2CDG430079R0011		0.09	1

FC650/TDIFF

Differential Maxium Heat Detector

The FC650/TDIFF is a thermal maximum and rate heat detector with an alarm temperature of 58 °C.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	FC650/TDIFF	2CDG430080R0011		0.09	1

FC650/TMAX

Maximum Heat Detector

Static Heat Detector in threshold alarm technology, – trigger temperature 78 °C. The detectors feature an alarm indicator on the detector head that is visible from all angles, and which can be be triggered with a permanent magnet for test purposes. A detector base is provided for mounting and cable connection purposes into which the detector is simply screwed-in via the bayonet connection. Each detector is equipped with an alarm LED, which displays the stored alarm in the event of an a alarm. Detector/base diameter: 110 mm. VdS approved.

FC600/BREL

Detector Base, 12 V

Enables system-independent connection of the FC650 series fire detector to systems or devices that are not specifically designed for this detector technology. Examples include Intrusion Alarm Panels, KNX Security Terminals, elevator controls or other signal processing equipment. The detector base must be supplied by either a 12 V or a 24 V DV voltage supply. A floating 30 V DC/1 A changeover contacting is provided for transferring an alarm.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	FC600/BREL	2CDG430051R0011		0.08	1

Intrusion alarm systems

Arming Systems

Arming devices for alarm systems ensure a comfort and secure usage for activation or deactivation of the intrusion alarm functions. Compatible systems: ABB safe&smart, KNX.

ESPE/M

Electrical Mini Bolt Lock

The ESPE/M Mini Bolt Lock is used together with an intrusion alarm system to implement the inevitability condition. The motorized bolt lock additionally locks the door to the set area, preventing unintentional opening of the door when the intrusion alarm system is set. The ESPE/M Mini Bolt Lock is connected to the L240/BS Evaluation module for GM/A 8.1 KNX Security Panel.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	ESPE/M	2CDG270010R0011		0.13	1

ESPE

Electromechanical Bolt Lock

Prevents access to the set area of an Intrusion Alarm Panel. The unit is mounted in the door frame. Only a single bore or the counterpart for the locking bolt in the door panel is required. Suitable for use with WEL and WELT. VdS class C.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

Mounting Kit for raised door panel and frame	–	AMSP	GHV9250010V0004		0.94	1

Intrusion alarm systems

Signalling Devices

Signalling devices are used for local alarming. A distinction is made between internal and external alarming. Internal alarming is used, i.e. when people are present in the monitored building. It is used solely to make people aware of a danger. External alarming is carried out using acoustic signaling devices (sirens) and visual signaling devices (strobe light). External alarming is used to contact the neighborhood or the general public. Compatible systems: ABB safe&smart, KNX.

SSS

Electronic Solid-State Siren

Electronic solid-state siren with intermittent tone for alarm purposes in indoor installations. External dimensions: ø x H = 90 x 37 mm.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SSS	GHV9270001V0001		0.17	1

SSF/G

Outdoor Sirene

An aluminium protective housing with additional protective enamel coating. Protected against sabotage by a case tamper contact. The alarm inputs are wired onto a terminal strip. With fixing screw (M4) for potential equalization on the base.
Dimensions: H x W x D = 200 x 205 x 88 mm; Color: RAL 9002 Environmental class III to VdS.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

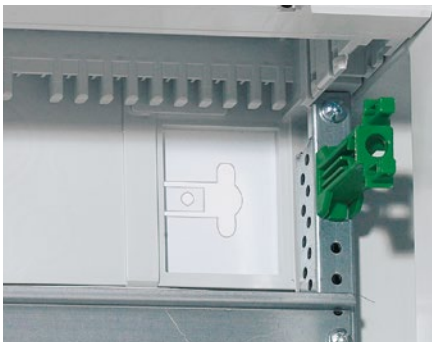
AT/U Series

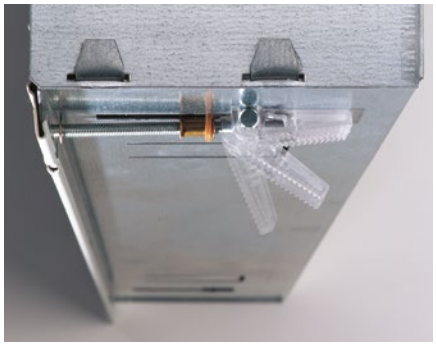
The details make the difference

With its slightly inclined sides, the bright white cabinet and the attractive locking system, the compact distribution boards sets new standards in design.

All AT wall-mounting compact distribution boards are equipped with one integrated flush fitting membrane flange per panel width on top.



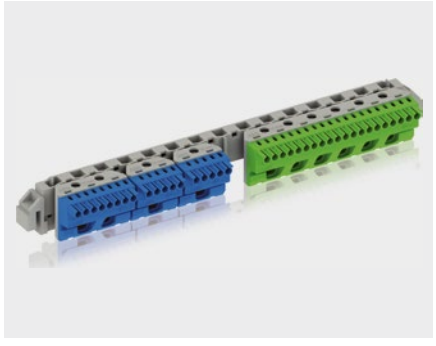
A further standard feature per panel width is the cable strain-relief at the top and the bottom, which considerably simplifies the installation for every wall-mounting and flush-mounting type.



All flush-mounting compact distribution boards can be installed in the hollow wall in just a few steps using the hollow wall set (accessory). No longer two separate cabinets need to be kept on stock - you only need one cabinet for two applications.

An alternative picture frame door is available for the U flush-mounting version. Control panels for commercial and industrial buildings are also available: they can be supplied to be finished and wired by the user, or can be printed and wired according to the user's requirements already in the factory.

Easy any flexible: AT and U Series offers a wide range for almost all applications: wall-mounting, flush-mounting, with metal, transparent or design door, with mounting plates or with DIN-Rails and many more. And all with one single order number.



AT and U series allows with its user-friendly snap-in type N/PE quick busbars considerable time-saving.

Fast assembly of the sealable covers using 90° press and turn closures, which fit into all modular cabinets.

Prepared for all requirements: An earthing set for conversion to protection class I (earthed) is available as an accessory for AT and for U Series.

Subdistribution boards

Compact distribution boards For wall-, flush- and hollow-wall mounting

2CSC000850F0014

Surface, flush or hollow installation

Compact distribution boards with panels and doors
125 mm or 150 mm DIN-Rail spacing
I_n up to 125 A
DIN EN 61439-1-3 (VDE 0660-500)
Degree of protection IP43 (AT)
Degree of protection IP31 (U)
Protection class II, double insulated
Protection class I, earthed in connection with an earthing set (accessory)
The installed distribution board panels can be removed for equipping and wiring
The covers of U and AT compact distribution boards are made of polystyrene
Panels for DIN-Rail devices come with N/PE quick terminals
125 mm or 150 mm DIN-Rail spacing
Enclosures and doors made of sheet steel, 1 mm
Colour: white, RAL 9016
3 or more panels wide: double-wing doors
With N/PE Quick-terminals for panels for rail mounting devices
Without N/PE Quick-terminals for panels with wiring space or mounting plates
Panels for terminals have DIN-Rails assembled insulated (without N/PE Quick terminals) (K)
Panels with mounting plate (without N/PE Quick-terminal) (M)
Hollow-wall-mounting set for flush-mounting versions (accessory)
With cable strain relief
With one membrane flange per panel width on top (AT)
With labelling system
Trim frame adjusted for uneven surfaces (U)
Cable entry covers (accessory)

Subdistribution boards

Flush or hollow wall mounted compact distribution boards U series

2CSC000851F0014

Compact distribution boards, IP31(U), ⧈ ⏚* ▽*1
I_n up to 125 A
DIN EN 61439-1-3 (VDE 0660-500)
The installed distribution board panels can be removed for equipping and wiring
125 mm or 150 mm DIN-Rail spacing
Enclosures and doors made of sheet steel, 1 mm
Colour: white, RAL 9016
3 or more panels wide: Double-wing doors
With new N/PE Quick-terminals for panels for rail mounting devices
Without N/PE Quick-terminals for panels with wiring space or mounting plates
With cable strain relief
With labelling system
Trim frame adjusted for uneven surfaces (U)

* In connection with earthing set
*1 In connection with a hollow-wall set ZKV200P4

Subdistribution boards

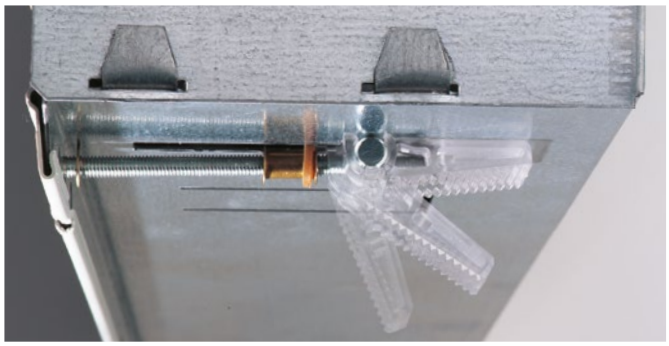
Compact distribution boards For wall-, flush- and hollow-wall mounting*

User-friendliness in series – compact distribution boards from STRIEBEL & JOHN
The new compact distribution boards, which have been developed in close cooperation with technicians from the field, stand out by entirely new solutions.
Flexibility and speed will support the users in their daily tasks. Be it for commercial, industrial or domestic uses - this broad range of products offers a solution to any type of mounting - from flush-mounting and wall-mounting up to hollow-wall mounting applications.
All enclosures are double insulated. An earthing set is available as accessory. Depending on the version, degrees of protection between IP31 and IP43 are available.



—
Simply insert the ZKV200P4 hollow-wall set, fix it, ready

—
Standard equipment - membrane flange on top

—
Integrated cable strain-relief, spacious wall mounting

Unique – The flexibility and speed of hollow-wall mounting
All flush-mounting compact distribution boards can be installed in the hollow wall in just a few steps using the hollow wall sets provided as accessories.

Besides the electrical installer, the wholesalers also benefit from this well-thought solution, as they no longer need to keep two separate cabinets in stock but are able to supply one cabinet for two applications.

Perfection to detail
Wall-mounting compact distribution boards offer the possibility of cable entry on the top, at the bottom and from the back. All wall-mounting compact distribution boards are equipped with one integrated flush fitting membrane flange per panel width on top. This enables quick and easy installation and improves the overall appearance.

A further standard feature per panel width is the cable strain relief at the the top and bottom, which considerably simplifies the installation for every wall-mounting and flush-mounting type.

—
Slightly inclining sides - elegant and attractive design

Convincing design
With its slightly inclined sides, the bright white cabinet and the attractive locking system, the compact distribution boards set new standards - not only in design but also in terms of stability that is achieved by a special bending technique.

Furthermore, only STRIEBEL & JOHN offers an alternative picture frame for the two-panel wide and the four-row high cabinets – an extension of the well known UK500 "addition line".

Control panels which can be supplied to be finished and wired by the user, or which are printed and wired according to the user's requirements, are also available for commercial and industrial buildings.

Subdistribution boards

Compact distribution boards empty cabinets without doors

Compact distribution boards -Empty cabinets without doors
Prepared to be fitted with CombiLine modules
I_n up to 125 A
DIN EN 61439-1/-3 (VDE 0660-600)
Degree of protection without door IP30* (AL and UL)
Degree of protection with door IP43 (AL)
Degree of protection with door IP31 (UL)
Protection class II, double insulated
Protection class I, earthed in connection with an earthing set (accessory)
Enclosure made of sheet steel, 1 mm
Colour: white, RAL 9016
Media panels (accessory)
Trim frame with sheet steel door (accessory)
Trim frame with transparent door (accessory)
Sheet steel door (accessory)
Transparent door (accessory)
Cable entry covers (accessory)
Hollow-wall mounting set for flush-mounting versions (accessory)
Without N/PE Quick-terminals
With cable strain relief
With one membrane flange per panel width on top (AL)

* For an extension as sub-distribution board with distribution board panels or CombiLine modules
* Leave not less than 2 SU for DIN rail devices behind the closure

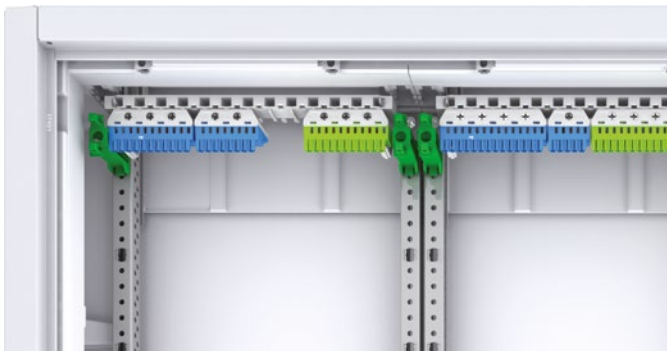
N/PE quick-terminals: Standardised, future-oriented and flexible

Tidy and flexible installation

The N/PE Quick-terminals simplify your work: Just choose the right terminal blocks and plug them in!
Extremely flexible in terms of expandability, these N/PE Quick-terminals are unmatched for safe, efficient and future-oriented conductor connections.



Product benefits

- Flexible terminal system for several N power circuits: Screw connections: 2.5 to 25 mm² with steep conductor; up to 25 mm² with flexible conductor with sleeve; spring terminals: 1.5 to 4 mm² with steep conductor; 2.5 mm² with flexible conductor with sleeve
- Optimal when using several residual current circuit breakers (RCDs)
- Ease of expansion using connecting bridges
- Precise assignment of the terminal blocks (clear colour coding: N = blue, PE = yellow-green)
- Easy labelling of the terminals (DIN VDE 0603 Part 1) using pre-printed, self-adhesive number strips
- Wide range of applications: can be used with the UK500 and A300 consumer unit series, in all compact distribution boards, and with all meter-, wall-mounting and floor-standing cabinets.

Subdistribution boards

A wall-mounting cabinets IP43 indoor installation ⧈

A wall-mounting cabinets IP43 ,, Cabinet depth 215 mm
Empty cabinets for surface mounting, flush mounting and partially recessed mounting in solid walls for indoor use
In up to 250 A (400 A)*
Enclosure and door made of sheet steel, with recessed plastic profile for double insulation
Rear wall made of plastic
RAL 9016, powder-coated
Prepared to be fitted with meter and distribution board panels/combination sets
Prepared to be fitted with CombiLine-M modules on the EDF mounting frame
Double-wing doors on cabinets with three or more panel widths
Door opening angle: 130 degree
With standard closure ZB113
Flange openings are provided on the bottom and sides
Membrane flanges are mounted in the upper connection area
One nipple flange ZB40 also included
Knockouts for incoming cables are provided on the rear side
Cable inlets are located in the lower and upper connection area (per panel width)

> For distribution board panels, combination sets and CombiLine-M, see Chapter Distribution panel system
* Depending on the switchgear assembly in accordance with IEC 61439-1/-2/-3

System pro *E* energy
Wall-mounting and floor-standing cabinets TwinLine N

Subdistribution boards

Wall-mounting and floor-standing cabinets TwinLine N. One cabinet system for every requirement

The TwinLine N wall-mounting and floor-standing cabinets meet in all respects the requirements in the field.
The continuous portfolio in both protection classes and the quick and flexible internal configuration with ease of installation fulfill every demand.

A simplified accessories concept guarantees full flexibility while reducing inventory levels.
In combination with CombiLine N modules, TwinLine N offers unlimited possibilities for the internal configuration.

Product benefits

- Innovative flange technology
- Significantly more usable area for cable entry
- All flanges are compatible with all flange openings and knockouts within the entire TwinLine system
- Flexible internal configuration with CombiLine N modules
- Optimal accessibility and ease of installation thanks to 180 degree door opening angle
- Time-saving plinth assembly and safe transport
- Simplified accessories concept for reduced inventory levels
- Speedy and concise planning and calculations with the PDC software

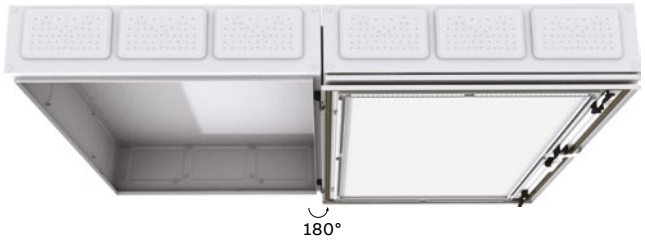
Subdistribution boards

Wall-mounting and floor-standing cabinets TwinLine N. The common product benefits of TwinLine.

A wide range of flanges offers more useable area for cable entry and a innovative flange technology for toolless assembly.

Following flange types are available:
- Membrane flange
- Flange for M screw fittings
- Flange with cable sleeves
- Closing flange

An innovative plinth concept offers time-saving installation and safe transport.
- Plinth in 50 and 100 mm heigth
- Up to three plinth can be “stacked” on top of each other
- The plinths of 50 and 100 mm height can be combined
- Optimal feed-through of cables using the side knockouts for cable ducts or cable screw fittings
- Simple cable fastening rail installation
- Quick cable duct installation in the plinth



Optimal accessibility and ease of installation are guaranteed.
- The door opening angle is 180 degrees
- The innovative locking system is easy to install and allows you to quickly modify the door hinge
- Significantly reduced installation time

Subdistribution boards

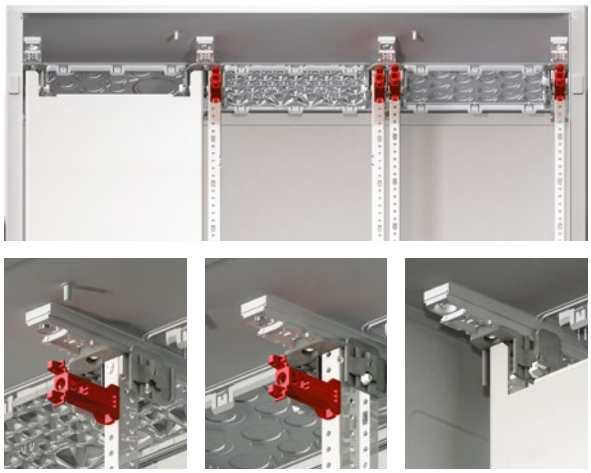
Wall-mounting and floor-standing cabinets TwinLine N. Product benefits of TwinLine N 44

- Prepared to be fitted with CombiLine N modules on EDF mounting frame
- Simplified installation thanks to premounted mounting frame holder
- Premounted frame holders per panel width offer flexible installation
- Depth adjustment possible on two positions

- Flexible interior configuration with CombiLine N modules
- For time-saving installation premounted mounting frame holders as well as center support rail and touch guard

Subdistribution boards

Wall-mounting and floor-standing cabinets
TwinLine N. Product benefits of TwinLine N 55



- Time-saving installation thanks to uniform fastening of mounting plates and EDF and WR mounting frames
- Combination of EDF and WR mounting frames in one cabinet
- Drastic reduction in the number of mounting components for economical warehousing
- Depth adjustment position can be read on the mounting rail in increments of 12.5 mm

- If used with the TwinLine basic cabinets (enclosures without door), the high degree of protection of IP55 is also guaranteed with transparent doors.
- Transparent glass for an appealing look of the distribution board assembly
- Safety glass offering superb shock and impact protection
- Visual inspection of the device status also with the door closed
- Optimal accessibility and ease of installation thanks to 180 degree door opening angle

- All cabinets can be easily connected in series both, vertically and horizontally
- Two side knockouts for feeding busbars through or connecting cabinets in series
- Cabinet connection set for IP55 and additional insulating frames are available as accessories

Technical specifications and product features

Technical specifications for TwinLine-H	
Standards / requirements	According to DIN EN 61439-1/-2/-3, DIN VDE 0660-600-1/-2/-3*
Protection class	I, earthed
	II, double insulated
Degree of protection	With door IP44
	Without door IP30, for a configuration as meter distribution board,
	With distribution board panels, combination sets or CombiLine N modules
Mechanical impact strength	IK 08 for the cabinet enclosure with sheet steel door
	IK 07 in the area of the flange knockouts
	Conditions of installation indoor installation
	Ambient air temperature max. + 40°C
	Ambient air temperature min. - 5°C
	Operating temperature max. + 55°C
	Storage temperature max. + 55°C
	Storage temperature min. - 40°C
Product features for TwinLine-H	
Housing and door material	Sheet steel, RAL 7035, powder-coated
	One flange opening per panel width at the top; knockouts are provided at the bottom
	Door opening angle: 180 degree
	Double-wing doors in all cabinets of a width of 4 panels and more
	Doors with espagnolette closure
	Standard lock: 3 mm double bit
Assembly options*	Prepared to be fitted with distribution board panels,
	combination sets or CombiLine N modules on EDF mounting frame
Forms of delivery	Enclosure with door
	External mounting brackets included in the scope of delivery
	Supporting elements per panel width are included in the scope of delivery
	The touch guard is included in the scope of delivery
	The center support rail is included in the scope of delivery
Accessories	Flanges must be ordered separately
	Plinths must be ordered separately

* The allowed heating for switchgear assemblies above 630 A rated current can be evidenced by the process according to section 10.10.4.2.
The required values of the Verlustleistungs-Abgabevermögens entnehmen Sie bitte den Tabellen siehe auf Seite 14;
Above 630 A rated current the process according to 10.10.4.3 (IEC 60890) must be applied;

Wall-mounting and floor-standing cabinets TwinLine N 55

Wall-mounting cabinets / Technical specifications and product features

Technical specifications for TwinLine-G, L and W	
Standards / requirements	According to DIN EN 61439-1/-2/-3, DIN VDE 0660-600-1/-2/-3*[1]
Protection class	I, earthed
	II, double insulated
Degree of protection	With door IP55
	Without door IP30, for an extension as meter distribution board with distribution board panels, combination sets or
Mechanical impact strength	IK 08 for the cabinet enclosure
	IK 07 in the area of the flange knockouts and transparent doors
Conditions of installation	Indoor installation
	Ambient air temperature max. + 40°C
	Ambient air temperature min. - 5°C
	Operating temperature max. + 55°C
	Storage temperature max. + 55°C
	Storage temperature min. - 40°C

Product features for TwinLine-G, L and W	
Housing and door material	Sheet steel, RAL 7035, powder-coated
	One flange opening per panel width at the top; knockouts are provided on the sides and bottom
	Door opening angle: 180 degrees
	Double-wing doors in all cabinets of a width of 4 panels and more
	Doors with espagnolette closure
	Standard lock: 3 mm double bit
Assembly options*	Prepared to be fitted with distribution board panels, combination sets or CombiLine modules on EDF mounting frame
	Prepared to be fitted with CombiLine modules on WR mounting frame and mounting plates by removing the EDF adapter
Forms of delivery	Enclosure with door
	Enclosure without door
	External mounting brackets included in the scope of delivery
	Mounting rails with mounting frame holder on left and right, and from 4-panel cabinets on, one additional included in the scope of delivery
	Touch guard for the double insulated cabinet included in the scope of delivery
	Touch guards for earthed cabinets must be ordered separately as accessory
Accessories	For enclosures without door the door may also be ordered separately, if necessary
	Flanges must be ordered separately
	Touch guards for earthed cabinets must be ordered separately

* For a detailed description of the extension options, see page 4/20

*[1] The allowed heating for switchgear assemblies above 630 A rated current must be evidenced by the process according to section 10.10.4.2. The required values of the power loss capacity are specified in the tables on page 4/46. Above 630 A rated current the process according to 10.10.4.3 (IEC 60890) must be applied.

Subdistribution boards

Wall-mounting and floor-standing cabinets TwinLine N 55

Floor-standing cabinets / Technical specifications and product features

Technical specifications for TwinLine-G, L and W	
Standards / requirements	According to DIN EN 61439-1/-2/-3, DIN VDE 0660-600-1/-2/-3*1
Protection class	I, earthed
	II, double insulated
Degree of protection	With door IP55
	Without door IP30 for an extension as meter distribution board with distribution board panels, combination sets or CombiLine modules
Mechanical impact strength	IK 08 for the cabinet enclosure
	IK 07 in the area of the flange knockouts and transparent doors
Conditions of installation	Indoor installation
	Ambient air temperature max. + 40°C
	Ambient air temperature min. - 5°C
	Operating temperature max. + 55°C
	Storage temperature max. + 55°C
	Storage temperature min. - 40°C

Product features for TwinLine-G, L and W	
Housing and door material	Sheet steel, RAL 7035, powder-coated
	One flange opening per panel width at the top; knockouts are provided on the sides and bottom
	Door opening angle: 180 degrees
	Double-wing doors in all cabinets of a width of 4 panels and more
	Doors with espagnolette closure
	Standard lock: 3 mm double bit
Assembly options*	Prepared to be fitted with CombiLine module on WR mounting frame or mounting plates
	Prepared to be fitted with distribution board panels, combination sets or CombiLine modules on EDF mounting frame; EDF adapter and centre support rail must be ordered as accessories
Forms of delivery	Enclosure with door
	Enclosure without door
	External mounting brackets included in the scope of delivery
	Mounting rails with mounting frame holder on left and right, and from 4-panel cabinets on, one additional included in the scope of delivery
	Touch guard for the double insulated cabinet included in the scope of delivery
	Touch guards for earthed cabinets must be ordered separately as accessory
Accessories	For enclosures without door, the door may also be ordered separately, if necessary
	Flanges must be ordered separately
	Plinths must be ordered separately
	Touch guards for earthed cabinets must be ordered separately
	EDF adapter must be ordered separately, if required*
	Centre support rails must be ordered separately, if required*

* For a more detailed description of the extension options for floor-standing cabinets, see page 4/30

*1 The allowed heating for switchgear assemblies above 630 A rated current must be evidenced by the process according to section 10.10.4.2. The required values of the power loss capacity are specified in the tables on page 6/45. Above 630 A rated current the process according to 10.10.4.3 (IEC 60890) must be applied.
For the power loss transfer rates, see table on page 4/47

Distribution panel system CombiLine N

Subdistribution boards

Modular distribution panel system CombiLine N
The modular distribution panel system up to 850 A

The highly sophisticated quick mounting system from ABB STRIEBEL & JOHN makes the completion of modular cabinets with distribution panels an effortless process. Simple, quick and safe – these are the three attributes of this system that speak for themselves. Thanks to the uniform screw driving methods using Torx, the distribution panel system CombiLine N is now even more convenient to use!

Modular distribution panel system CombiLine N
A single ditribution panel system for all cabinet types

Convenient to use with Torx
- Very high torque transmission
- Excellent lateral support of the insert
- Quick and convenient screwing
- Uniform tool set for the complete distribution panel system

Subdistribution boards

Modular distribution panel system CombiLine N
The right module for every type of application

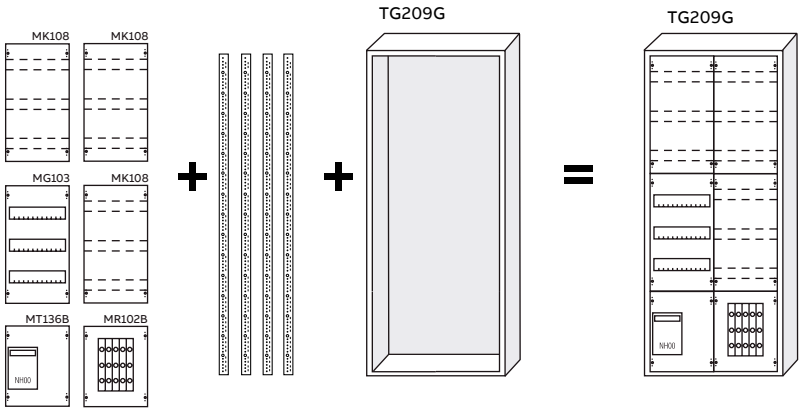
UL and AL compact distribution boards / U, A and B wall-mounting cabinets and G, L and W TwinLine, UF, AF fire protection enclosures

Example: Extension with modules (mounted) to EDF mounting frame in TwinLine-G wall-mounting cabinet

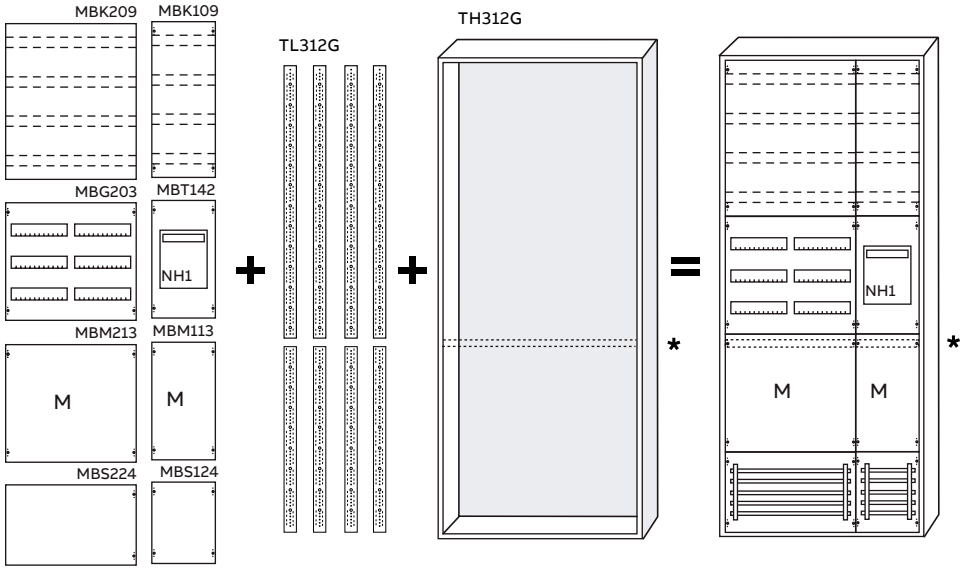


Supply format
Modules are mounted on the EDF mounting frame at the factory and integrated into the cabinet prior to delivery.

Modules (mounted) + EDF mounting frame + empty cabinet = wall-mounted distribution board

TwinLine-H as well as TwinLine G, L, W switchgear cabinets TriLine® / SF fire protection enclosures

Example: Configuration with modules (flatpacks, not mounted) and EDF mounting frame in a TwinLine-L floor-standing cabinet



+ 5 pcs. ZX1001 Cu busbar
+ 5 pcs. ZX1002 Cu busbar

Modules (Flatpacks) + EDF-Mounting frame + Empty cabinet = floor-standing distribution board

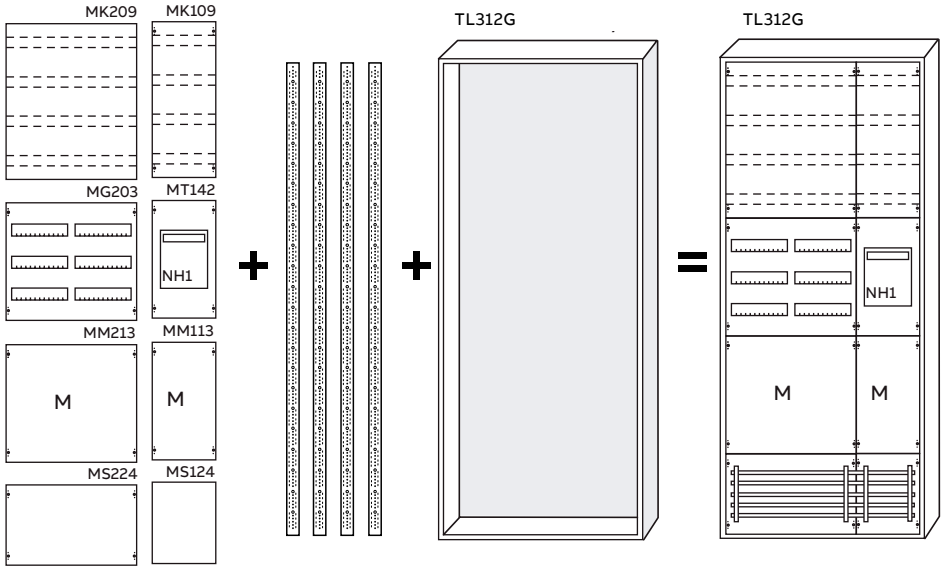
Supply format
Module flatpacks, EDF profiles, Cu busbars and empty cabinet are supplied as individually packaged units.

* The EDF mounting frame must not exceed a total height of 1,350 mm (OH 5). This is why, for design reasons, floor-standing cabinets (prepared for EDF mounting frame) come with a centre support rail installed. This centre rail can be repositioned up or down in grid steps of 150 mm.

Subdistribution boards

Modular distribution panel system CombiLine N
Extension with EDF or WR mounting frame

Floor-standing cabinets TwinLine G, L, W / TriLine® and System pro E power switchgear cabinets
Example: Extension with modules (mounted) to WR mounting frame in C-floor-standing cabinet



+ 5 pcs. ZXM1003 Cu busbar

Modules (mounted) + WR mounting frame + empty cabinet = floor-standing distribution board

Supply format
Modules are mounted
WR mounting frame at the factory and integrated into the cabinet
prior to delivery.

Modular distribution panel system CombiLine N

The right choice for every user

The highly sophisticated quick mounting system from ABB STRIEBEL & JOHN makes the completion of modular cabinets with distribution panels an effortless process. Simple, quick and safe – these are the three attributes of this system that speak for themselves.
You choose the best suited supply format: Select from the following options: complete delivery if you wish to receive the modules mounted to the empty cabinet, or flatpack with instructions to install the modules to the mounting frame yourself, or a delivery in individual parts.

Complete delivery
The modular system panel is supplied with all modules fully assembled on the mounting frame and installed in the distribution cabinet. The mounting frame must be ordered separately.

The benefits: You select components best suited to your application from the CombiLine modules, which makes it really easy to obtain the right low-voltage distribution board. The modular system panel planned by you is assembled at the factory and delivered to you preinstalled in the cabinet. This means that no time is wasted in searching for system accessories such as brackets, screws or fastening elements. All you need to do is select the correct mounting frame for the job. Or, if required, our Panel Design Configurator software can make this decision for you.

Delivery in individual parts
The parts are ordered individually, in order to create your own module, or to expand or modify an existing one.

The benefits: With our comprehensive selection of individual parts, you can remain quick and flexible when it comes to assembling, expanding or modifying a distribution panel.

Delivery as flatpack
All of the individual parts required for assembling a module are packed separately and supplied in the form of a flatpack, complete with mounting instructions. All you need to do is select the correct mounting frame for the job. The mounting frame parts must be ordered separately. If required, our Panel Design Configurator software can select the mounting frame for you.

The benefits: These flatpacks allow you to take a flexible approach towards stock keeping, and avoid a time-consuming search for system parts such as brackets, screws or fastening elements. The instructions supplied with the flatpack make assembly a child's play. Quick and clear planning and calculation become perfect with the assistance of the Panel Design Configurator software.

Subdistribution boards

Modular distribution panel system CombiLine N
Horizontal terminals

MK208

- With horizontal DIN rails 35 x 15 mm
- DIN rail steplessly depth-adjustable
- Usable depth with ZW39P2 - from 68 mm to 115 mm
- Usable depth with ZW59P2 - from 90 mm to 145 mm
- Usable width for terminals: 1 panel wide: 188 mm, 2 panel wide 438 mm, 3 panel wide: 688 mm
- Stepped supply formats
- 150 mm DIN rail spacing (adjustment possible, if required)
- For earthed and double insulated assemblies ⏚
- The mounting frame must be ordered separately

Note: The upper DIN rail is mounted with at least one pair of short deep-mounting brackets (ZW39P2)

Module design:

- 1 GU 1 X ZW39P2
- 2 GU: 1 X ZW39P2, 1 X ZW59P2

Modular distribution panel system CombiLine N

Busbar system 100 mm size 00 fuse switch disconnectors, M(B)D...52(B)

MD352B

- Equipped with size 00 fuse switch disconnectors 160 A, of the following brand: ABB
- Busbar centre spacing 100 mm
- For 3-pole horizontal busbars
- With busbar holder type ZX520
- Rated current (I_n) max. 850 A

Important:

1. When assembling fuse switch disconnectors behind the lock system consider the cabinet depth
   Leading edge device to the cover 29 mm
2. When using a centre support rail or a horizontal cross member for direct connections, the possibilities to use a connection terminal are restricted (plan connection space, empty module)

- The mounting frame must be ordered separately
- Not suitable for fire protection enclosures
- Busbars for this Module must be ordered separately
- planning this Modules, please consider at least 150 mm extra space for wiring-up / connecting cables

*1 Module for EDF mounting frame | *2 Module for WR mounting frame

ZXM1215

- Busbars for single cabinets
- With the WR mounting frame the busbars cannot be connected through from one module to the next
- With the EDF mounting frame (see information on the PW) defined combinations are possible within the cabinet
- Size 00 fuse switch disconnectors are directly mounted to Cu busbars prepared with captive nuts and to this end the busbar holders are fixed to the front position of the bracket
- 3 Cu busbars are required per module

Busbar system 185 mm for fuse switch disconnectors + EFM, M(B)D...21-300(B)

MBD300E

- Unequipped module, prepared for size 00- up to NH3 fuse switch disconnector + EFM 160 A - 630 A, of the following brand: ABB
- ZHBM, 350 mm Depth
- Busbar centre spacing 185 mm
- For 3-pole horizontal busbars
- With busbar holder type ZX522
- Depth mounting breaket ZW481
- Cover without cut-out
- Rated current (In) max. 850 A
- Devices, see below / Katalogue ABB S

Subdistribution boards

Modular distribution panel system CombiLine N,
Busbar system 185 mm for fuse switch disconnectors, M(B)L...5

ML35

- Unequipped for switch disconnector fuse sizes 00 up to 3, 160 A up to 630 A
- For the make: ABB SlimLine XR and Jean Müller Sasil
- Busbar centre spacing 185 mm
- For 3-pole horizontal busbars, see below
- With busbar holder (ZX523)
- Cover without cut-out
- Rated current (In) max. 850 A
- **Important:** Plan connection space or empty module and when assembling fuse switch disconnectors behind the lock system consider the cabinet depth
- Leading edge device to the cover 138 mm
- The mounting frame must be ordered separately
- Not suitable for fire protection enclosures

Planning notes: Consider the cabinet depth, Spacing between meter plate and door for:
TwinLine-G, 225 mm, depth = 126.5 - 139 mm, TwinLine-L, depth mm = 141.5 - 154 mm, TwinLine-W, 350 mm depth = 168 - 180.5 mm
C-cabinets, 260 mm depth = 141.5 mm, W-, WS-, WSO-cabinets, 360 mm depth = 172 mm
TriLine®,, 325 mm depth = 148 mm, TriLine®, 425 mm depth = 198 mm
Important: Plan at least one module with a width of 250 mm above and below meter plate modules.

Module combinations for busbars TwinLine cabinet to cabinet connections

Busbars for connecting TwinLine cabinets may be connected in different assembly positions of the CombiLine modules.
Depending on the position of the busbar holder, some modules may be connected in front of or behind the mounting frame; e.g. if one N/PE busbar module is required on top of the cabinet and one busbar module at the bottom of the cabinet, the combination options for the different modules must be taken into account. The different configuration options for the installation positions (1 / 0 / -1) are presented on the next page.

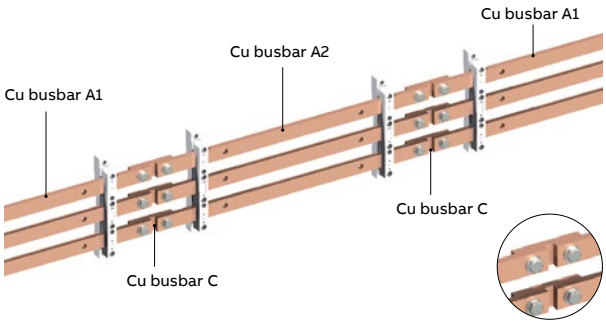
Busbars for the TriLine® cabinet connection in the module M(B)S... 27



- Using continuous busbars, it is possible to combine different module widths within a single cabinet.
- One connector is required per busbar connection for the cabinet connection
- The busbar connection is realized outside the module
- Busbar connector including captive nuts and fastening material
- Three Cu busbars A1/A2 and C are required per module

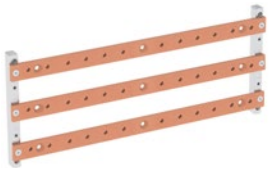
Busbars for the TriLine® cabinet connection for M(B)D...52(B)



ZXM1215

- Busbars for single cabinets
- With the WR mounting frame the busbars cannot be connected through from one module to the next
- With the EDF mounting frame (see information on the PW) defined combinations are possible within the cabinet
- Size 00 fuse switch disconnectors are directly mounted to Cu busbars prepared with captive nuts and to this end the busbar holders are fixed to the front position of the bracket
- 3 Cu busbars are required per module

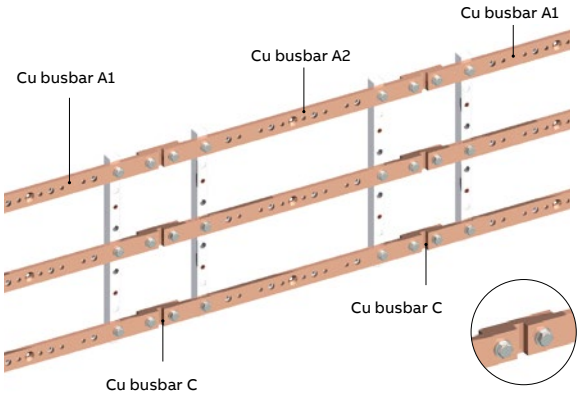
Modular distribution panel system CombiLine N, Busbars for the TriLine® and System pro E power cabinet connection for M(B)D...21-300(B)



- Using continuous busbars, it is possible to combine different module widths within a single cabinet.
- To assemble size 00 fuse switch disconnectors, the busbars A1 and A2 are equipped with captive nuts
- One connector is required per busbar connection for the cabinet connection
- The busbar connection is realized outside the module
- Busbar connector including captive nuts and fastening material
- Three Cu busbars A1/A2 and C are required per module

Subdistribution boards

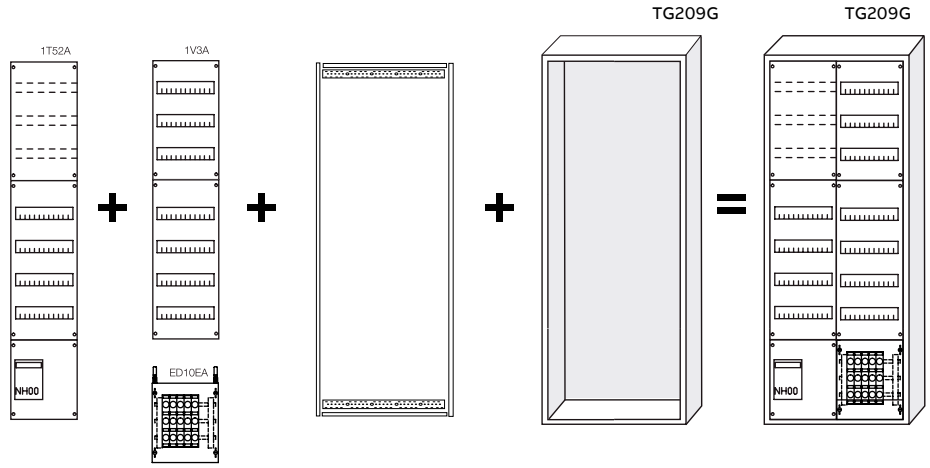
Distribution panel system with distribution board panels / combination sets.
Options for wall-mounting and floor-standing cabinets

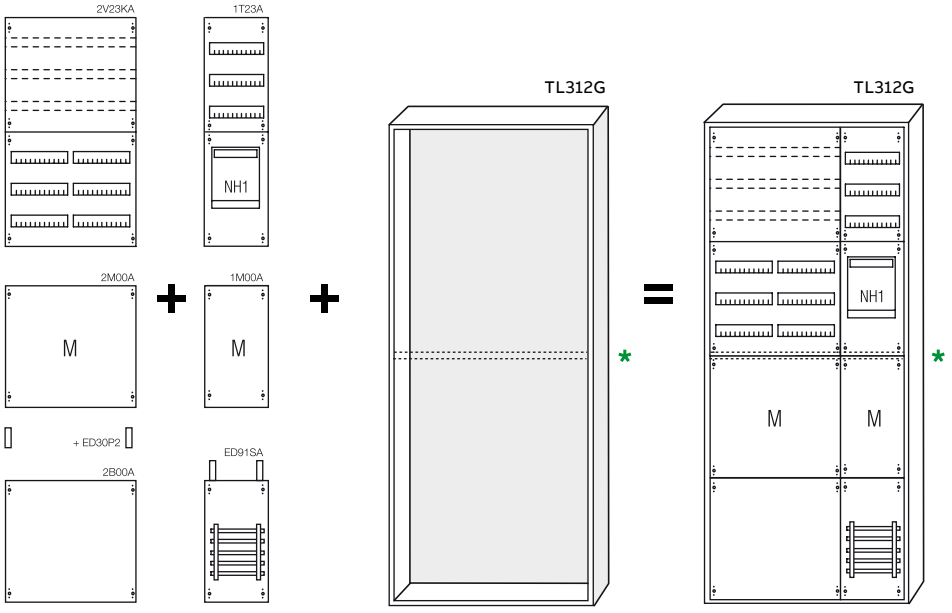
Wall-mounting cabinets U, A, B and W, TwinLine-G, TwinLine-L and TwinLine-W
Example: Configuration with distribution panels/combination sets in TwinLine-G wall-mounting cabinet



Distribution board panel
+ Distribution board panel and combination set
+ EDF installation set
+ empty cabinet
= wall mounted distribution board and combination set

Supply format
EDF installation set, distribution board panels, combination sets (preassembled on EDF profile in the factory) and empty cabinet each supplied as individually packaged units.

TwinLine-H and TwinLine G, L, W switchgear cabinets TriLine® / SF fire protection enclosures
Example: Configuration with distribution panels/combination sets in TwinLine-L wall-mounting cabinet



+ Module-to-module connection ED30P2

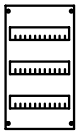
Distribution board panels
+ combination sets
+ panel connectors
+ empty cabinet
= floor-standing distribution board

Supply format
distribution board panels, combination sets (preassembled on EDF profile in the factory), panel connectors and empty cabinet each supplied as individually packaged units.

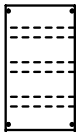
***** The EDF mounting frame must not exceed a total height of 1,350 mm (OH 5). This is why, for design reasons, floor-standing cabinets (prepared for EDF mounting frame) come with a centre support rail installed. This centre rail can be repositioned up or down in grid steps of 150 mm.

Subdistribution boards

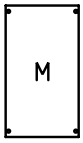
Distribution panel system with distribution board panels
Equipping of distribution panels



Panels for DIN rail mounting devices
Configuration: DIN rail 35 x 15 mm for device installation and with special square holes for the wiring system. DIN rail spacing 125 mm. Plastic covers. Slots for DIN rail mounting devices according to DIN 43880 for 12 devices (216 mm) per panel width.



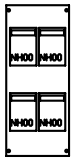
Panels for DIN rail mounting terminals
Configuration: DIN rail 35 x 15 mm for DIN rail mounting terminals, with special square holes for the wiring system. DIN rail spacing 125 mm. Plastic covers. Use ZK90P2 insulating pieces in order to fit DIN rails with double insulation. Use the deep-mounting brackets ED33P2 in order to fit the DIN rails in a recessed position.



Panels with mounting plates
Configuration: ST1203 surface sendzimir-galvanised 2 mm sheet steel mounting plate. The mounting plate is mounted to deep-mounting brackets allowing stepless depth adjustment. Maximum space between the mounting plate and cover is 143 mm (consider cabinet depth), plastic covers.

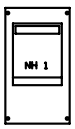
Panels with mounting cross members for drill-free mounting of devices
Configuration: Per 150 mm one mounting plate is mounted to deep-mounting brackets and its depth is steplessly adjustable. Maximum installation depth between mounting plate and cover is 143 mm (consider cabinet depth), plastic covers.

Panels as touch guard (or for custom assembly)
Configuration: Empty panel without installation parts, plastic covers (closed covers)

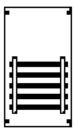


Panels for fuse switch disconnectors size 00 (160 A)*
Configuration: Cross member for disconnector mounting, Universal mounting with sliding nuts for adapting to different fastening positions (M6 threads), plastic covers. Covers with cut-outs for fuse switch disconnectors tailored to match trim dimensions (without disconnector)

*Not suitable for fire protection enclosures



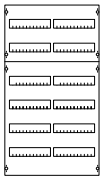
Panels for fuse switch disconnectors size 1 (250 A)*
Configuration: Cross member for disconnector mounting, Universal mounting with sliding nuts for adapting to different fastening positions (M8 threads), plastic covers. Covers with cut-outs for fuse switch disconnectors tailored to match trim dimensions (without disconnector)



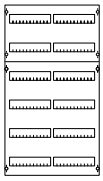
Panels with busbars
Configuration: 5 pole busbar system
Cu 12 x 5 mm, busbar spacing 40 mm, plastic cover (closed covers)

Enclosures

Distribution panel system – Distribution panels
DIN rail mounting devices



2V2A



2V2-150

- Extension with DIN rails 35 x 15 mm
- Distribution board panels or panel combinations must have the same height (Grid Units) as the cabinets in which they are to be installed.
- In floor-standing or switchgear cabinets, two panels or panel combinations must be installed above one another.
- Without N/PE Quick-terminals
- The EDF profile rails are included in the scope of delivery

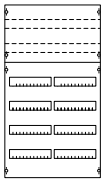
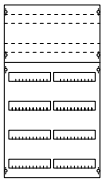
Distribution panel system – Distribution panels
DIN rail mounting devices with terminals



2V2KA



2V2K-150

- DIN rails fixed for terminals using ZK90P2 insulator
- DIN rails for terminals and for rail mounting devices 35 x 15 mm
- Distribution board panels or panel combinations must have the same height (Grid Units) as the cabinets in which they are to be installed.
- In floor-standing or switchgear cabinets, two panels or panel combinations must be installed above one another.
- Without N/PE Quick-terminals
- The EDF profile rails are included in the scope of delivery

The new flatpack and monobloc solution for wall-mounting and floor-standing cabinets

With the new TwinLine S system, ABB offers a tailored and proven concept of flatpack and monobloc wall-mounting and floor-standing cabinets.

This comprehensive product range includes two cabinet types TwinLine-G (depth of 225 mm) and TwinLine-L (depth of 275 mm) and provides a solution for every application. All cabinets are designed according to IEC 61439. The modular system is simple in planning, quick in assembly and safe in application.

A wide range of flange types provides the right solution for every application. All flanges are suited for all flange openings and knockouts of the complete TwinLine series. The flanges can be attached without the need of tools thanks to the handy push and lock technology.

All TwinLine cabinets can be connected side-by-side with connection set. All side walls are easily removable. Connection box can be stacked on top of floor standing cabinets. The plinth concept provides a safe transport in the workshop and on-site. The standard heights of 50 mm and 100 mm can be stacked and combined in order to fulfil installation needs. TwinLine offers unrestricted access during operation, expansion, maintenance and functional monitoring. With its 180-degree door opening and the door locking system, with the possibility to switch the door hinges from right to left it guarantees excellent flexibility.

The removable frame as standard gives the possibility to remove all covers in one handling and provides a quick assembly. With its wide range of the new modular distribution panel system, called CombiLine S, ABB offers the right solution for every application. The internal configuration system fits in all TwinLine S 55 cabinets. CombiLine S provides a time-saving installation due to hook-in technology and a simple closure system for covers with the ¼ turn quick-lock. With its new mounting concept for the CombiLine S system, TwinLine provides more flexibility and access for installation and wiring. There is also the option to have moun-ting plates in full cabinet size that can be adjusted in depth.

Product benefits

- Innovative flange technology
- Significantly more usable area for cable entry
- All flanges are compatible with all flange openings and knockouts within the entire TwinLine system
- Side walls can be easily removed
- Flexible internal configuration with CombiLine S modules
- Optimal accessibility and ease of installation thanks to 180 degree door opening angle
- Time-saving plinth assembly and safe transport
- Simplified accessories concept for reduced inventory levels
- Speedy and concise planning as well as calculations with the PDC software

Product benefits

The complete cabinet system in all sizes
The fully comprehensive product range of modular wall-mounting and floor-standing cabinets includes the types TwinLine-G (depth of 225 mm) and TwinLine-L (depth of 275 mm) and provides a solution for every application. All cabinets are designed according to IEC 61439. The modular system is simple in planning, quick in assembly and safe in application.

Innovative cable entry
A wide range of flange types provides the right solution for every application. All flanges are suited for all flange openings and knockouts of the complete TwinLine cabinets. The flanges can be attached without the need of tools thanks to the handy push and lock technology.

Simple connection in series of all cabinets
All TwinLine cabinets can be connected in both, horizontally and vertically directions. Uprights for side-by-side positioning and connection sets for stacking the cabinets can be easily installed.

Time-saving plinth installation and safe transport
The new plinth concept provides a safe transport in the workshop and on-site. The plinth contains knockouts and has the possibility to install wiring ducts for cable support. The standard heights of 50 mm and 100 mm can be stacked and combined in order to fulfil installation needs.

Optimal accessibility and ease of installation
TwinLine offers unrestricted access during operation, expansion, maintenance and functional monitoring. With its 180-degree door opening and the door locking system, with the possibility to switch the door hinges from right to left it guarantees excellent flexibility.

Removable frame for CombiLine S covers
With its wide range of the new modular distribution panel system, called CombiLine S, ABB offers the right solution for every application. The removable frame as standard gives the possibility to remove all covers in one handling and provides a quick assembly.

Flexibility in the assembling of internal configuration
With its new mounting concept for the CombiLine S system, TwinLine provides more flexibility and access for installation and wiring also outside of the cabinet. There is also the option to have continuous mounting plates that can be adjusted in depth.

The right internal configuration for every type of application
The wide range of the internal configuration system CombiLine S fits in all TwinLine S 43 cabinets. CombiLine S provides a time-saving installation due to hook-in technology and a simple closure system for covers with the ¼ turn quick-lock.

TwinLine S 43

Innovative cable entry

The usable cable entry area is one of largest cable entries available on the market. A wide range of flange types provides the right solution for every application. All flanges are suited for all flange openings and knockouts of the complete TwinLine cabinets. The flanges can be attached without the need of tools thanks to the handy push and lock technology.

- All flanges are compatible with all flange openings and knockouts within the entire TwinLine system
- Wide range of new flanges
- Tool-free flange installation thanks to push and lock technology

Membrane flange
- 2-component flange with integrated seal, material: plastic
- Tool-free installation thanks to push and lock technology
- Optimal cable entry by a combination of hard and soft components
- Additional fixing and centring

Flange for M screw fittings
- 2-component flange with integrated seal, material: plastic
- Tool-free installation thanks to push and lock technology
- With two different hole patterns

Flange with cable sleeves
- 2-component flange with integrated seal, material: plastic
- Tool-free installation thanks to push and lock technology

Closing flange
- 2-component flange with integrated seal, material: plastic
- Tool-free installation thanks to push and lock technology
- Can be used as closing flange or for customization, e.g. for cable sleeves or screw fittings

Closing flange
- With foam seal around perimeter, material: sheet steel 2 mm
- Continuous protective earth connection via flange fastener
- Can be used as closing flange or for customization, e.g. for cable sleeves or screw fittings

The complete cabinet system ...

With the new TwinLine S 55 system, ABB offers a tailored and future-proof concept of welded wall-mounting and floor-standing cabinets.

This fully comprehensive product range includes two cabinet types TwinLine-G (depth of 225 mm) and TwinLine-L (depth of 275 mm) and provides a solution for every application. The system guarantees high flexibility due to removable side walls.

All cabinets are designed according to IEC 61439. The modular system is simple in planning, quick in assembly and safe in application. Highlights such as the innovative flange technology, optimal accessibility, ease of cabinet connection, the modular plinth concept and a flexible assembly of the new internal configuration, guarantee a modern energy distribution.

Product benefits

Innovative cable entry and ease of installation

See page 8

01

A wide range of flange types provides the right solution for every application. All flanges are suited for all flange openings and knockouts of the complete TwinLine cabinets. The flanges can be attached without the need of tools thanks to the handy push and lock technology. TwinLine offers unrestricted access during operation, expansion, maintenance and functional monitoring. With its 180-degree door opening and the door locking system, with the possibility to switch the door hinges from right to left it guarantees excellent flexibility.

Simple connection in series of all cabinets

See page 12

02

All TwinLine cabinets can be connected horizontally, floor-standing enclosures can also be connected in vertical directions. Connection sets for side-by-side positioning and stacking the cabinets can be easily installed.

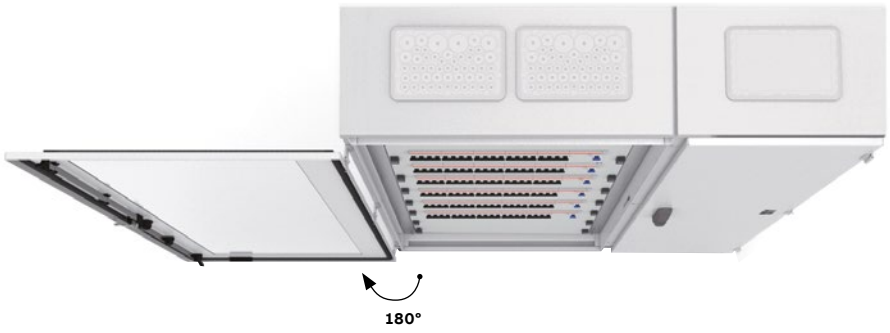
Time-saving plinth assembly and safe transport

See page 13

03

The new plinth concept provides a safe transport in the workshop and on-site. The plinth contains knockouts and has the possibility to install wiring ducts for cable support. The standard heights of 50 mm and 100 mm can be stacked and combined in order to fulfil installation needs.

01



02

03

The right internal configuration for every type of application

See page 13

—
04

The wide range of the internal configuration system CombiLine S fits in all TwinLine S 55 cabinets. CombiLine S provides a time-saving installation due to hook-in technology and a simple closure system for covers with the ¼ turn quick-lock.

Removable frame for CombiLine S covers

See page 14

—
05

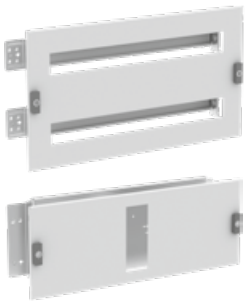
With its wide range of the new modular distribution panel system, called CombiLine S, ABB offers the right solution for every application. The removable frame as standard gives the possibility to remove all covers in one handling and provides a quick assembly.

Flexibility in the assembling of internal configuration

See page 15

—
06

With its new mounting concept for the CombiLine S system, TwinLine provides more flexibility and access for installation and wiring also outside of the cabinet. There is also the option to have mounting plates that can be adjusted in depth.



—

Innovative cable entry

The usable cable entry area is one of largest cable entries available on the market. A wide range of flange types provides the right solution for every application.

All flanges are suited for all flange openings and knockouts of the complete TwinLine cabinets. The flanges can be attached without the need of tools thanks to the handy push and lock technology.

- All flanges are compatible with all flange openings and
- Knockouts within the entire TwinLine system
- Wide range of flanges
- Tool-free flange installation thanks to push and lock technology

01
Membrane flange
– 2-component flange with integrated seal, material: plastic
– Tool-free installation thanks to push and lock technology
– Optimal cable entry by a combination of hard and soft components Additional fixing and centring

02
Flange for M screw fittings
– 2-component flange with integrated seal, material: plastic
– Tool-free installation thanks to push and lock technology
– With two different hole patterns

03
Flange with cable sleeves
– 2-component flange with integrated seal, material: plastic
– Tool-free installation thanks to push and lock technology

04
Closing flange - plastic
– 2-component flange with integrated seal, material: plastic
– Tool-free installation thanks to push and lock technology
– Can be used as closing flange or for customization, e.g. for cable sleeves or screw fittings

05
Closing flange - sheet steel
– With foam seal around perimeter, material: sheet steel 2 mm
– Continuous protective earth connection via flange fastener
– Can be used as closing flange or for customization, e.g. for cable sleeves or screw fittings

Time-saving plinth assembly and safe transport

The innovate cabinet plinth literally forms the foundation of the TwinLine floor-standing cabinets while providing the perfect answer to the requests from the field for greater ease of installation.

The plinth consists of four parts: the already connected corner with side parts and the front and back trim covers. Removing the front and back trim covers makes transport more secure. You want to connect a cabinet in series? Not a problem with this cabinet plinth, since cable ducts and M-screw fittings can be fed through knock-outs in the side parts. To ease cross wiring it is also possible to integrate cable ducts. The plinths are available in heights of 50 and 100 mm and can be stacked or combined.

Plinth with 50 and 100 mm height
- Innovative cabinet plinth for easy installation
- Up to three plinths can be “stacked” on top of each other (no additional accessories needed)
- The plinths of 50 and 100 mm height can be combined

Plinth with 100 mm height
- Optimal feed-through of cables using the side knockouts for cable ducts or cable screw fittings
- Quick cable duct installation in the plinth

plinth assembly

Flexibility in assembly

This series of cabinets also offers impressive accessibility with their 180-degree door opening angle. The removable frame for covers enables optimum access during operation, maintenance and function monitoring.

- The door opening angle is 180 degrees for both, individual cabinets and cabinets connected in series
- The innovative locking system is easy to install and allows you to quickly modify the door hinge
- Removable frame as standard makes it possible to remove all covers in one handling
- Significantly reduced installation time

01

Doors with 180 degree opening angle
TwinLine offers unrestricted access during operation, expansion, maintenance and functional monitoring. With its 180 degree door opening and the door locking system, with the possibility to switch the door hinges from right to left it guarantees excellent flexibility.

02

Removable frame for CombiLine S covers
With its wide range of the new modular distribution panel system, called CombiLine S, ABB offers the right solution for every application. The removable frame as standard gives the possibility to remove all covers in one handling and provides a quick assembly.

Flexibility in the assembly of the internal configuration. With its new mounting concept for the CombiLine S system TwinLine provides more flexibility and access for installation and wiring.

03

Depending on the customers requirements there are two options to install and wire the internal configuration:
- Outside of the cabinet to have access from all sides
- Placed horizontally on two trestles to do the assembling and wiring inside the cabinet

There is also the option to have mounting plates in full cabinet size that can be adjusted in depth.

Technical specifications and product features

Technical specifications for TwinLine S 55	
Standards / requirements	IEC 61439 -1/-2/-3*
Protection class	I, earthed, in combination with CAEC6
Degree of protection	IP55
	Without door IP30
Mechanical impact	Strength IK 08 for the cabinet enclosure
	IK 07 in the area of the flange knockouts
	IK 07 for transparent doors
	IK 08 for sheet steel doors
Conditions of installation	Indoor installation
	Ambient air temperature max. + 40°C
	Ambient air temperature min. - 5°C
	Operating temperature max. + 55°C
	Storage temperature max. + 55°C
	Storage temperature min. - 40°C

Product features	
Housing and door	Sheet steel, RAL 7035, powder-coated
	Door opening angle: 180 degrees
	Doors with espagnolette closure
	Doors for wall-mounting cabinets: with latch plate and 3 mm double bit pin
	Doors for floor-standing cabinets: with swivel handle and 3 mm double bit pin
Assembly options	Prepared to be fitted with CombiLine S modules and mounting plates
Forms of delivery	Build-up cabinets out of sets

* Powerloss determinated by calculation with the method of IEC 60890 in accordance with IEC 61439-1 par. 10.10.4
The required values of the powerloss capacity are specified in tables from page 27.

Installation set with removable frame						
For internal configuration in 300 mm, 600 mm, 800 mm wide cabinets. Rear profile (from ESIN…) for assembling the CombiLine S distribution panel, for example in the external cable container. The installation set is needed to assemble the CombiLine S distribution panel. It consists of two rear profiles (ESAN…). The removable frame consists of two front profiles needed to assemble the covers.	400		1	ESIN0004	2CPX078420R9999

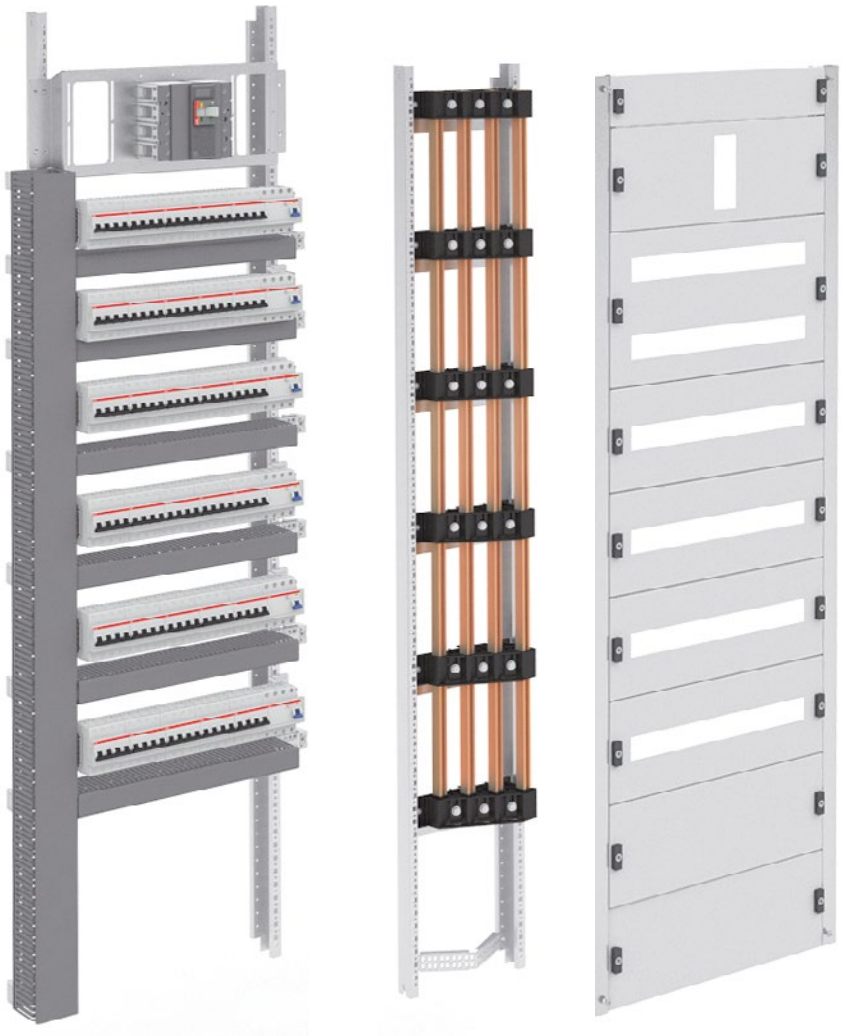
System pro E combi

CombiLine S distribution panel system

—

Simple in planning
Quick in assembly
Safe in application



The highly sophisticated quick mounting system from ABB makes the completion of modular cabinets with distribution panels an effortless process. Simple, quick and safe – these are the three attributes of this system that speak for themselves.

TwinLine makes internal configuration fun, with a modular system of wall-mounting and floor-standing cabinets for the modular CombiLine S distribution panel system. The wide range of the CombiLine S offers the right solution for every application. One internal configuration System for all cabinets.

All of the individual parts required for assembling are packed separately and supplied in the form of a set.

The benefits: These sets allow you to take a flexible approach towards stock keeping, and avoid a time-consuming search for system parts such as brackets, screws or fastening elements. The instructions supplied with the system make assembly a child's play. Quick and clear planning and calculation become perfect with planning software.

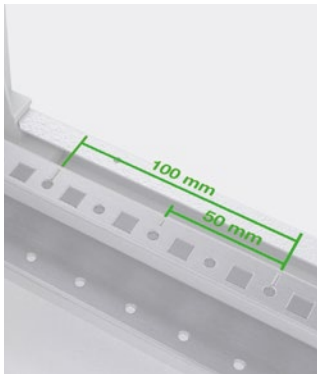
Subdistribution boards

CombiLine S distribution panel system

Product benefits

One internal configuration system for all cabinets
All internal configuration and the busbar system for the cable containers up to 400 A fits in both cabinet dephts. The internal configuration up to 800 A and the busbar system behind the device area also fits in a 275 mm cabinet depht.

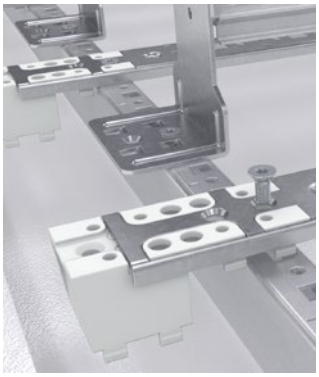
Flexible in assembling
With its new mounting concept CombiLine S provides more flexibility and access for installation and wiring. Placed horizontally on two trestles, the assembly and wiring is very comfortable. An other option is to swing-out the whole internal configuration to have access from all sides.

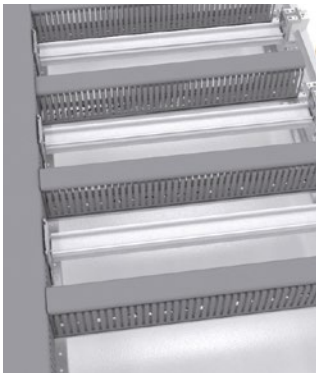


Assembly of internal configuration
CombiLine S provide a time-saving installation due the hook-in technology. This quick assembly limits the numbers of screws. Markers in 50 mm grid are on the mounting profiles for simple positioning.

Easy handling of covers
Time-saving fixation and adjustment as well as the simple closure system with 1/4 turn quick-lock provides easy handling of the covers and standard earth connection. When using devices in the covers a safe earth connection is guaranteed through 6 mm² cable with ring shoes on both sides. Optimal accessibility give the hinge set with 90 degree opening angle.

Optimal accessibility and ease of installation
The removable frame as standard gives the possibility to remove all covers in one handling and provides a quick access.





Wiring system
One support for different dimensions of wiring ducts; to have the same level for horizontal and vertical usage. An additional profile for stabilization of wiring duct and for mounting wire holders is available.

Form of internal separation up to form 2b
For the busbar sytem behind the device area is a horizontal transparent partition available. To separate the busbar system in external cable container it is possible to use a vertical separation.

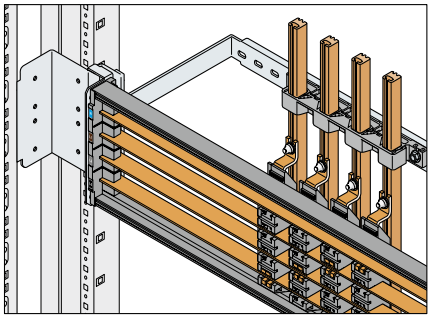
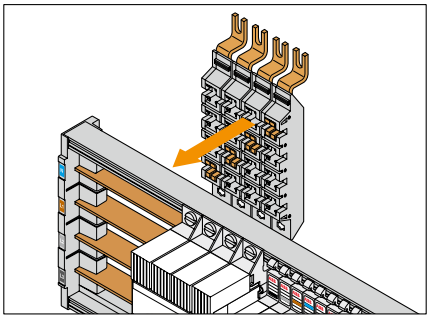
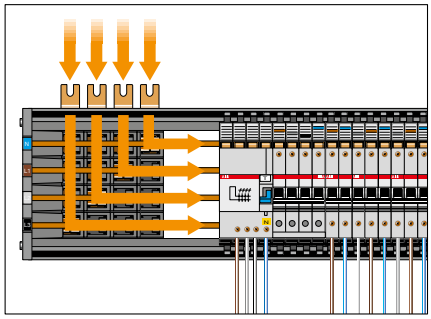
CombiLine S distribution system Unifix, overview



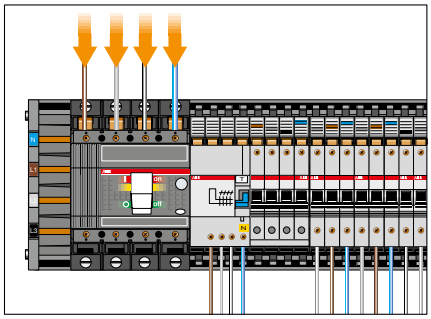
Direct connection with the 400/800 A system of busbars with shaped section.



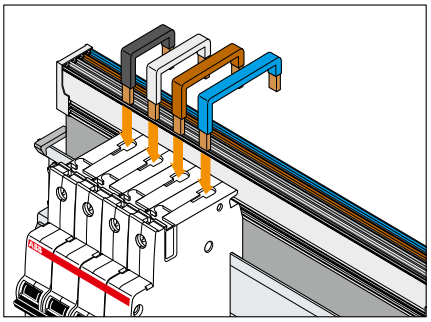
Feeder module for 400 A frame (L1-L2-L3-N).



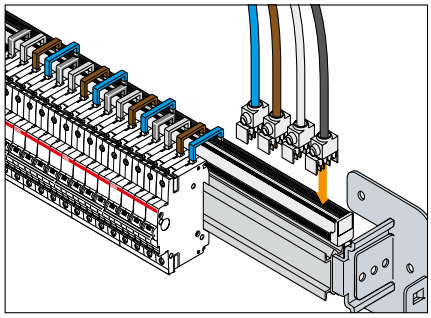
Direct power supply of the bases by means of feeder module ED2209.



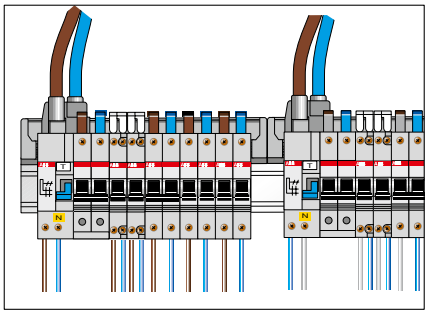
Power supply by means of general row circuit-breaker.



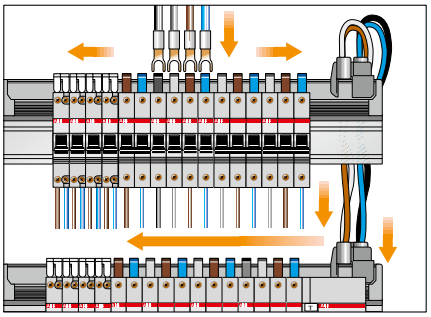
Connections (L1-L2-L3-N) for System pro M modular apparatus.



Power supply of the busbar with 100 A feeder module without cable. Terminal capacity 35mm2.



Direct power supply of the busbars by means of feeder module.



Power supply by means of modules and cables in parallel.

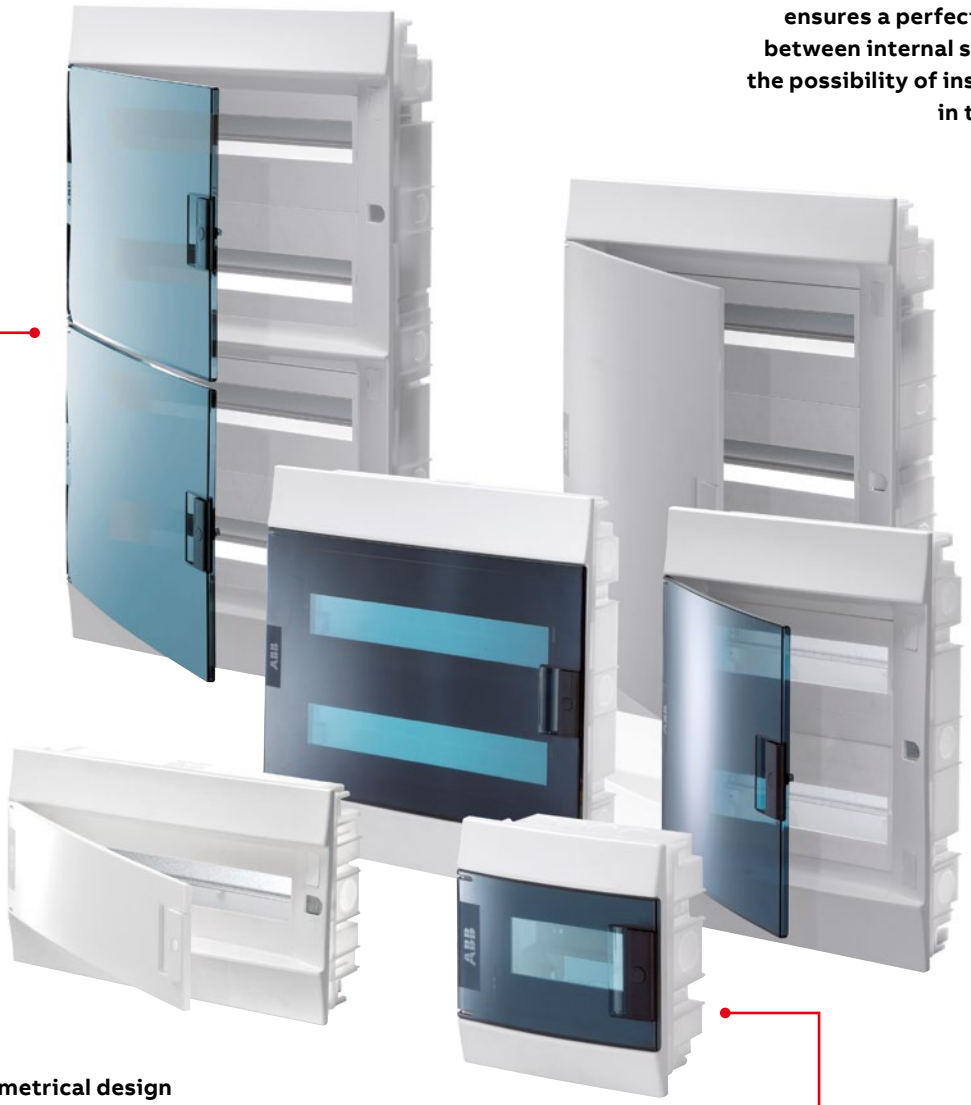
System pro E comfort MISTRAL41F
Endless installation possibilities

Reliable technology combined with a modern decorative look in a compact, elegant design.

Door opens up to 180° allowing full access to the interior of the unit.

In the flush-mounted version the depth of the base box ensures a perfect balance between internal space and the possibility of installation in thin walls



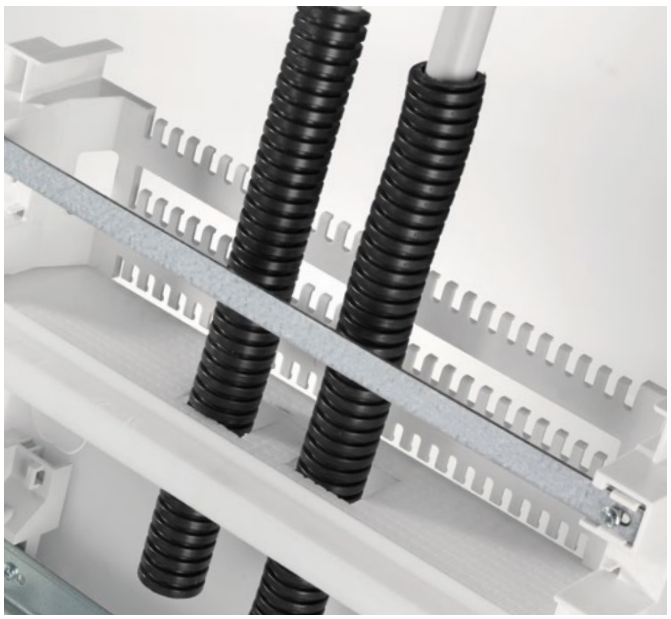
The symmetrical design allows opening of the reversible door either from the left or from the right.

Door available in two versions: petrol blue and opaque.

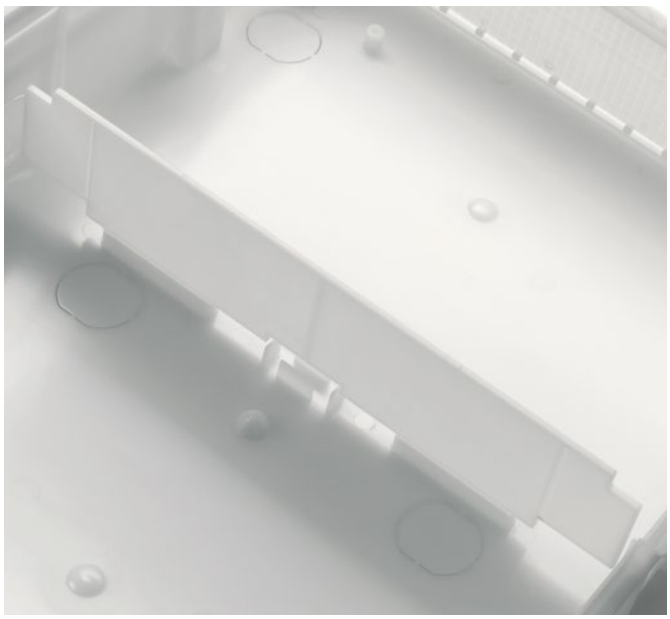
Endless installation possibilities

Horizontal coupling
The consumer units can be coupled side by side with the horizontal junction unit accessory, protecting the passage of cables between adjacent units.

Mortar guard
All versions include a mortar guard that prevents mortar sprays inside the consumer unit.



Dual-function accessory
A single accessory performs a dual function. It can be used to fix pipes to the unit's housing or to vertically couple two consumer units.

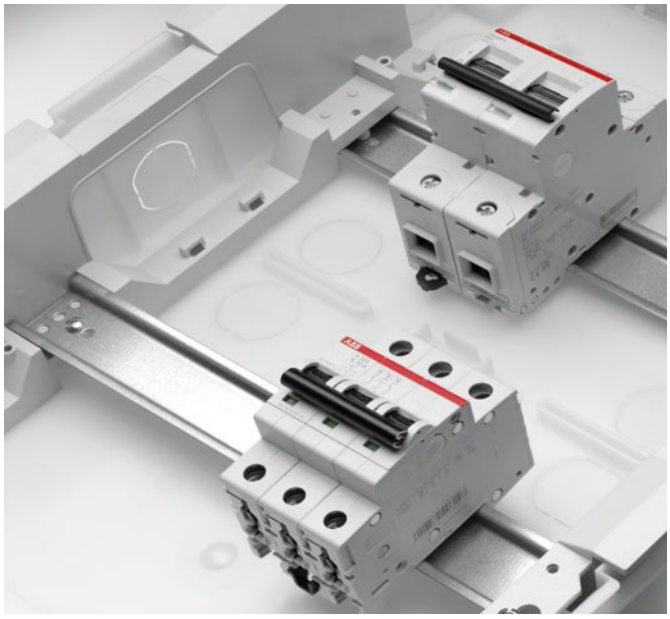


Internal partition
The horizontal partition allows the interior of the unit to be divided into two parts.

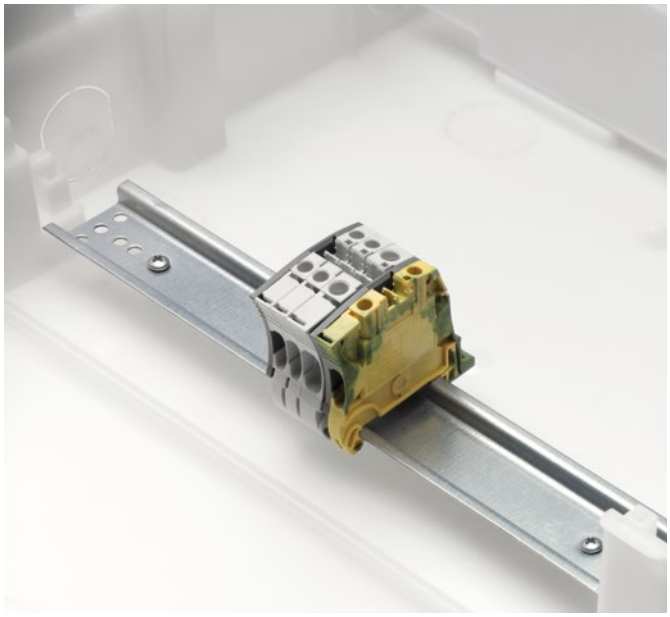
Endless installation possibilities

Flanges
The flange with multi pre-cuts is designed to be sheared only where necessary in order to ensure a more secure fastening. The removable flange with knockout holes ensure a reliable and safe placing of flexible pipes and other conduits, especially in plasterboard installation.

Two DIN rail positions
The extraxtable frame offers two DIN rail positions so devices of different depths, like S200 or S800 miniature circuit breakers, can be installed in perfect alignment.



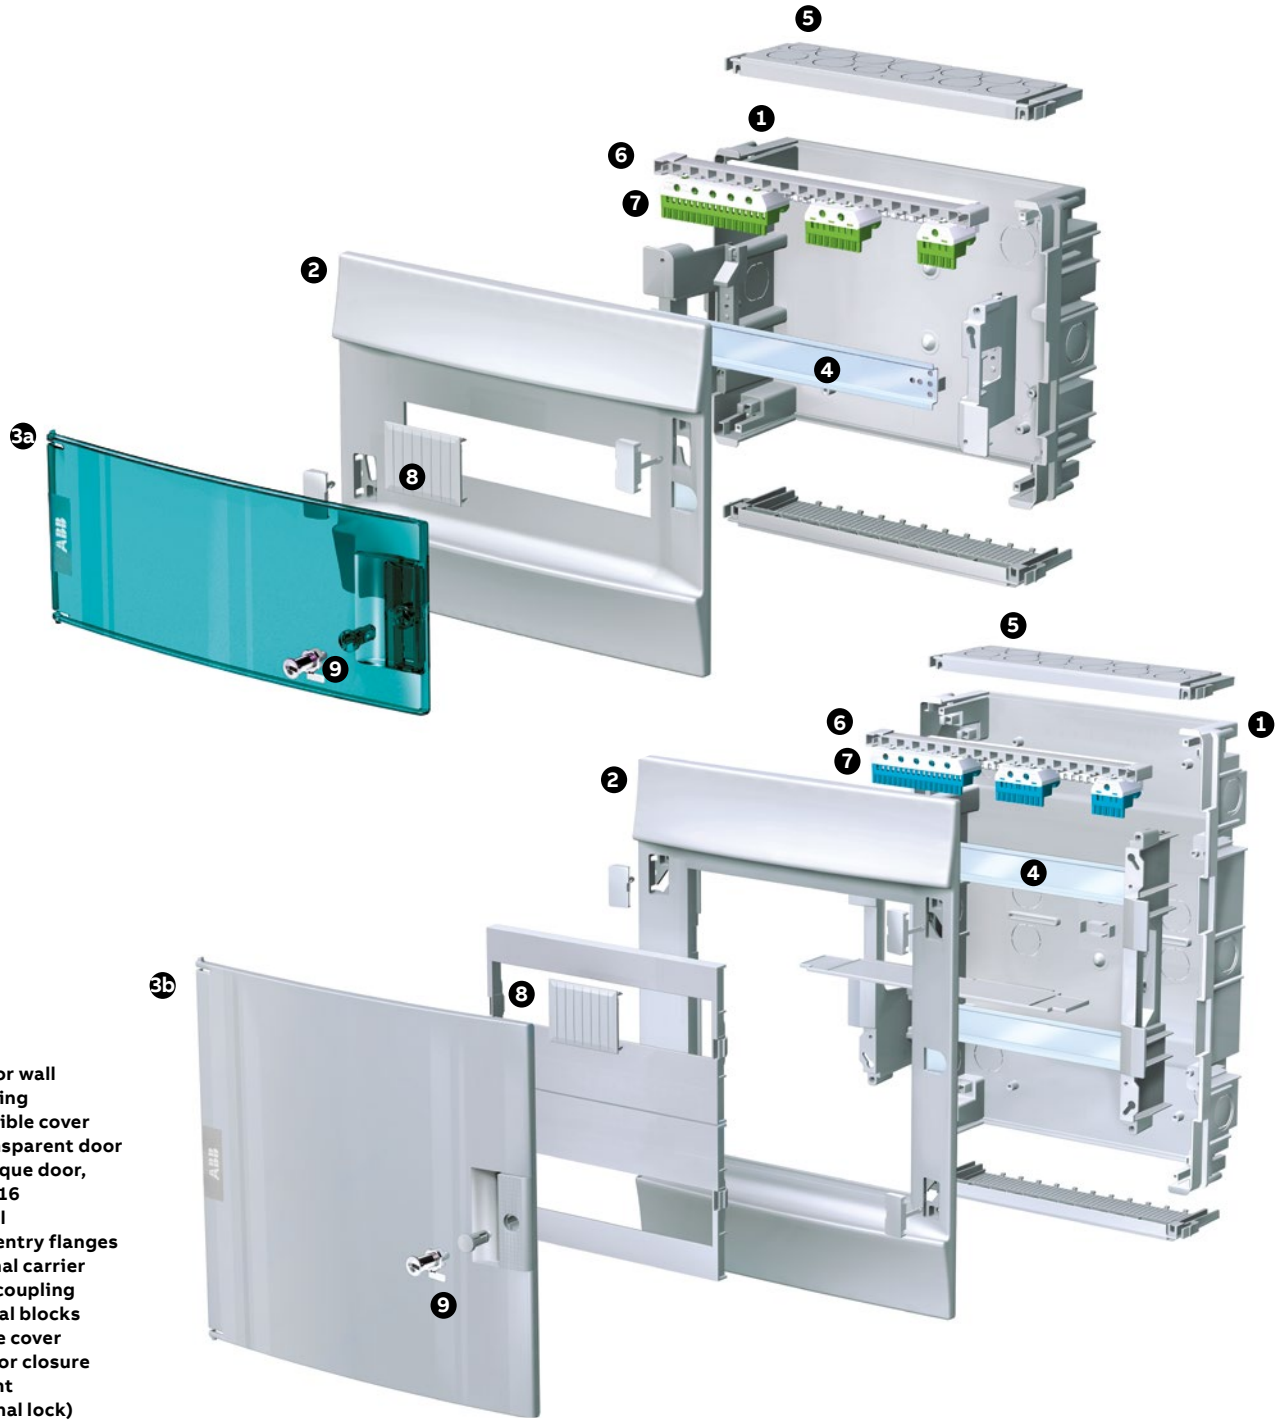
Captive screw covers
Screw covers are hooked to the front panel so they can be removed without the risk of losing them.



DIN rail terminals
It is possible to install an extra DIN rail at the bottom of the consumer unit.

A versatile range suitable for every application

The simple construction of the MISTRAL41F series makes the units fast and easy to assemble. What is more, the flexible design allows easy adaptation to various application requirements.

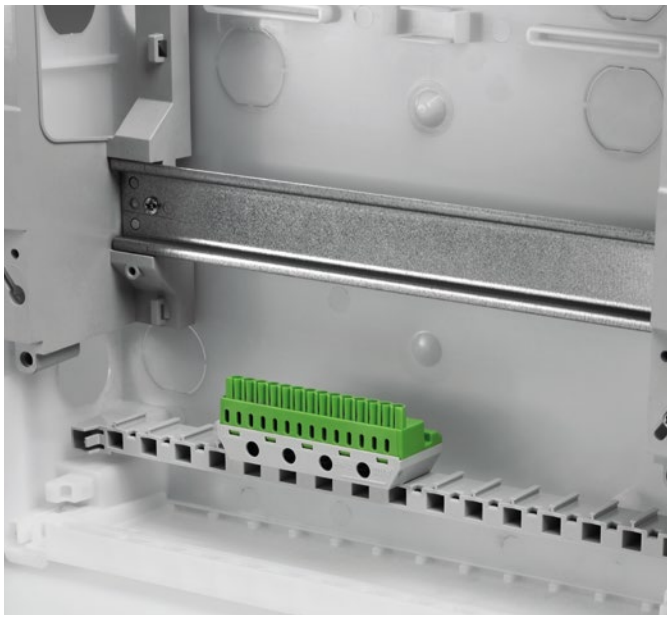


1. Base for wall mounting
2. Reversible cover
3. a) Transparent door
   b) Opaque door, RAL9016
4. DIN rail
5. Cable entry flanges
6. Terminal carrier
7. Quick coupling terminal blocks
8. Module cover
9. Finish or closure element (optional lock)

A versatile range suitable for every application

Horiziontal levelling
The external adjustments of the front cover assure a perfect horizontal levelling even if the consumer unit is slightly crooked.

New generations terminals
The MISTRAL41 range of consumer units is supplied with a wide, completely new ABB terminal block range. Three different versions offer screw and spring fast coupling for easy and effective cabling up to 63A or 100A.



Hollow wall mounting
For the hollow wall mounting our consumer units provide a special enclosure and hollow mounting screws.

A smarter space for your installation ideas

MISTRAL41F

When it comes to flexibility, usability and design our Mistral41 consumer units can convince installers as well as end users in almost any kind of electrical distribution system in industrial, commercial or residential environments. A variety of innovative details make the MISTRAL41 series the perfect solution to realize all your installation ideas efficiently – now or in the future. Choose from a brick walll or hollow wall version to meet your individual needs. Learn more at **abb.com/lowvoltage**

IP 40 and IP 55 panel fronts

IP 40 panel fronts

Technical characteristics

- protection degree **IP 40**
- in **thermoplastic**, self-extinguishing and resistant to abnormal heat and fire up to 650 °C (glow wire flammability index) in compliance with IEC 60695-2-11 Standard
- available in **RAL 7035 grey**
- installation temperature from -25 °C to +60 °C
- resistant to heat: ball thermopressure up to +85 °C in compliance with EN 60695-10-2 Standard
- fronts are supplied with:
  - module covers
  - instruction sheet

IP 55 panel fronts

Technical characteristics

- protection degree **IP 55**
- available with transparent, smoky horizontally hinged door in the version with lock and lead-sealable spring
- door designed to take a lock with coded key code 12 865
- available in **RAL 7035 grey**
- in **thermoplastic**, self-extinguishing and resistant to abnormal heat and fire up to 650 °C (glow wire flammability index) in compliance with IEC 60695-2-11 Standard
- installation temperature from -25 °C to +60 °C
- resistant to heat: ball thermopressure up to +85 °C in compliance with EN 60695-10-2 Standard
- shock resistance 6 Joules
- fronts are supplied with:
  - module covers
  - instruction sheet

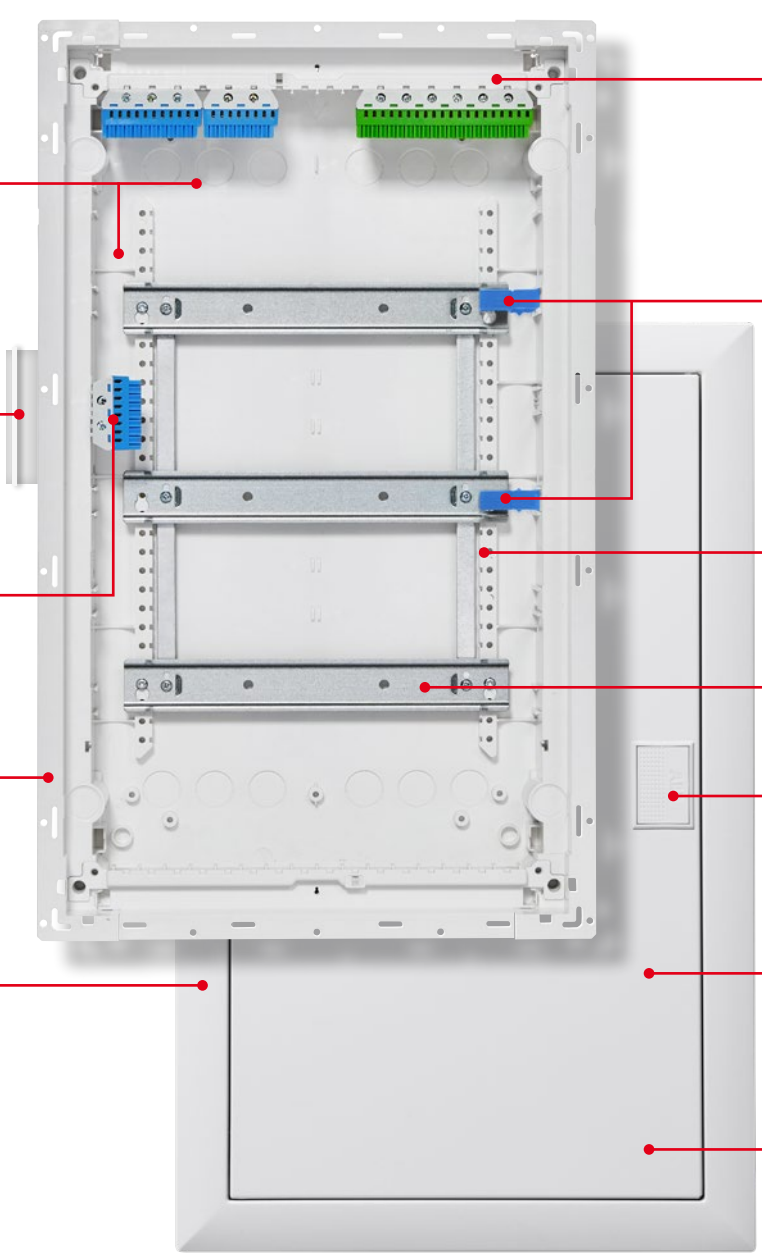
UK600 Flush-mounting Series
Consumer units



Up to 200 % extended connection space

Connection set for horizontal and vertical connection

Terminals can be mounted to the side, space-saving and flexible

Enclosure for flush- and hollow-wall-mounting

Flat trim frame, adjustable to uneven surfaces

Cable inlet with integrated terminal fixture, at the top and bottom

Wire holder for cable entry

Removable device support

Available in up to 5 rows

TIP-in-closure, possibility to insert a closure with lock

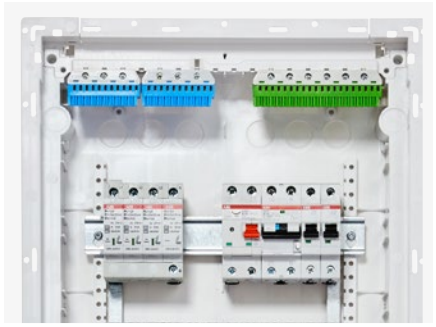
Tool-free reversible opening left / right

Door and frame available in different design variants

Snap-on cable inlet with integrated terminal fixture allows easy insertion of incoming and outgoing cables and uses a quick, single-hand-operated push and-stay design, resulting in 80 % more cable inlet space. Both cable inlets can be screwed tight when installation is complete.

The generous wiring space considerably facilitates installation works for up to 200 % more wiring space and “slide in” wire holder.

All enclosures of the UK600 series are suitable for hollow-wall installation. Upgrading is incredibly quick and simple – just as easy as the hollow wall installation itself. You just need the UZ91P4 hollow wall set for UK600. No screws, yet nothing can slip. Fastening it is as easy as fastening cable ties.



Time-saving installation thanks to intelligent plug-in technology. The N/PE terminals which are laterally assembled provide a high level of flexibility. There are also versions available with screw-type terminals.

An innovative connection set for horizontal and vertical connection of several combi enclosures enables flexible extension and combination options.

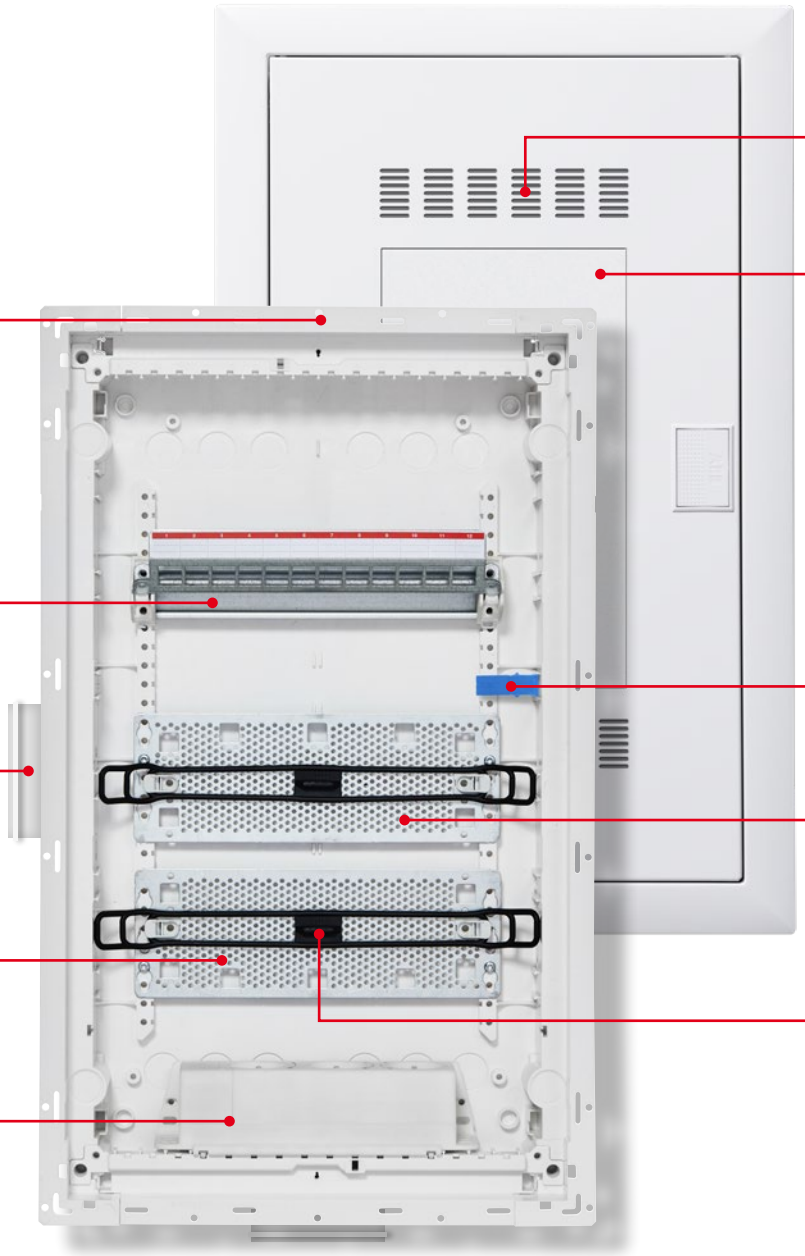
The stable, removable device support can be snapped in and is installed quickly without tools. Here too, a variety of common installation techniques have been catered for – the device support can also be fixed in position using screws.

The triple socket makes the connection of different power supplies very easy. it offers 120° swiveling and can be snapped onto cable inlet.

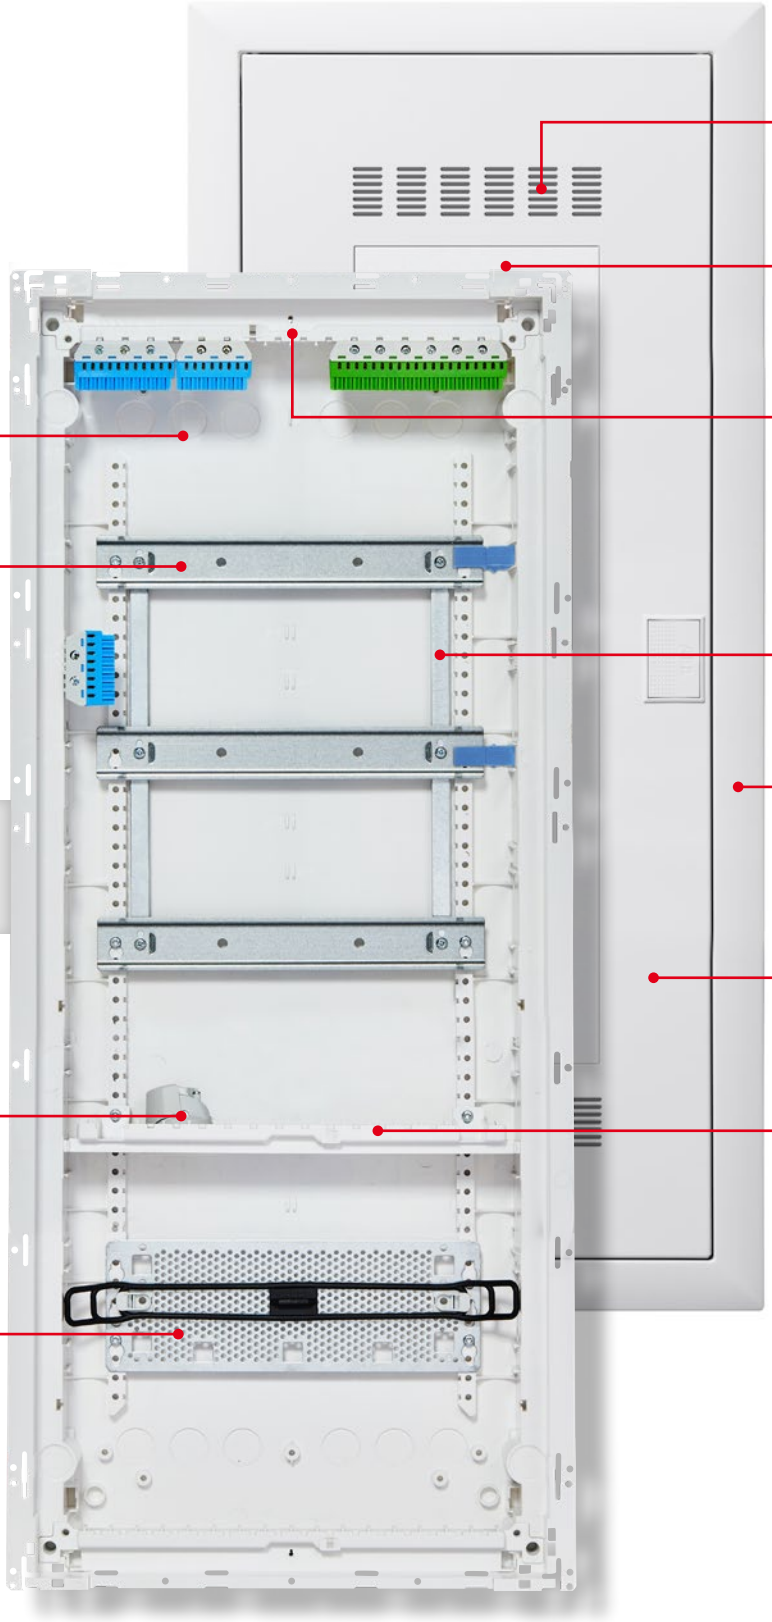
With the new media enclosure all conceivable devices such as routers or media modules find a safe space. The innovative combi enclosure combines the media and the consumer unit in one single cabinet, with a flexible partition separating the two parts from each other.

An attractive design feature – a perfect example of how easy it can be to combine functionality with design. The variety of high-quality doors and frame designs make the UK600 consumer units and media enclosures a design element in every living space. Media doors are available as Wifi-friendly and ventilated versions.

UK600 Flush-mounting Series
Media enclosures



UK600 Flush-mounting Series
Combi enclosures



Up to 200 % extended connection space

Combination of 3-row consumer unit and additional multimedia module available

Connection set for horizontal and vertical connection

Sockets may be integrated into partition, 90° swiveling

Removable modular perforated sheet steel mounting plates

Doors with ventilation holes

Wifi doors with plastic insert

Cable inlet with integrated terminal fixture, at the top and bottom

Wire holder for cable entry

Flat trim frame, adjustable to uneven surfaces

Tool-free reversible opening left / right

Partition for the separation of voltage levels

Flush-mounted consumer units – UK600, IP30 , ;*
I_n up to 63 A
Consumer units DIN EN 60670-24, DIN 43871
For building installation according to DIN 18015
Mechanical impact strength: IK07
Available in 1 up to 5 row versions as flush-mounted consumer units
Can be upgraded for surface-mounting or partially recessed mounting
Upgradeable for hollow-wall-mounting using UZ91P4
Wall box:
- non-warp, break-proof, non-flammable, low-halogen plastic
- with cable strain relief comb
- with detachable cable inlets
- combinable
Wall grips
Reversible opening (tool-free)
Communication channel for horizontal and vertical connection
Device support with removable DIN rail
With N/PE screw-terminals
Wire holder for professional cable entry
Cover with 90° quick-action screws, lead-sealable
45 mm slots for 12 devices, expandable to 14
Labelling system
Trim frame and sheet steel door, adjustable for uneven surface
Colour: White, RAL 9016

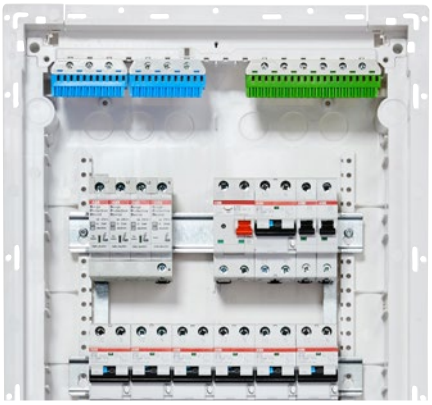
Consumer units

N/PE quick-terminals

Standardized, future-oriented and flexible

Configure based on your needs

The modularity and the extensive range of products allow customizing the products to the needs based on real-world use. Various quick-terminals can be combined on one quick carrier as necessary. If a larger N or PE terminal has to be used, simply connect two quick-terminals using the ZK10P10 connecting bridge.



Product benefits

- Flexible terminal system for several N potentials: Screw connections: 2.5 to 25 mm² for rigid conductors; for flexible conductors up to 25 mm² (wire end sleeves required)
- Spring connection: 1.5 to 4 mm² for rigid conductors; for flexible conductors up to 25 mm² (wire end sleeves required)
- Optimal when using several residual current circuit breakers
- Ease of expansion using connecting bridges
- Precise assignment of the terminals by clear colour coding: N = blue, PE = yellow-green
- Easy labelling of the terminals using pre-printed, self-adhesive number strips
- Wide range of applications: may be used in the UK600 and MISTRAL65 consumer unit series, in all compact distribution boards, and with all meter cabinets, wall-mounting and floor-standing cabinets

Media enclosure UK600

With and without trim frame and door

Flush-mounted consumer units – UK600, IP30 - , ; *
Consumer units UK600 as multimedia version,
dimensions according to the standard enclosures as per DIN 43871
Mechanical impact strength: IK07
Available in 2 up to 5 row versions as flush-mounted consumer units
Can be upgraded for surface-mounting or partially recessed mounting
Upgradeable for hollow-wall-mounting using UZ91P4
Wall box:
- non-warp, break-proof, non-flammable, low-halogen plastic
- with cable strain relief comb
- with detachable cable inlets
- combinable
Reversible opening (tool-free)
Communication channel for horizontal and vertical connection
With removable DIN rail in the top row
Patch panel in isolated design for up to 12 keystone modules
Modular perforated sheet steel mounting plate for devices
Simple and tool-free installation of the devices using the "device strap"
120° swiveling triple socket for the power supply of built-in devices
Wire holder for professional cable organization
With trim frame and sheet steel doors as sheet steel door with white plastic insert, for improved Wifi signals or as basic option without trim frame and door

*in connection with hollow-wall-mounting set UZ91P4

System Pro E comfort Mini EUROPA40
Wall-mounting covers without door IP40

Available in white and grey and three different sizes to accommodate 2 to 6 modules.

The particularly robust and shock resistant frame ensures complete protection of the equipment installed.

The range is manufactured in accordance with the IEC 60670-24 standard.

Each cover is equipped with a DIN bar.

This consumer unit without door reachs IP40.

The upper and lower walls include precuts on the internal side for the passing through of wiring trunking.

These covers can be opened from the front side to ensure easier access during installation.

Technical characteristics

Protection degree: IP40.
Colour: RAL 9016 red and RAL 7035 grey.
Material: manufactured in self-extinguishing thermoplastic resistant to abnormal heat and to fire up to 650°C (glow wire test), according to IEC 60695-2-11 standard.
Installation temperature: -25°C ÷ +60°C.
Shock resistant: 6 joule (with mounted circuit breakers).
Conformity: IEC 60670-24 certification.

MISTRAL41W
Wall-mounted series

The MISTRAL41W series of consumer units gives installers the freedom and flexibility to implement any type of electrical distribution system in residential buildings. This wide range of wall-mounted, IP41-rated units has been designed from scratch to enhance the unique features that make ABB the leading industry standard.

The units are fast and easy to install and look great anywhere thanks to their elegant design. Furthermore, ample internal space, a choice of doors and a unified range of accessories offer endless possibilities to create high-quality work installers can be proud of.

System pro E comfort MISTRAL41W
Endless installation possibilities

Fast and easy to be installed. Design and simplicity “all in one”.

Concealed rear mounts for secure wall installation.

Door opens up to 180° allowing full access to theinterior of the unit.

Door available in two versions: petrol blue and opaque. Units without doors are also available.

The symmetrical design allows opening of the reversible door either from the left or from the right.

Endless installation possibilities

Invisible cable entry and exit
Pre-cut knockout slots allow cable entry and exit from the top and bottom. When not used, the slots remain invisible on the outside maintaining the consumer unit's sleek look and feel.

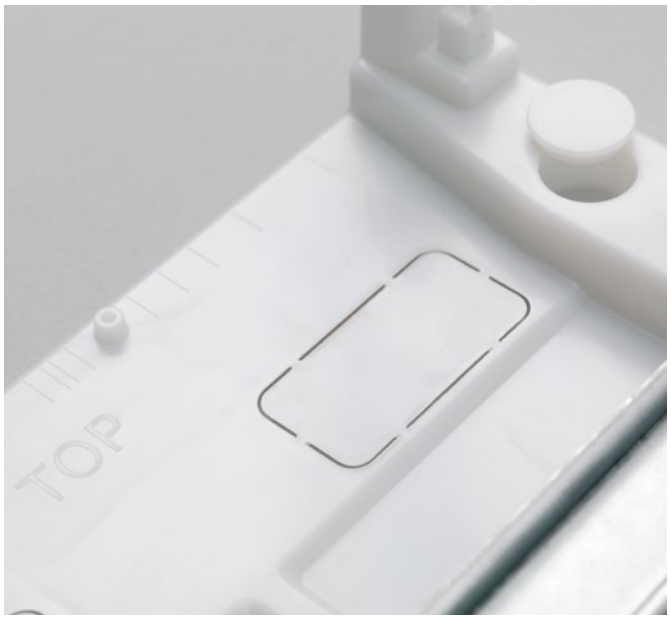
More than enough internal space
Lots of internal space makes cabling even easier. Cable clips and holes allow wires to be fastened to the frame with simple cable ties.

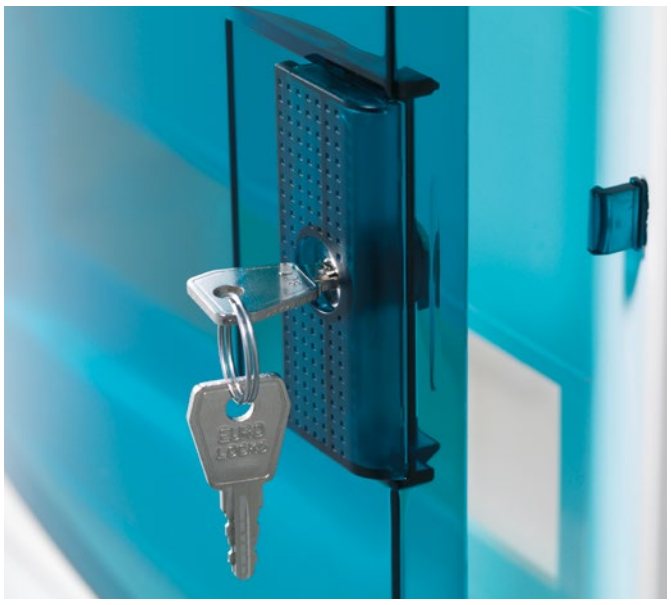
Easy installation of extra modules
An extra module can be added by removing two pre-cut elements. This offers a quick and easy solution when unexpected additional installation is required.

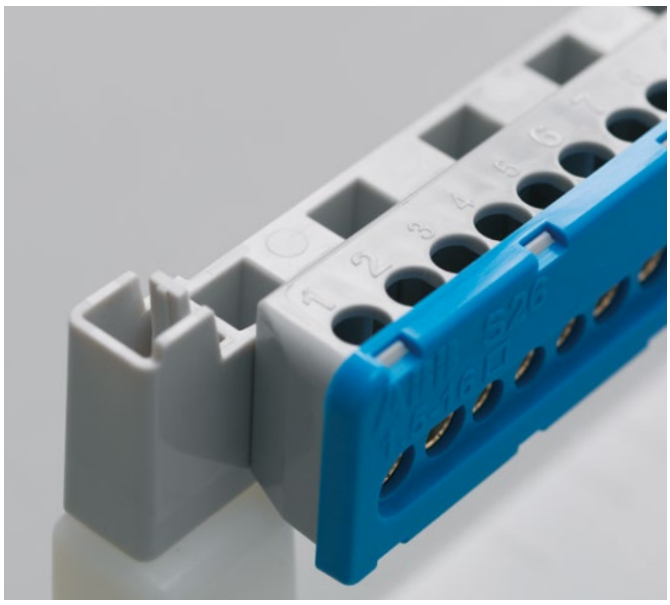
Fast and tidy cabling
Various snap-on terminal blocks for N and PE connection be installed in the upper and lower part of the unit. Two versions offer screw or spring couplings.

Double insulation protection
The unit housing and all accessories have been designed and developed to ensure Class II double insulation protection.

Multi-row units
Multi-row units are available with a standard distance of 125 mm between DIN rails.





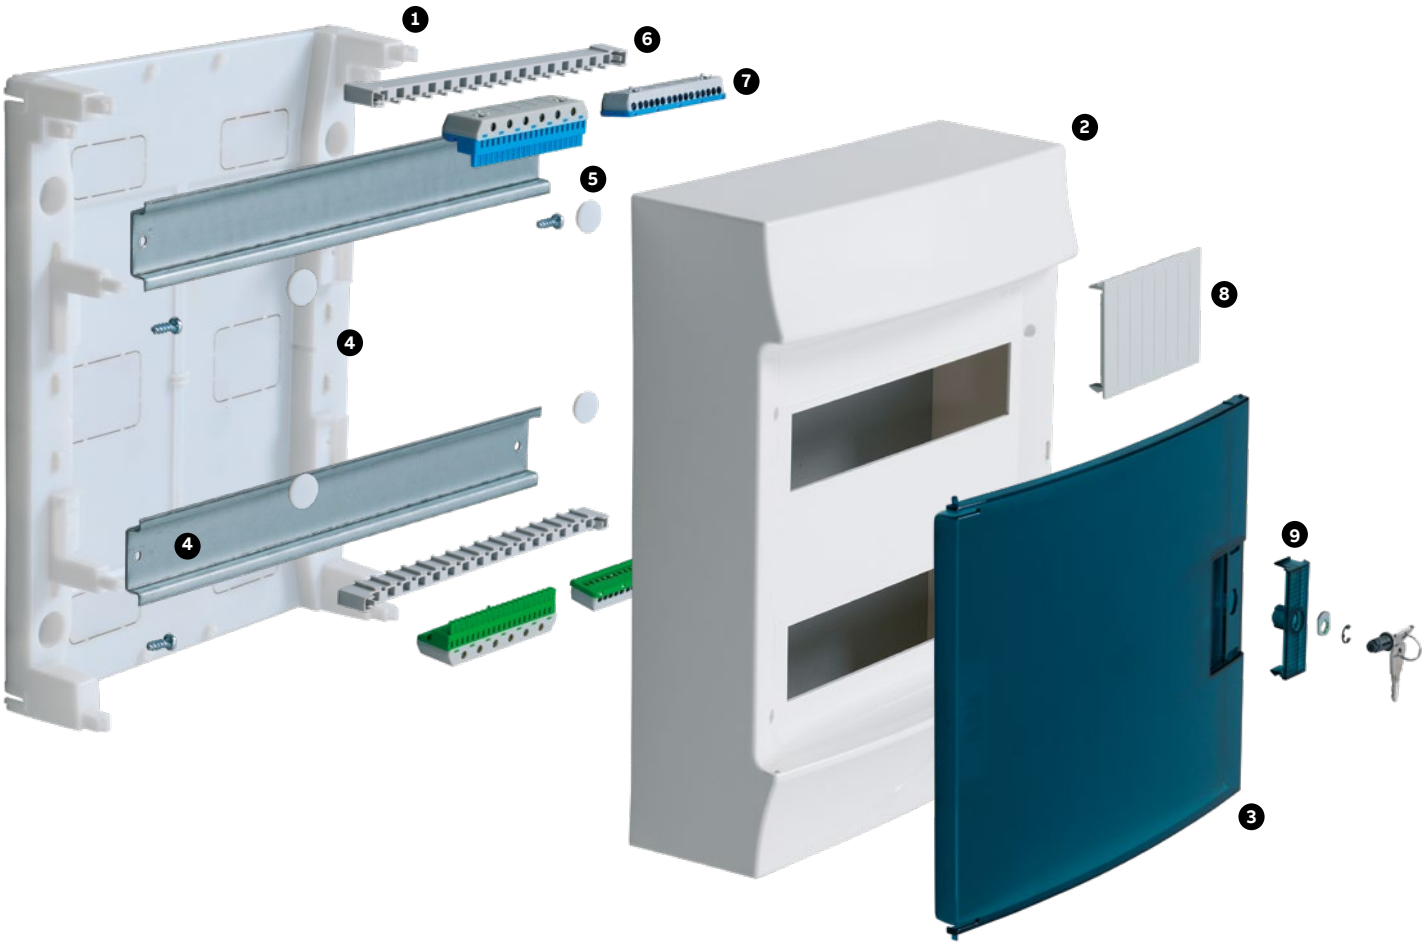


Optional door lock
The standard door with ergonomic handle is available with a lock for added security.

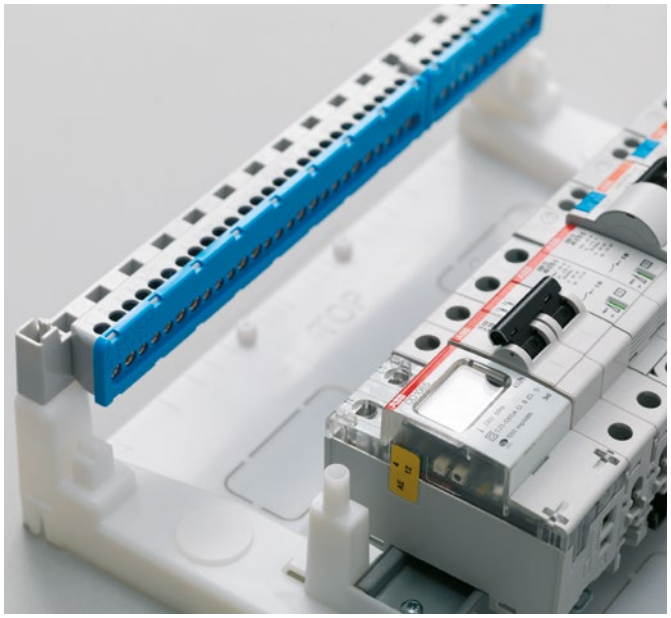
New generation terminals
The MISTRAL range of consumer units is amended with a wide, completely new ABB terminal blocks. Two different versions offer screw and spring fast coupling for easy and effective cabling up to 63A or 100A.

A versatile range suitable for every application

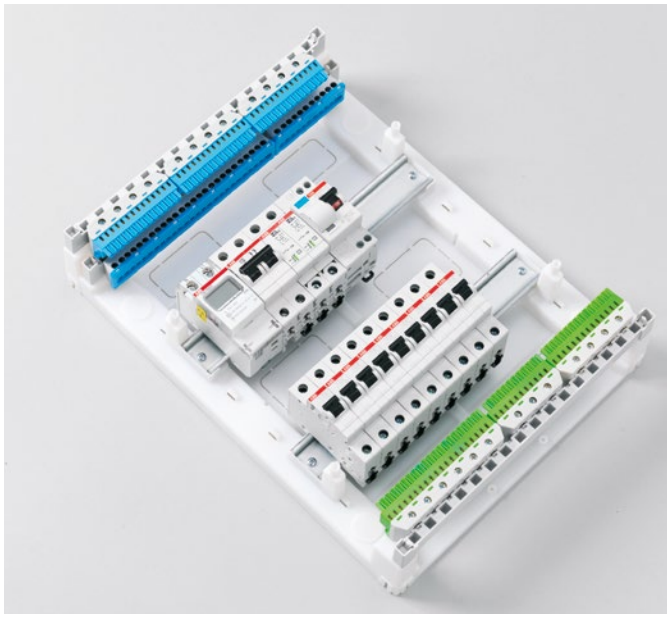
The simple construction of the MISTRAL41W series makes the units fast and easy to assemble. Furthermore, they can be easily adapted to various application requirements thanks to their flexible design.



1. Base for wall mounting
2. Reversible cover
3. Transparent door
4. DIN rail
5. Plugs, protection class II
6. Terminal carrier
7. Quick coupling terminal blocks
8. Module cover
9. Finish or closure element (optional lock)



A unified range of products
The MISTRAL41W series is compatible with a unified range of ABB products. As a result, terminal blocks, circuit breakers, switches, surge protective devices and many other components can all be installed in the units for a wide variety of applications.



3 different terminal systems available
A new generation of terminal blocks is available in different colours, wide range of sizes and two different connection options.

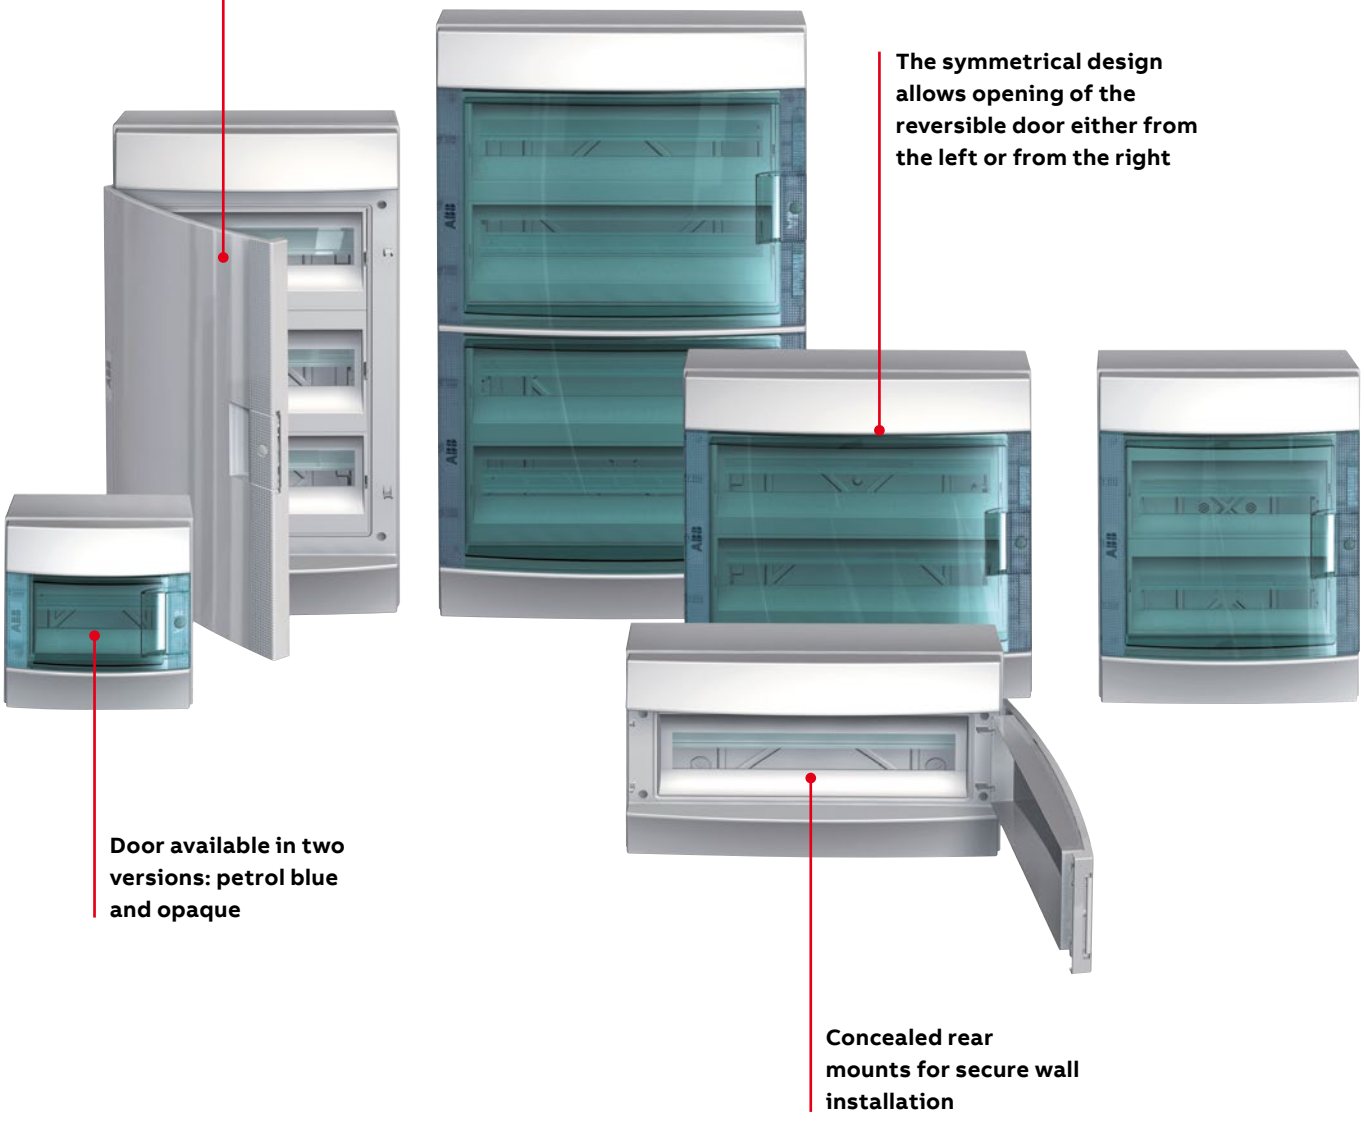
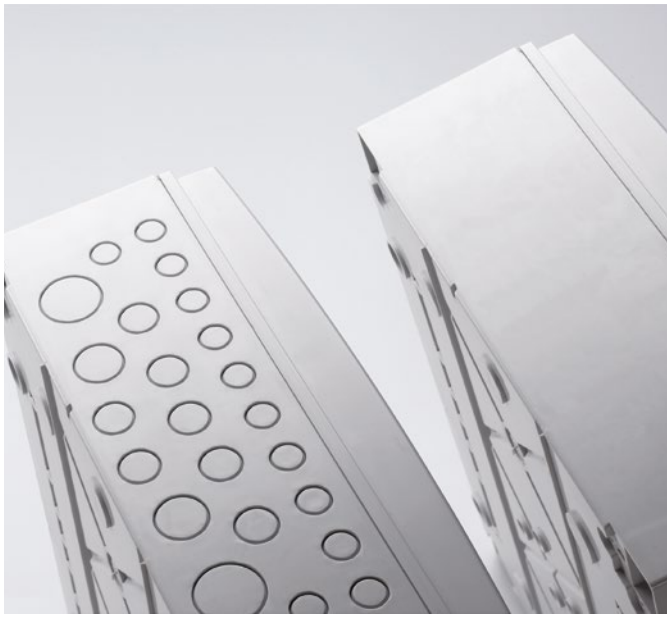
System pro E comfort MISTRAL65
Endless installation possibilities

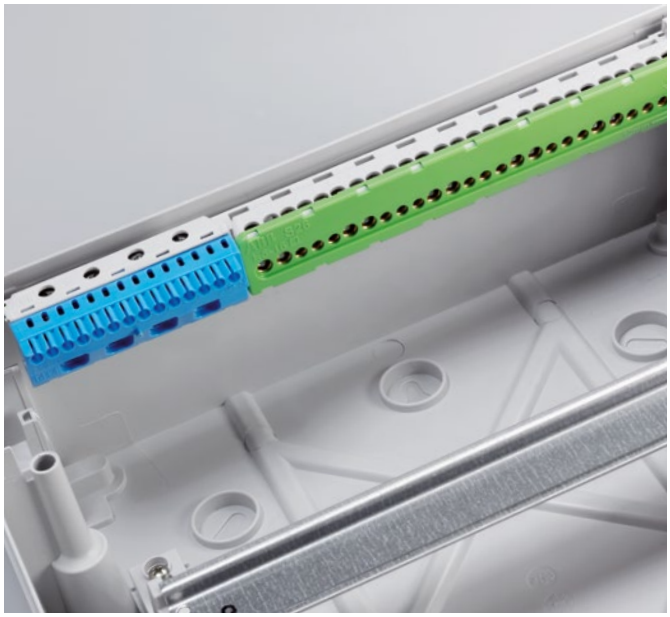


Invisible cable entry and exit
The MISTRAL65 (GWT 650) comes with smooth surfaces for the cables entry on top and bottom. The MISTRAL65 (GWT 750) version is provided with knockouts of various dimensions.



More internal space
Internal spaces have been created to make cabling even easier, with cable clips and holes for fastening wires to the frame with simple cable ties.

Easy installation of extra modules
Additional modules can be installed by removing two pre-trimmed elements. This offers an easy and tidy solution when there are unforeseen installation requirements.

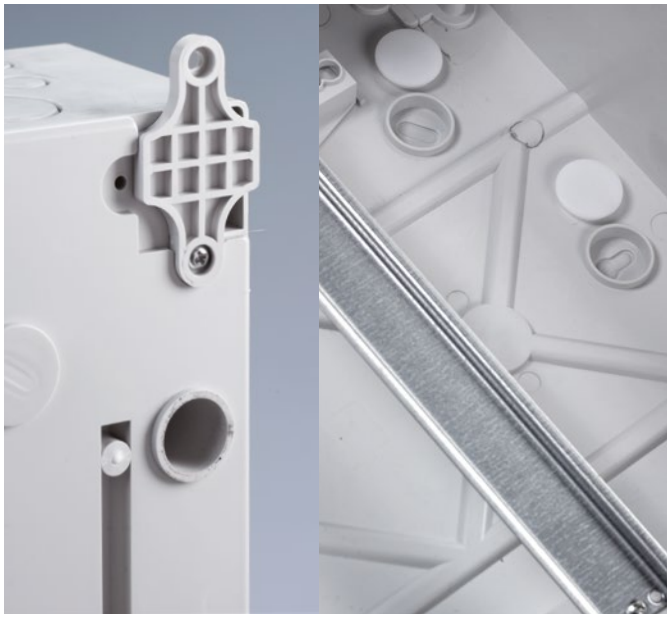


New generation terminals
The new System pro E comfort MISTRAL® range of consumer units is amended with a wide, completely new ABB terminal blocks. To different versions offer screw and spring fast coupling for easy and effective cabling up to 63A or 100A.

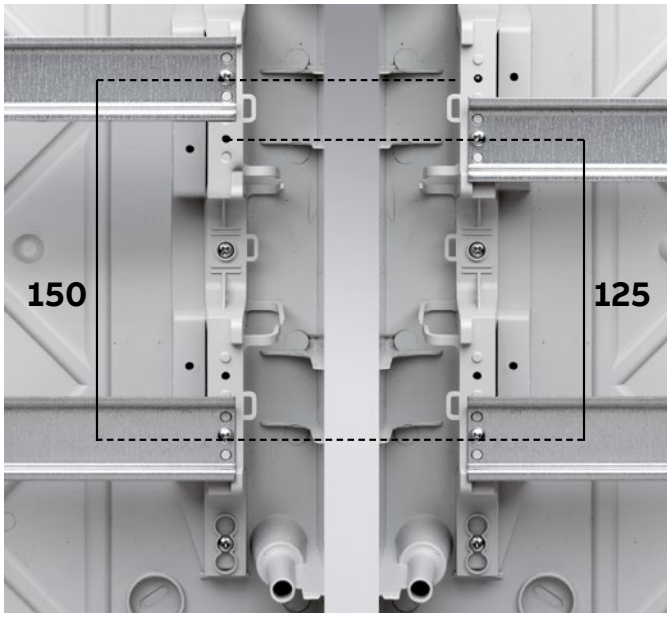
System pro E comfort MISTRAL65
Endless installation possibilities

Protected trunking entry
The new polycarbonate accessory for trunking entry can be positioned at the top or bottom of the consumer unit, connecting and protecting the conductor bundles. A series of internal knockouts allows it to house any type of trunking.

Aesthetically clean installation
Interior slots allow the unit to be fixed to the wall at points that cannot be seen from the outside, making for an aesthetically clean installation. Special snap-in closure plugs guarantee class II protection (double insulation).

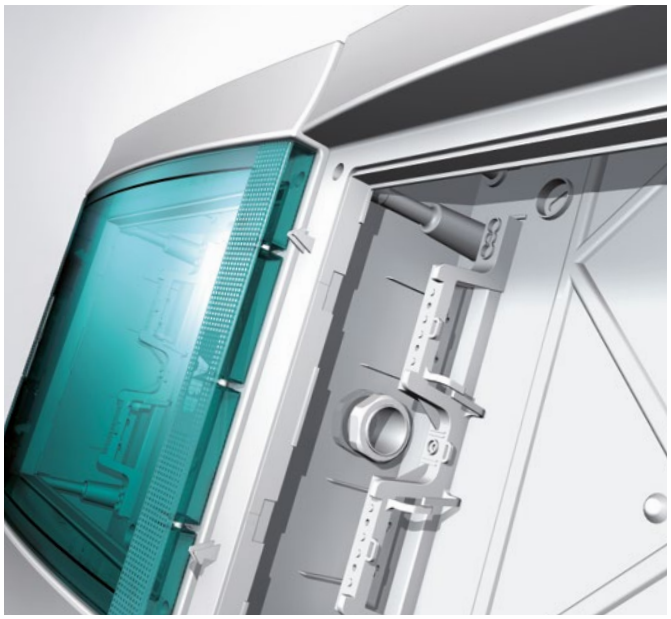


Optional door lock
The standard door with ergonomic handle and snap-on closure can be supplied with a lock and key on request. This ensures only authorized people have access and prevents tampering or incorrect operation.

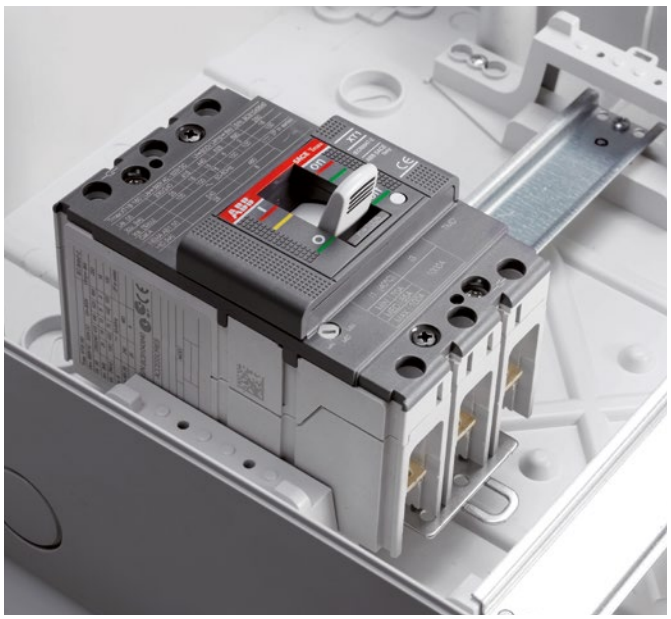


Variable distance between DIN-Rails
To create space at the top or bottom of the consumer unit, the central distance between the DIN-Rails can be modified from the standard 150 mm to 125 mm. The front panel can be removed, reversed and re-installed with a simple click.

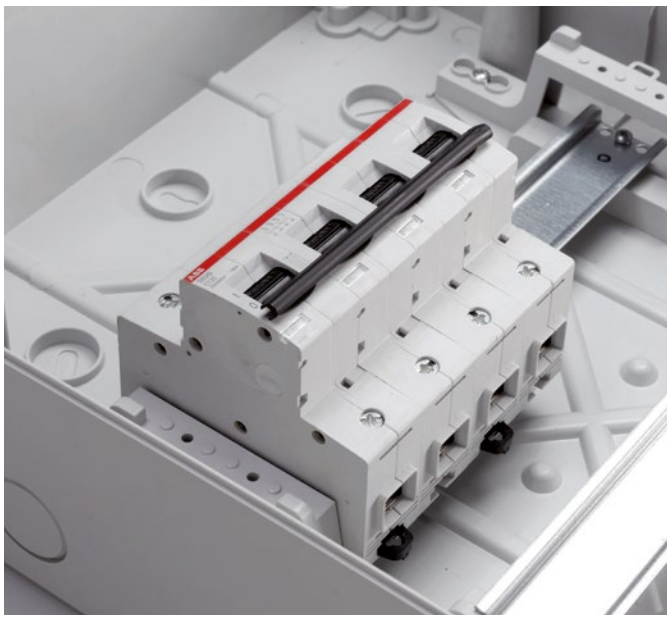
Horizontal coupling
The consumer units can be installed side by side, with cable gland accessories protecting the conductors' path between adjacent units.



Blind panels for small automation application
Accessories include blind panels and base plates allowing the installation of other types of devices, in addition to modular DIN-Rail products, like contactors, motor starters or devices on the front of the panel.



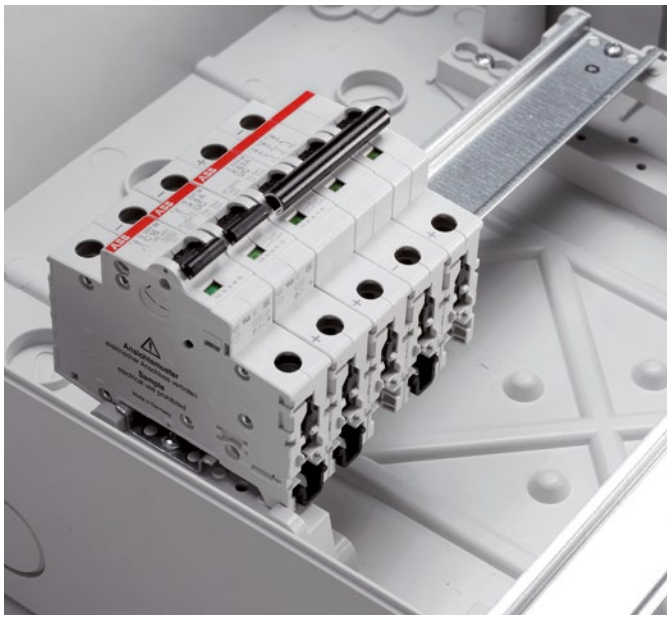
Two DIN positions
The frame has two DIN-Rail positions so accessories of different depths, like MCCBs, can be installed in perfect alignment.



Easy installation of non-standard devices
The flexibility of the frame allows easy installation of devices with above-standard depth like high-performance MCBs.

System pro E comfort MISTRAL65
Endless installation possibilities

Compatible with standard modular devices
The first depth allows the installation of standard products. These include most modular devices currently on the market.



Non-modular equipment
Accessories like blind panels and base plates enable the installation of other types of devices, in addition to modular DIN products, on the front of the panel. These include control buttons and indicator lights.

Automation boards

Europa Series switchboards for industrial applications

Technical characteristics

- protection degree IP 65
- insulation class II ⧈
- available in the versions with opaque and transparent, smoky vertically hinged doors
- available in RAL 7035 grey
- in polycarbonate material, self-extinguishing and resistant to abnormal heat and fire up to 960 °C (glow wire flammability index) in compliance with IEC 60695-2-11 Standard
- installation temperature from -25 °C to +60 °C
- resistant to heat: ball thermopressure up to +125 °C in compliance with EN 60695-10-2 Standard
- shock resistance 20 Joules (IK level 10)
- perfectly symmetrical switchboards with the possibility of attaching the door hinge onto the front (by means of the special articulated screws supplied) on the right or left with 140° opening
- doors designed to take lock with coded key, code 12 866
- designed for the insertion of an extractable frame with
- pre-drilled panelling for mounting 100, 125 and 160 A circuit breakers
- all models (except for code 12 764 and 12 784) are fitted with one rigid and one bi-material flange to facilitate insertion of conduits and cables
- switchboards made and produced in compliance with CEI 23-49 (1996) + V1 + V2, CB certificate IEC 60670-24 Standards
- switchboards are supplied complete with:
  - 4 screw-cover caps to guarantee ⧈
  - accessories for hinging the front part
  - 1 self-adhesive indicator strip per row
  - 1 certification plate
  - instruction sheet
- use 3.5×9.5 self-tapping screws to fix the components on the back

1SLC001013F0001

Terminal blocks

The complete terminal blocks are composed of a combination of terminal holders and terminal bars as indicated in the description, with the terminal bars already mounted on terminal holders. Configuration of the complete terminal block is standard. For different requirements (customized terminal block), the terminal holders and bars must be procured separately in the versions indicated in the table.

Description	Order code	Box/pack No items
for switchboards 12764 e 12784 – composed of 12538x2 + 12531x2	12 490	10/60
for switchboards 12768 e 12788 – composed of 12539x2 + 12531x2	12 491	10/60
for switchboards 12772 e 12792 – composed of 12540x1 + 12531x1 + 12532x1	12 492	10/40
for switchboards 12774 e 12794 – composed of 12540x2 + 12533x2	12 494	10/40
for switchboards 12776 e 12796 – composed of 12540x2 + 12534x2	12 493	10/40
for switchboards 12778 e 12798 – composed of 12543x2 + 12535x2	12 497	10/40

FLC09294

Terminal holders

The terminal block is completed by combining the necessary terminal bars to the terminal holders, taking care to keep the terminal bars separate from each other.

For switchboards type	Order code	Box/pack No items
12764 - 12784	12 538	12/360
12768 - 12788	12 539	12/360
12772 - 12774 - 12776 - 12792 12794 - 12796	12 540	12/144
12778 - 12798	12 543	12/108

FLC09226

Terminal bars

The terminal bars can be installed on any kind of terminal holder; they are snapped onto these with 2 clips for bar, through two holes made at the ends of the bar itself.

Description No of holes × ∅ holes (mm) + No of holes × mm²	Order code	Box/pack No items
5×16	12 531	20/240
10×16 + 3×25	12 532	20/240
16×16 + 3×25	12 533	20/240
15×16 + 6×25	12 534	20/240
19×16 + 6×25	12 535	20/240

Terminal holders and terminal bars are supplied separately. In this way, by inserting one or two terminal bars into the terminal holder you can create the best terminal for your requirements, with the advantage of obtaining a terminal block that is cheap as well as personalised, due to the fact that you only need to use material that is really necessary.
Some standard configurations are illustrated in the table.
All the possible configurations that can be created for each type of consumer unit are given in the technical details.

Switchboards for industrial applications with blank front

Technical characteristics

- protection degree IP 65
- insulation class II ⧈
- available in RAL 7035 grey
- available in the versions with transparent, smoky doors
- in polycarbonate material, self-extinguishing and resistant to abnormal heat and fire up to 960 °C (glow wire flammability index) in compliance with IEC 60695-2-11 Standard
- installation temperature from -25 °C to +60 °C
- resistant to heat: ball thermopressure up to +125 °C in compliance with EN 60695-10-2 Standard
- shock resistance 20 Joules (IK level 10)
- perfectly symmetrical switchboards with possibility of hinging the door onto the front (by means of the special articulated screws supplied) on the right or left with 140° opening
- doors designed to take lock with coded key, code 12 866 all models (except for code 13 200) are fitted with one rigid and one bi-material flange for the facilitated insertion of conduits and cables
- switchboards made and produced in compliance with CEI 23-49 (1996) + V1 + V2, CB certificate IEC 60670-24 Standards
- switchboards are supplied complete with:
  - 4 screw-cover caps to guarantee ⧈
  - accessories for hinging the front part
  - 1 self-adhesive indicator strip per row
  - 1 certification plate
  - instruction sheet
- use 3.5×9.5 self-tapping screws to fix the components on the back

Automation boards

Switchboards for industrial applications with blank front – Accessories

1SLC001013F0001

Terminal blocks

The complete terminal blocks are composed of a combination of terminal holders and terminal bars as indicated in the description, with the terminal bars already mounted on terminal holders.
Configuration of the complete terminal block is standard. For different requirements (customized terminal block), the terminal holders and bars must be procured separately in the versions indicated in the table.

Description	Order code	Box/pack No items
for 12 modules – composed of 12540×1 + 12531×1 + 12532×1	12 492	10/40
for 18 modules – composed of 12543×1 + 12531×1 + 12535×1	12 498	10/40

FLC09227

Terminal holders

The terminal block is completed by combining the necessary terminal bars to the terminal holders, taking care to keep the terminal bars separate from each other.

For switchboards type	Description	Order code	Box/pack No items
13 204 - 13 205 - 13 206	for 12 modules	12 540	12/144
13 208	for 18 modules	12 543	12/108

FLC09226

Terminal bars

The terminal bars can be installed on any kind of terminal holder; they are snapped onto these with 2 clips for bar, through two holes made at the ends of the bar itself.

Description No of holes × ∅ holes (mm) + No of holes × mm²	Order code	Box/pack No items
5×16	12 531	20/240
10×16 + 3×25	12 532	20/240
16×16 + 3×25	12 533	20/240
15×16 + 6×25	12 534	20/240
19×16 + 6×25	12 535	20/240

Terminal holders and terminal bars are supplied separately. In this way, by inserting one or two terminal bars into the terminal holder you can create the best terminal for your requirements, with the advantage of obtaining a terminal block that is cheap as well as personalised, due to the fact that you only need to use material that is really necessary.
Some standard configurations are illustrated in the table.
All the possible configurations that can be created for each type of consumer unit are given in the technical details.

Automation boards
Characteristics of Gemini switchboards

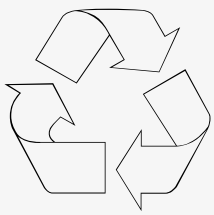
Gemini, something completely different in switchboards
Gemini range is revolutionizing the market of low voltage electric insulating switchboards. The reason for this is that it is the first switchboard made in thermoplastic material, to which the co-injection molding technique gives the same mechanical characteristics as polyester. This means that it is extremely sturdy, with its rigid covering and expanded internal core. Moreover, it contains no fiberglass, a material that with time rises to the surface, jeopardizing the functioning and safety of switchboards made in polyester with which it is usually mixed. Gemini switchboards have an IP66 protection degree (IP30 with the door open and with the appropriate components installed) and a very high resistance to chemical and atmospheric agents. This is the reason why Gemini guarantees excellent performances even in particularly severe operating conditions.

Strong outside and versatile inside, Gemini fits to any application
There are as many configurations as ABB devices for low voltage automation and distribution: moulded-case circuit breakers, modular circuit breakers, monitoring, control and signaling devices, wiring ducts and electrical connection systems. All of these components give to “Gemini system” an enormous range of specific solutions that are easy to assemble with the snap-on system. Nothing can be compared to Gemini, even when they reach the end of their life cycle because they are totally ecologically compatible. The material used to manufacture Gemini is 100% recyclable. Polyester, on the other hand, cannot be recovered. Moreover, to make sure that correct disposal procedures are followed, instructions are provided about how to identify materials and what to do with the product once it has served its useful purpose.

Gemini switchboards are made through co-injection, technology and ABB is the first manufacturer to use it as a molding technique. This process obtains a “sandwich” of two materials with a compact external covering and an expanded core, guaranteeing the highest level of mechanical protection against impacts (IK10) without the need to add hardening substances. Competitors products are usually made in polyester that is usually mixed with fiberglass; passing the time, it rises to the surface and become a risk factor for skin burns that may occur during installation and maintenance through accidental contact. Moreover, it causes deterioration of the technical strength and lasting characteristics of the material to which it is added. Gemini, on the other hand, keeps its mechanical characteristics in the long term. The co-injection technique makes the manufacturing operations themselves safe because the products are completely finished when they come out of the mold without any flash or other surface irregularities.

Quality and safety
Gemini is designed and built in compliance with reference Standards that define its constructional and functional characteristics. In particular, the IP66 degree certifies that Gemini is totally protected against the infiltration of solid bodies and is resistant to the penetration of jets of water similar to sea waves. Absolute protection is provided by double insulation even in the event of indirect contact. Even in very difficult application circumstances, Gemini gives high-level performances, with resistance to fire and abnormal heat up to a temperature of 750 °C and a functioning temperature from -25 °C to 100 °C. Moreover, the material with which it is manufactured retains its characteristics for a long time since it is not subject to corrosion by chemical or atmospheric agents. Also it does not turn yellow when exposed to UV rays.

Photovoltaic
In a typical photovoltaic plant the direct current section comprises a generator consisting of strings composed of photovoltaic modules connected in series. The Gemini series of IP65 sealed switchboards are ideal for use as field combiners or as parallel switchboards, i.e. for outdoor installation near the modules. ABB has a range which is currently unique on the market, and has developed a family of plug & operate solutions, i.e. a series of finished, wired and certified switchboards to meet the needs of a huge range of plant types: from single string for residential applications to large-scale solar fields.



Gemini is made in thermoplastic material that is 100% recyclable. The environmental compatibility of Gemini is an important objective right from the design phase where the Life Cycle Assessment (LCA) procedure, defined in 1990 during the Society of Environmental Toxicology and Chemistry Conference (Vermont, USA), is followed.
Life Cycle Assessment is an objective method for analyzing the energy and environmental loads relating to a product, process or activity, carried out by identifying and quantifying energy, the materials used and emissions released into the environment. Divided into four phases, the assessment covers the entire life cycle of the product, process or activity, from the extraction and transformation of raw materials, to manufacturing and distribution, and from usage to recycling and decommissioning.

Automation boards
Characteristics of Gemini switchboards

A switchboard that is not just one system, but three
Gemini is the result of design work conducted by ABB with the direct collaboration of switchboard manufacturers, installers and designers who considered versatility to be the discriminating element when purchasing a switchboard, equally important as sturdiness and reliability. Gemini fulfils this requirement by providing a product that can be used for three different purposes: in addition to the basic configuration, it also provides the components necessary to be equipped as an automation switchboard or as a distribution and mixed switchboard. In any application, compatibility with ABB protection, control and monitoring portfolio of products means that a real system of integrated and complementary functions can be configured.
Typical examples of some Gemini applications can be seen in industrial production departments and on board machines, in galvanization plants and varnishing cabins, in petrol stations and carwashing plants, boiler-rooms, car parks, shopping malls and in any other environments where distribution and automation demand specific safety requirements and service continuity.
Gemini is also flexible with six different box sizes and internal space to accommodate from 24 to 216 DIN modules.
To respect safety standards, all the switchboard components can be fixed to the base plate or to the box frame without using any tool; wiring is carried out from the front followed by snapping the base plate or the frame onto the box.
The patented frame is fitted with the cable duct incorporated in the uprights.
In its design, Gemini repeats the shapes and RAL 7035 grey color of ABB switchboards with which it can be configured as a main protection switchboard.

Experience and innovation
Gemini has two central aspects. It is both the result of years of work in the production of installation material and the expression of the most advanced technology, from design to distribution. In ABB laboratories, computer aided design programs simulate all types of application conditions, translating virtual checks into a process to improve the Gemini performances so that it will be able to respond more accurately to market requirements.
Through Internet at URL www.abb.com/edesign-software you could download free of charge ABB “e-design” software; it includes softwares for the configuration and budgeting of Gemini in distribution and automation mixed applications.

System pro E power

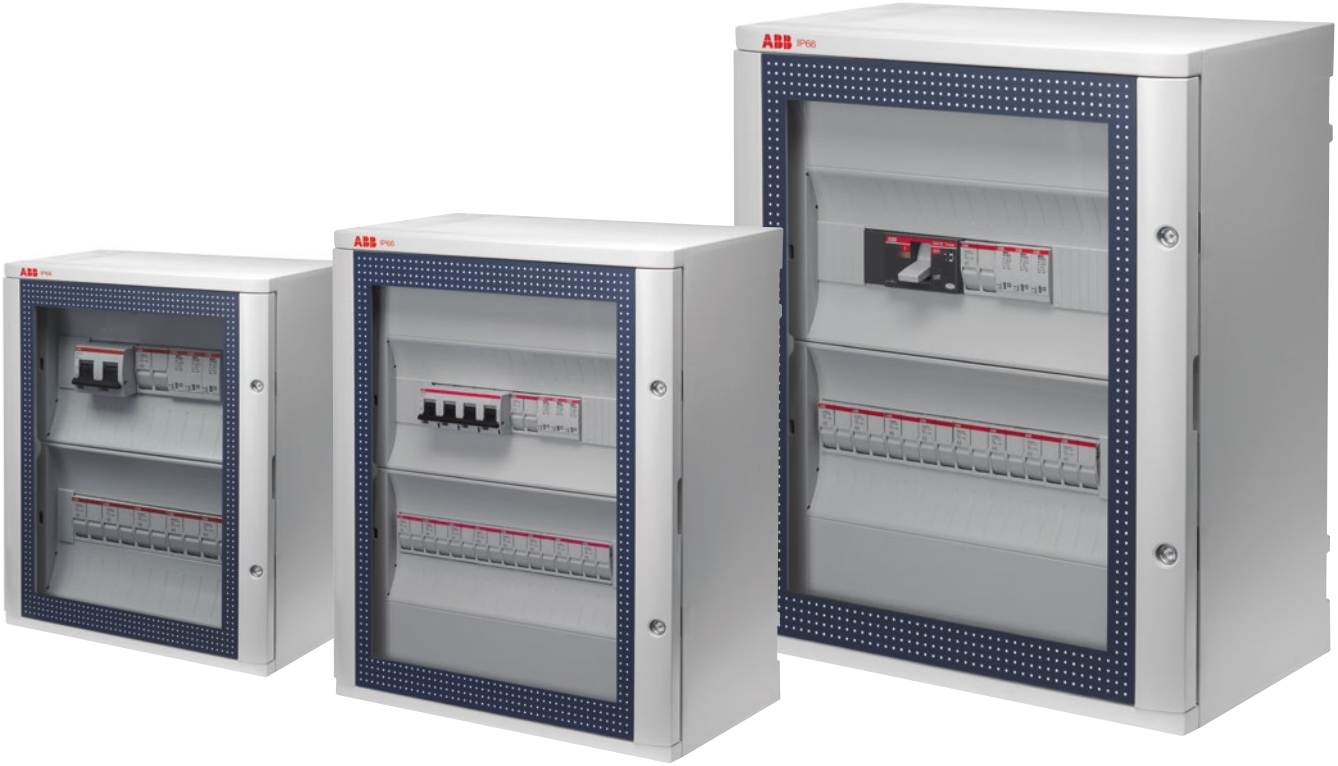

ABB IP66

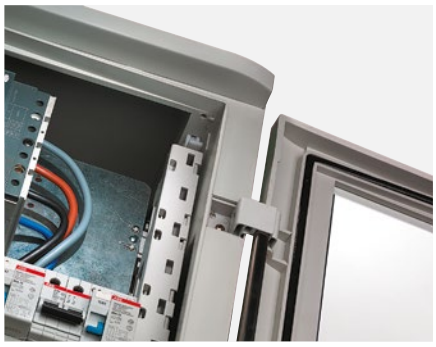
Automation boards

Basic configuration - Gemini switchboards

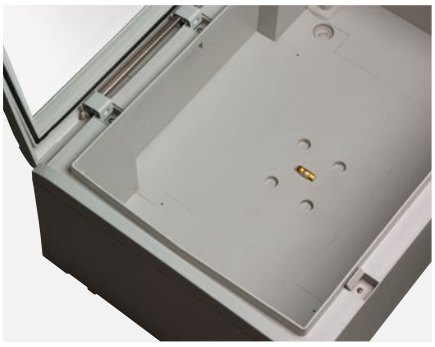
In the basic configuration, Gemini switchboards are composed of boxes in six different sizes ranging from 335x400x210 mm to 840x1005x360 mm (WxHxD, external measurements) and with opaque or transparent doors. In both versions, the doors are reversible and clip onto the hinges without the need to use tools; the fact that they open at an angle of more than 180° means that it is easy to work on the components installed inside the switchboard.
The seal applied by extrusion along the sides of the doors guarantees IP66 degree of protection. Access to the inside of the switchboard is protected by a standard double bit lock that can be replaced by locks of another type available in the accessories. Boxes and doors can be requested either separately or as combined “box + door” codes, to make filling out the order form more flexible. Inside the packages, the door is always wrapped separately and inserted inside a pocket that protects it from accidental damage until wiring is completed and the switchboard is installed.
Hole-cover plugs to guarantee IP protection and double insulation for wall mounting are also supplied with the pack together with the instruction sheet.

Specifications	
Protection	IP66 (IEC EN 60529) Class II insulation
Strength	Thermoplastic material moulded in co-injection Resistance to abnormal heat and fire up to a temperature of 750 °C (IEC EN 60695-2-11) IK10 (IEC EN 50102) degree of resistance to impacts Protection against chemical and atmospheric agents (water, saline solutions, acids, basic agents, mineral oils, UV rays) Operating temperature -25 °C ÷ +100 °C
Performances	Rated service voltage up to 1000 V Rated insulating DC voltage up to 1000 V Rated insulating AC voltage up to 1500 V
Flexibility of use	6 sizes from 335x400x210 mm to 840x1005x360 mm (WxHxD, external dimensions) DIN 24 to 216 modules
Installation	Snap-on mounting of all components in compliance with safety Standards
Quality and environment	Compliance with CEI EN 62208 international reference Standard, qualification for the requirements of CEI EN 61439-1 Standard, IMQ mark according to EN 62208 Standard. 100% recyclable EN 60068-2-52 resistance to marine environments EN60068-2-5 resistance direct sun exposure UL Listed: UL508A, UL50, UL50E Nema: Type 4x



Gemini doors open at an angle of more than 180° giving easy access to the devices installed inside the switchboard.

No tools are needed for installation. The doors hook onto the hinges with special hinge pins and are reversible.



The special structure of the inner perimeter of the box ensures further protection against the penetration of water. The box is supplied with a spirit level.

Boxes and doors

- Available in 6 sizes
- Single order code combined with box and transparent and opaque door
- Pack with door dismounted and wrapped separately
- Door designed so that it can be hooked onto hinges at both vertical sides and mounted without the use of tools
- To be mounted to the wall using internal holes or fixing brackets supplied as accessories
- Door opening at an angle of more than 180°
- RAL 7035 grey color
- Doors supplied with 2 standard double bit locks (3 for sizes 5 and 6) that can be replaced with locks for ciphered key or with square/triangular impression (the standard triplex key is suitable for use with three types of impressions).

Automation boards

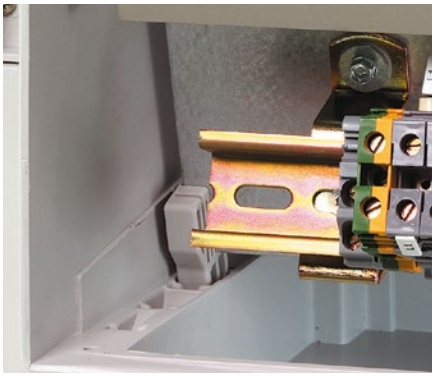
Components for automation applications

Gemini switchboards are designed to be perfectly compatible with ABB components for low voltage control and monitoring. For these applications they can be equipped with modular devices belonging to the System pro M range, with Tmax moulded-case circuit-breakers and control and signaling devices, creating a truly integrated automation system. When deciding the Gemini layout for control and monitoring applications, not only is it possible to select the box and door in the required size, but you can also select the base plate in one of the three versions in the range.

After wiring with the ducts and the Fix-O-Rapid device, the special standard adjustable feet and hooks must be fitted onto the base plate, allowing it to be inserted inside the box at up to seven different depths and three further levels of adjustment: no tools need to be used to carry out these operations. To finish the job, the inner door can be mounted (reversible and in insulating material), guaranteeing IP30 degree of protection when the switchboard door is open. No tools are needed unless the inner door is equipped with buttons, warning lights, etc.

The fixing hooks and feet supplied in the standard versions are applied without having to use tools, making it possible to install the base plate at seven different depths inside the switchboard. They can also be adjusted at three further positions.

Application of the inner door guarantees IP40 degree of protection when the switchboard door is open.



Example of the configuration of a switchboard for an automation application: some ABB control and protection devices are installed on the plate. The inner door is fitted with light-signaling devices.

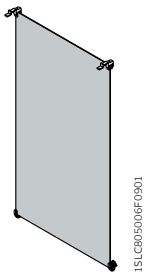
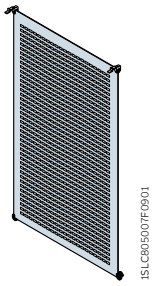
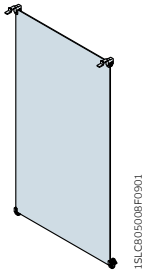
Components for automation applications



Blank metal base plate



Drilled metal base plate



Insulating material base plate

Base plates

- Available in three versions in blank or drilled metal and insulating material
- Positioning at 3 different depths for size 1, 4 different depths for sizes 2-3-4 and 7 different depths for sizes 5-6 (adjustments with 30 mm pitch)
- Supplied with feet and hooks adjustable at three further positions (with 7.5 mm pitch)
- Snap-on mounting
- Plates can also be mounted directly on the base with the special kit.

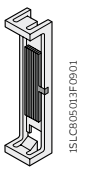
Fix-O-Rapid

Rapid mounting device for attaching wiring ducts to the base plate: it snaps onto the plate after drilling a ø 7 mm hole. Two Fix-O-Rapid devices are enough for each wiring duct section. Fix-O-Rapid guarantees maximum insulation since it does not involve the use of any metal component inside the wiring duct. If the wrong wiring duct is selected, it can be dismounted and a version with the same base and a different height can be attached to the Fix-O-Rapid.

Description	Code	Unit/ Pack-no. pieces
Rapid mounting device for wiring duct, W 25 mm	05 270	20/600
Rapid mounting device for wiring duct, W 40 mm	05 272	20/600
Rapid mounting device for wiring duct, W 60 mm	05 274	20/600
Rapid mounting device for wiring duct, W 80 mm	05 276	20/240
Rapid mounting device for wiring duct, W 100 mm	05 278	20/240
Rapid mounting device for wiring duct, W 120 mm	05 280	20/240
Rapid mounting device for wiring duct, W 150 mm	05 282	20/240



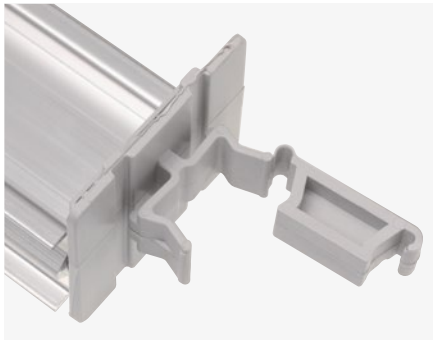
Fix-O-Rapid

Automation boards

Components for distribution and mixed applications

In distribution and mixed applications, the Gemini switchboard is designed to be fitted with System pro M modular devices and Tmax moulded-case circuit breakers. The frame is the load-bearing element of the configuration: DIN rails, partial modular plates and the special Tmax mounting and cabling kits are snapped onto the uprights.
All the components can be adjusted to six different depths with a pitch of 12.5 mm and arranged at heights with standard installation pitch of 150, 225 and 300 mm and a distance of 75 mm between the rows.

Blank or drilled front panels are applied to protect the equipment and these can be hinged onto both sides; the cables are housed inside the vertical wiring duct integrated in the uprights according to an exclusive ABB patent. Wiring is carried out by pulling out the frame and working from the front; the ergonomic grip and the standard feet and snap-on hooks supplied make it easy to insert it inside the switchboard after the job is finished.



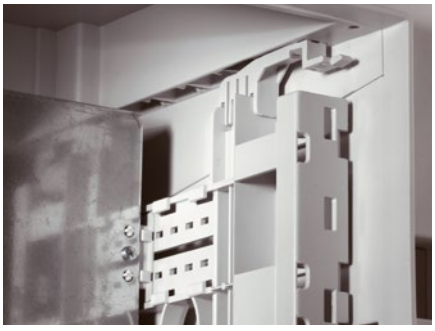
The DIN rail is supplied with special hooks already in position for attaching to the uprights.

The upright with the incorporated wiring duct is an exclusive ABB patent that rationalizes the path of cables inside the switchboard.

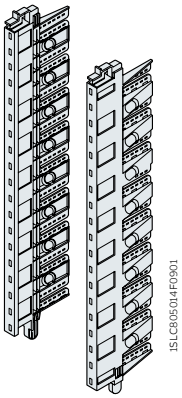
The depth at which the DIN rail, the modular plates, the kit for fixing the Tmax circuit breakers and the wiring duct are positioned can be adjusted with a simple sliding movement.

The frame can be extracted to make wiring operations easier at the workbench.

The blank and drilled panels are hinged onto both sides; the description of the installed components can be kept in the special compartment protected by a transparent, hinged flange.



Fixing hooks and feet allow the frame to be snap-mounted inside the box.



Uprights

Uprights

- Incorporated vertical wiring duct (ABB patent)
- Snap-on mounting of all components (installation pitch of 75 mm)
- Snap-on insertion into box
- Depth of installed components adjusted at a pitch of 12.5 mm (4 positions for uprights of size 1 and 6 positions for the remaining ones)
- Ergonomic grip to make it easy to insert and extract

Automation boards
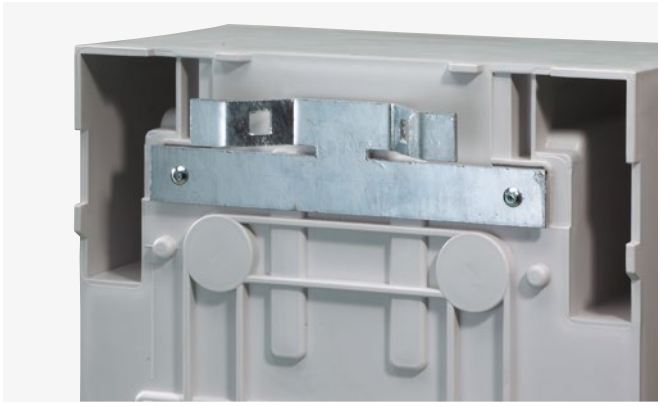
Accessories

Gemini switchboards have the same accessories for both automation and distribution applications, ensuring maximum versatility and integration of functions. In particular, the ventilation and anti-condensation kits make it even safer for the devices to run, protecting them from the effects of heat and humidity while the wall brackets, pole mounting kit and pedestal make it easier to install the switchboards in any context.

Three different kinds of locks are supplied for the doors with which it is possible to replace the standard double bit model. The universal drill bit can be used to open the side branch connections. Module covers hide the unused modules of the DIN rail guaranteeing IP40 protection when the door is open in distribution and mixed configurations.

The standard locks supplied can be replaced by the version with ciphered key and handle or with square or triangular impression.

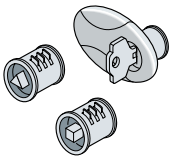
Gemini wall-mounted installation using the special mounting brackets.



The fact that Gemini switchboards can also be pole-mounted (see photo above) or mounted on a special pedestal (see photo at the side) makes them suitable for any application situation.

Locks

Available in three versions with ciphered key and handle, with triangular and square impressions.



1SLC805026F0901

Locks

Description	Code	Unit/Pack
Lock with Yale type ciphered key and handle	1SL0340A00	1/10
Lock with triangular impression	1SL0341A00	1/10
Lock with square impression	1SL0339A00	1/10
Tamper-proof locking kit (code 1SLO340A00 included)	1SL0458A00	1/10
Gemini standard lock	1SL0459A00	1/10

Mounting elements

Guarantee optimum wall, pole and floor mounting conditions.

Automation boards
General characteristics of SR2 Enclosures

The range of SR2 enclosures is a complete offer of monobloc enclosures for constructing small and medium-sized electric automation, switching and control switchboards.

The SR2 enclosures come from the experience ABB has gained over the years in building IP65 metal structures (in accordance with the IEC 60529 Standard), together with the innovative new production process used for construction and patented by ABB.
The typical use of SR2 Enclosures is to make switchgear and controlgear switchboards for a very wide variety of industrial machines: from large machinery with automated production lines or parts of these, down to the typical installations of on-board machine switchboards, boilers, heating plants and so on.

They conform to the EN 62208 Standard “Empty enclosures for low voltage protection switchgear and controlgear assemblies” and allow realization of electrical equipment conforming to the prescriptions of the IEC 60204-1 Standard “Safety of machinery. Electrical equipment of machines” and of the EN 60439- 1 Standard and the new EN 61439-1-2 Standard “Low voltage protection switchgear and controlgear for assemblies”. The degree of protection, in accordance with the IEC 60529 Standard “Degrees of protection of enclosures (IP Code)”, is IP65.

The SR2 enclosures have also passed the control required to obtain the UL (Underwriters Laboratories) and CSA (Canadian Standards Association) Type 12 marks.

The SR2 enclosures also allow secondary distribution switchboards to be made, thanks to the possibility, in the 400, 600 and 800 mm widths, of installing the whole range of apparatus and modular circuit-breakers on DIN rails combined with special pre-drilled and hinged modular front panels, thereby allowing construction of AS/ANS type electrical switchgear conforming to the IEC 60439-1 Standard and the new EN
61439-1-2 Standard. A single line of metalwork structures therefore allows construction of automation and secondary and end distribution electrical switchboards thanks to the availability of a series of accessories (modular panels, DIN rails) and to the possibility of stacking the enclosures.

The SR2 enclosures are available in two versions (blind door or glazed door) and in 23 different dimensions, as well as a further 19 combinations obtained by stacking the enclosures, up to a maximum height of 2000 mm, which guarantee ample selection possibilities for the various end applications.

The SR2 enclosures have been designed to fulfil all the typical needs of the builder or installer of switchgear in the best way possible and the user is presented with a unique ensemble of functional characteristics:

- wide dimensional range
- certified IP65 degree of protection
- internal galvanised sheet mounting plate with 20/10 thickness (made to allow threaded holes to be made easily), adjustable in depth by using a special accessory
- fairlead plate screwed on (at top and bottom) made of 15/10 thick galvanised sheet, with a sealing gasket applied inside
- complete reversibility of the enclosure, so the door can open either on the right or on the lefthand side
- possibility of installing all the apparatus and modular circuit-breakers on a DIN rail combined with a hinged modular panel

The standard colour is RAL 7035 orange peel. On request, the SR2 enclosures can be ordered in a wide range of RAL colours (see page 7/12).

Both the enclosures with glazed door or blind door can be stacked:
stacking is done simply by removing the fairlead plates and inserting the IP65 sealing gasket (GZ....), made of neoprene with closed cells.

Assembly of the stacked enclosures is carried out by means of the same holes used for the fairlead plates.
The door is supplied with the enclosure (single code) so as to reduce the number of articles and assembly times.

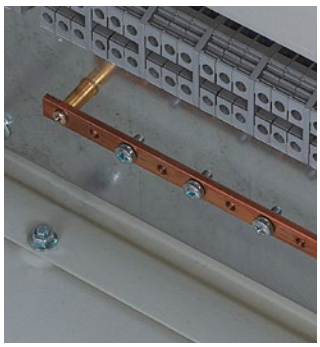
Automation boards
General characteristics of SR2 Enclosures

The range is completed with a series of accessories: brackets for wall assembly, rain shield top cover, locks of various types, internal document pocket, spacers, and spray paint for touching up. It is possible floor fixing by means plinth.

Plastic document pocket, RAL 7035, size A4, the pocket is apply within the solid doors wider than 400 mm, with stickers provided.

Many closure systems can replace the standard closures of the external doors. The inserts are interchangeable and easily replaced by loosening a nut.

The brackets for wall mounting allows installation of the boxes on the wall using the holes located on the back of the enclosure.



The bars, made of electrolytic copper with M6 threaded holes in 25 mm, can be mounted on mounting plates using the appropriate supports.

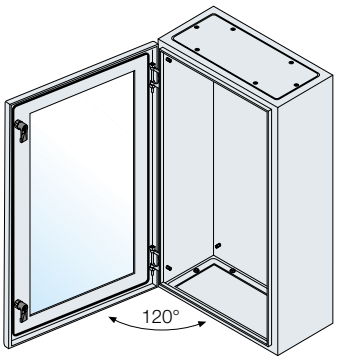
(1) The enclosures with height less or egual to 500mm hare only a closing box.
* Plates height 1000 / 1200mm have six mounting points .

Automation boards

Ordering codes - SR2 enclosures



Enclosures with glazed door

The enclosures with glazed door are also used for distribution configurations. The internal equipment is made, alternatively, by selecting the special kits:

- KD... (Distribution Kit) consisting of a pair of functional uprights for assembly of the modular panels (to be ordered separately) and of any compensation panel.

The modular panels, which can also be installed on the enclosures with blind door with the help of the KD.. kit itself, are all hinged and have vertical modularity of 185 mm.

Temperature management

Heater for IP20 electrical switchboards

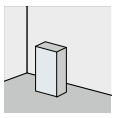
Their use prevents condensation in the electric cabinets. They consist of a heating element (PTC thermistor) inserted in an aluminium alloy ground plate. The PTC thermistor is a component which modifies its impedance according to the operating temperature. It is intrinsically stable and ensures primary safety features for the heater and service stability.
The main qualities of the heaters using PTC are:

- electrical absorption (or dissipated power) which is almost constant in
- the range of power supply voltage between 100 and 250V;
- electrical absorption bound by inverse law to the trend of the ambient temperature.

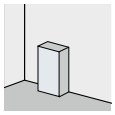
The special tubular geometry of the ground plate allows efficient thermal exchange with the heating element. This allows high powers and limited overall dimensions (especially in width and depth); Snap-on assembly on 35 mm DIN rail. Requires a thermostat.

Description	Dimensions (mm) H	W	D	Code	Package/ No. of pieces
Anti-condensation heater 30W, 110-240 Vac-dc	115	42	42	VA7930	1/1
Anti-condensation heater 50W, 110-240 Vac-dcc	165	42	42	VA7950	1/1
Anti-condensation heater 75W, 110-240 Vac-dc	210	42	42	VA7975	1/1
Anti-condensation heater 100W, 110-240 Vac-dc	165	42	51	VA7910	1/1
Anti-condensation heater 150W, 110-240 Vac-dc	146	82	51	VA7915	1/1
Anti-condensation heater with fan 300W, 230 Vac-dc	148	82	91	VA8300	1/1

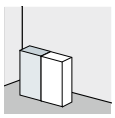
All the heaters with PTC absorb a higher power than the rated one on inrush according to a transitory which lasts a few tenths of a second.
If the heaters are to be supplied by means of an auxiliary transformer, its apparent power must be sized taking 1.5 times the rated power of the heaters with natural aeration and twice those with forced ventilation into consideration.



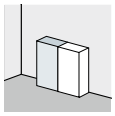
Detached, exposed on all sides



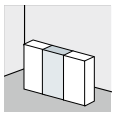
For closed to a wall structures



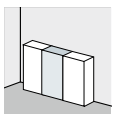
Left or right exposed structure



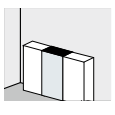
Left or right closed to a wall structure



Central exposed structure



Central closed to a wall structure



Central closed to a wall structure, with covered roof

IEC 890 method for calculating the effective cooling surface (CEI 17-43 method)

The total power dissipation P of an enclosure is linked to the exchange effective dissipating surface S, the ΔT difference between the inner and outer temperature and the k coefficient of heat exchange relative to the material of the enclosure:
P = k * ΔT * S
k = 5,5 for painted steel
ΔT = T1-T2;
T1 = dew point temperature (on overage 25 °C)
T2 = minimum ambient temperature.

The exchange surface S can be calculated using the following table taken from the CEI 17-43

Disposition of the cabinet	Calculating the enclosure surface S (mm²)	Dimensions (m)
Detached, exposed on all sides	S = 1,8 x H x (L+P) + 1,4 x L x P	L = width H = height P = depth
For closed to a wall structures	S = 1,4 x L x (H+P) + 1,8 x P x H	
Left or right exposed structure	S = 1,4 x P x (H+L) + 1,8 x L x H	
Left or right closed to a wall structure	S = 1,4 x H x (P+L) + 1,4 x L x P	
Central exposed structure	S = 1,8 x L x H + 1,4 x L x P + P x H	
Central closed to a wall structure	S = 1,4 x L x (H+P) + P x H	
Central closed to a wall structure, with covered roof	S = 1,4 x L x H + 0,7 x L x P + P x H	

Using a SRN8630K box, in “for closed to a wall structures” case we will obtain:
T1 = 25 °C; T2 = 20 °C; K = 5,5; ΔT = (25-20) = 5 °C; S = 1,4m²

The total power dissipation P obtained will be:
P= k * ΔT * S = 38,5 W

The recommended heater is VA7950 (50W).

Temperature management

IP20 Thermostat

Conforms to EN 60730-1, CE and cURus standards, IP20 degree of protection. Grey RAL 7035 colour; electrical life 100,000 cycles. Dimensions (HxWxD) 68x29x45mm, can be mounted on DIN rail. The version with NO (normally open) contact allows closure of a circuit activating ventilation, air conditioning, or alarms. The version with NC (normally closed) contact allows opening of a circuit, disconnecting any anti-condensation resistances.

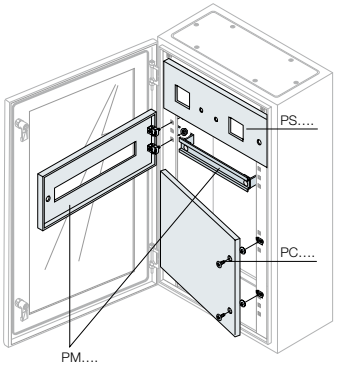
Supports 36 mod. DIN x 6 rows	1200	800	KD1280K	1/1

Automation boards

Ordering codes - SR2 enclosures



Modular panels

Modular panels made of 12/10mm thick sheet steel painted RAL 7035 colour orange peel. The modular hinged panels can be mounted on the enclosures by using the special kit (KD...) consisting of functional uprights and compensation panel. The hinges patented by ABB, allow automatic earthing for panel contact when it is closed and are also suitable conventional earthing (with a cable). Each modular panel (PM) has a DIN rail provided (adjustable in depth), the fixing brackets and the relative small items. Modular and circuit-breakers and Tmax moulded-case circuit-breakers up to T3 can be placed side by side on the same DIN rail using the special depth adapter AP6001. To install moulded-case circuit-breakers, it is necessary to fix the DIN rail in a position towards the back. The fixing brackets of the DIN rail allow the wiring duct to be mounted up to a maximum size of 60 x 60 mm.

Modular hinged panels for modular apparatus (DIN rail and fixing brackets included)

	Dimensions (mm)			
Description	**H**	**W**	**Code**	**Package/ No. of pieces**

Painting Special Service

Description	Code
Extra cost for special SR painting	VERNSR

Standard size enclosures, standard colour
Special painting service with standard colour (see on the next page) for standard size enclosures in quantities equal to or greater than 4 units with single code to be managed with code SRN ... SPEC + VERNSR overprice equal to the number of enclosures + colour note to be specified in the order.

Example: SRN4320SPEC 4
VERNSR 4
COLOUR NOTE

Standard size enclosures, non-standard colour
Request feasibility of implementation by completing the relevant Form for special quotations and send it to the R&D ECS office.
Management is per offer.
If the offer is accepted and after having received it, it will be possible to place the order with the codes indicated in the offer with the following features:

Example: SRN4320SPEC 4
VERNSR 4
OFFER REFERENCE IN THE ORDER

Non-standard size enclosures, standard colour
Request feasibility of implementation by completing the relevant Form for special quotations and send it to the R&D ECS office.
Management is per offer.
If the offer is accepted and after having received it, it will be possible to place the order with the codes indicated in the offer, that will not be SRN...SPEC, but dummy ones:
Always remember to indicate the offer reference in the order.

Non-standard size enclosures, non-standard colour
Request feasibility of implementation by completing the relevant Form for special quotations and send it to the R&D ECS office.
Management is per offer.
If the offer is accepted and after having received it, it will be possible to place the order with the codes indicated in the offer, that will not be SRN...SPEC, but dummy ones:
Always remember to indicate the offer reference in the order.
Please note that the minimum quantity is four pieces with a single code.

Automation boards

Standardised RAL colours (on request)

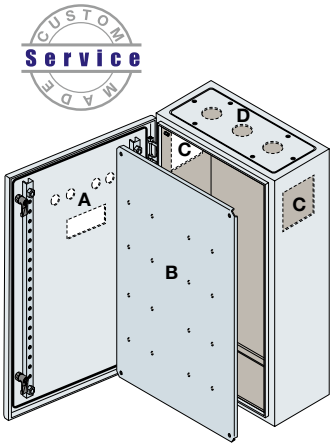
Ordering codes - SR2 enclosures



Special Drilling Service
The overprice amount depends on the number of individual drilled parts and not on the number of holes.
For single part it means: A-door B-plate; C-housing; D-top/bottom part.
Please note that the minimum quantity is 4 pieces with a single code.
The price of the special drilling service depends on the number of parts to be drilled and on the amount of enclosures to be drilled.

Description	Code	No. of enclosures to be drilled
Extra cost for drilling service per individual drilled part (A-B-C-D)	FORSR1	4-5-6
Extra cost for drilling service per individual drilled part (A-B-C-D)	FORSR2	7-8-9
Extra cost for drilling service per individual drilled part (A-B-C-D)	FORSR	≥ 10

Standard size enclosures with special drilling
The special drilling service for standard size enclosures in quantities equal to or greater than 4 units with a single code has to be managed with code SRN ... SPEC + overprice FORSR/ FORSR1/FORSSR2 (see table) equal to the number of enclosures and the number of parts to be drilled + hole layout to be attached to the order (see on the next page).
Example: Enclosure (4 pcs) with door to be drilled (1 part)

Example: Enclosure (4 pcs) with door and plate to be drilled (1 parts)

General characteristics and ordering codes - SR2 EMC enclosures

The range of SR2 Enclosures EMC (Electromagnetic Compatibility) version has undergone shielding efficiency tests with success according to the MIL STD 285: 1956 Standard.

This series of products is suitable for making small and medium-sized electric switchboards for automation, operation and control.

The electromagnetic compatibility problem also requires attention when selecting enclosures and cabinets.
The increased number of components in the operation and regulation electronics and the high processing speeds of signals increasingly often leave a possibility of introducing errors which can be attributed to electromagnetic interference.

These interferences may be caused continuously, periodically or at random, from internal or external sources, which generate electric, magnetic or electromagnetic fields.

The suitability tests according to MIL STD 285: 1956 ("Attenuation measurements for enclosures, electromagnetic shielding, for electronic test purposes, method of") have confirmed conformity of the SR2 EMC enclosure with the requirements of the standard.

The attenuation level (measured in dB) remains at high levels for a wide spectrum of frequencies (from 30MHz to 10GHz).

The SR2 EMC galvanized sheet enclosures are painted externally with orange peel RAL 7035 colour.
Furthermore, they do not have cable entry flanges on the roof and on the base.

Technical characteristics		
Conformity with the Standard		IEC 62208
Degree of protection		IP54 (IEC 60529)

Automation boards
General characteristics and applications - SRX enclosures

The AISI 304 stainless steel used allows the cabinets to be installed either indoors or outdoors, by fixing to the floor or a wall. AISI 304 stainless steel enclosures with opaque door, usually intended for making enclosures for automation, are supplied with the galvanised sheet metal internal plate and do not have cable entry flanges.

SRX enclosures always conform to IEC EN 62208 and to IEC 61439-1-2, have a degree of protection IP66 (IEC EN 60529); NEMA 4X and NEMA 3R (UL standard). The degree of protection against external mechanical impacts is IK10 for the version with opaque door and IK09 for the version with glass door (IEC 62262).
AISI 304 stainless steel enclosures with glass door can also be used for distribution configurations. Alternatively, the internal equipment is made by selecting special kits (Distribution Kit) consisting of a pair of functional uprights for assembly of the AISI 304 stainless steel modular panels (to be ordered separately) and any compensation panels. The modular panels, which can also be installed on the enclosures with opaque door using the same KD Kit....X, are all hinged and have vertical modularity of 185 mm.

SRX enclosures can be equipped with: standard plates, clip nuts, spacers, slotted internal plate, accessories for stacking, DIN rails and fixing brackets, shaped sections for accessories on doors, closing systems.

Spray protection roof
Improves protection against infiltration by liquids and accidental sprays. Made of AISI 304 stainless steel.

Distribution kit
All apparatuses and modular circuit breakers can be installed on a DIN rail combined with a modular panel.

Stacking
SRX enclosures can be stacked using the special kit. The plinth with removable flanges is made of 25/10 thick AISI 304 stainless steel.

Closing box
A new Ø19 mm closing box made of chrome-finished plastic with double tongue key.

Ordering codes - SRX enclosures

SRX series enclosures with opaque door (internal plate included)

Enclosures with an opaque door, made of AISI 304 stainless steel, usually intended for producing enclosures for automation, come supplied with the galvanised sheet metal internal plate and do not have cable entry flanges.

SRX series stainless steel enclosures with transparent door

AISI 304 stainless steel enclosures with a glass door can also be used for distribution configurations. The internal equipment is set up using the relevant kits:
- KD...X (Distribution Kit) consisting of a pair of functional uprights for assembly of the modular panels made of AISI 304 stainless steel (to be ordered separately) and of any compensation panels. The modular panels, which can also be installed on the enclosures with opaque door using the KD kit, are all hinged and have vertical modularity of 185 mm.
The enclosures with see-through door are provided without mounting plate.

Screwed modular panels

12/10 mm thick AISI 304 stainless steel modular panels. The screwed modular panels can be fitted on the enclosures using the special kit (KD...) consisting of functional uprights and a compensation panel.
Each modular panel (PM) comes equipped with a DIN rail (depth-adjustable), fixing brackets and the relative small parts. Tmax modular and moulded-case circuit breakers up to T3 can be positioned side by side on the same DIN rail using the special depth adapter AP 6001.
To install MCCBs, fix the DIN rail in the recessed position. The DIN rail fixing brackets allow mounting of the wiring duct up to a maximum size of 60 x 60 mm.

Ordering codes - SRX enclosures

Special Drilling Service
The overprice amount depends on the number of individual drilled parts and not on the number of holes.
For single part it means: A-door B-plate; C-housing; D-top/bottom part.
Please note that the minimum quantity is 10 pieces with a single code. The price of the special drilling service depends on the number of parts to be drilled and on the amount of enclosures to be drilled.

Description	Code	No. of enclosures to be drilled
Extra cost for drilling service per individual drilled part (A-B-C-D)	FORSRX	≥ 10

The special drilling service for standard size enclosures in quantities equal to or greater than 10 units with a single code has to be managed with code SRN ... SPEC + overprice FORSR/ FORSR1/FORSSR2 (see table) equal to the number of enclosures and the number of parts to be drilled + hole layout to be attached to the order.

Example: SRN4320XSPEC 10
FORSRX 10

Example: Enclosure (10 pcs) with door and plate to be drilled (2 parts)
SRN4320XSPEC 10
FORSRX 20
DRAWINGS TO BE ATTACHED

Non-standard enclosure sizes, special drilling
Request feasibility of implementation by completing the relevant Form for special quotations and send it together with the drill layout to the R&D ECS office. Management is per offer.
If the offer is accepted and after having received it, it will be possible to place the order with the codes indicated in the offer.

Painting Special Service
Request feasibility of implementation by completing the relevant Form for special quotations and send it to the R&D ECS office. Management is per offer.
If the offer is accepted and after having received it, it will be possible to place the order with the codes indicated in the offer.

Livorno Series emergency consumer units

Technical details designed to facilitate installation

Three degrees of protection IP40, IP55, IP65 allow to install these emergency consumer units in any environment, residential, tertiary or industrial.

The self-extinguishing thermoplastic frame ensures resistance to abnormal heat and fire

The front door is equipped with a protective glass that can be broken in case of need using the glass-breaking hammer (included)

The flush-mounting, wall-mounting or DIN rail versions offer extensive installation choices

The Livorno Series is a range of emergency consumer units equipped with an emergency breakable glass to quickly and effectively stop systems or services in the case of malfunctions or dangers that may occur in residential, tertiary or industrial installations.

Made of self-extinguishing thermoplastic material, these devices are mainly installed in those environments that have greater risk of fire.
The flush- and wall-mounting versions can be equipped with a luminous button and glass-breaking hammer.

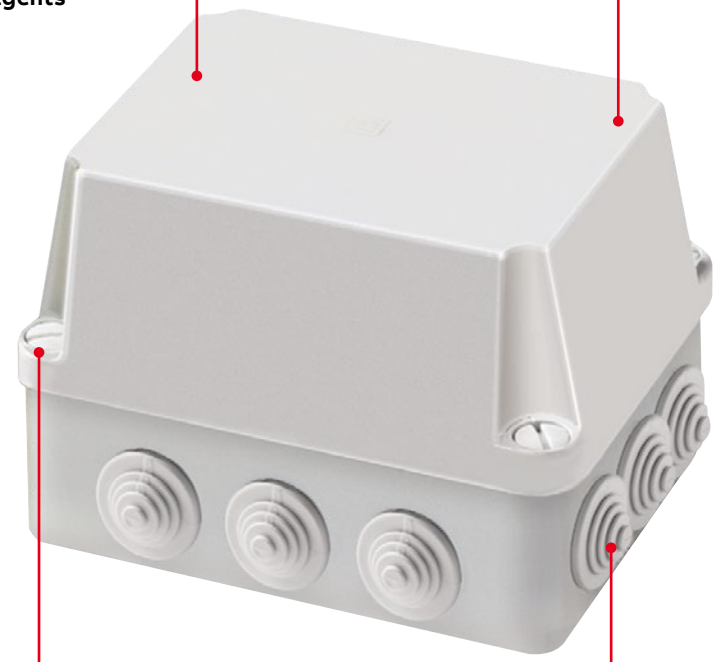
Description	Order details		Pack.
	Type	Order code	pc.
Accessories			
Spare lid for consumer units with emergency button	-	13 190	10/40
Bulb lamp for 12 V luminous button - incandescent	-	13 187	10/120
Bulb lamp for 24 V luminous button - incandescent	-	13 188	10/120
Bulb lamp for 250 V luminous button - fluorescent	-	13 189	10/120
Glass-breaking hammer	-	13 186	10/300
Fixing brackets for IP65 insulated consumer units only	-	12 858	20/240

IP44, IP55 and IP65 Junction boxes

The details make the difference

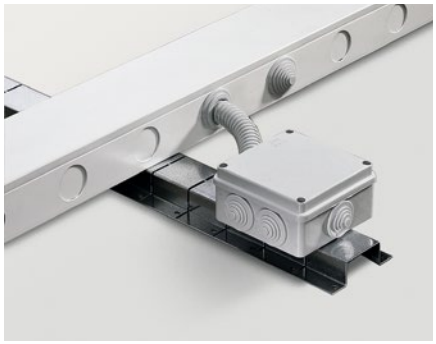


High resistance to heat and chemical and atmospheric agents

Installation temperature from -25 °C to +60 °C

Three lid types available: press-on, with steel screws and with plastic screws with a ¼ turn closing

Boxes with protection degree IP55 and IP65 are composed of a patented lid produced in a single pressing phase together with its seal



A wide range for all needs.
There are IP44 for press-on lid boxes with cable glands, IP55 for screw-on lid boxes with cable glands and IP65 for screw-on lid box with smooth sides.

Some versions of the IP44 and IP55 junction boxes are already equipped with cable glands.

Boxes with protection degree IP55 and IP65 are composed of a patented lid produced in a single pressing phase together with its seal.

Now new: All IP65 junction boxes (with smooth sides) are manufactured in halogen free thermoplastic material.

Wall-mounting is also possible.
All junction boxes measuring 160x135, 220x170 and 310x240 mm can be mounted on the wall with brackets (accessory; code 12858).

All IP44, IP55 and IP65 junction boxes are also available in thermoplastic material, self-extinguishing in compliance with UL 94 V2 Standard and resistant to abnormal heat and fire up to 960 °C GWT.

Enclosures

IP44, IP55 and IP65 Junction boxes

- IP44, IP55 and IP65 Junction boxes for swimming pool control equipment, washing car centers, garages, building services, automatic garden lighting and watering, traffic signs, photovoltaic installations.
- Protection degree: IP44 for press-on lid boxes with cable glands, IP55 for screw-on lid boxes with cable glands, IP65 for screw-on lid box with smooth sides
- Shock resistant: IK07 for IP44 boxes, IK08 for IP55 and IP65 boxes
- IP44 and IP55 boxes with press-on lids in thermoplastic material, self-extinguishing in compliance with UL 94 HB Standard and resistant to abnormal heat and fire up to 650°C (glow wire flammability index) in compliance with IEC 60695-2-11 Standard
- IP65 boxes with screw-on lids in halogen free thermoplastic material, self-extinguishing in compliance with UL 94 HB Standard and resistant to abnormal heat and fire up to 650°C (glow wire flammability index) in compliance with IEC 60695- 2-11 Standard
- Installation temperature from -25°C to +60°C; Resistant to heat: ball thermopressure up to +85°C for IP44, IP55 and IP65 junction boxes
- Boxes with protection degree IP55 and IP65 are composed of a patented lid produced in a single pressing phase together with its seal
- All junction boxes made in compliance with IEC 60670-1 and IEC 60670-22 Standards
- IP44 and IP55 junction boxes in thermoplastic material obtained the IMQ mark of approval
- All the boxes are RoHS compliance

All IP44, IP55 and IP65 junction boxes are also available in thermoplastic material, self-extinguishing in compliance with UL 94 V2 Standard and resistant to abnormal heat and fire up to 960°C (glow wire flammability index) in compliance with IEC 60695-2-11 Standard.

Accessories for IP44, IP55 and IP65 Junction boxes

Technical characteristics of metric cable clamps:
Protection degree IP68
Material: polyamide 6.6, self-extinguishing material according to UL94V2 Standard and resistant to abnormal heat and to fire up to 750°C (glow wire test) according to IEC 60695-2-11 Standard
Operational temperature: from -20°C up to +120°C (short period of time)
Colour: RAL 7035 grey;
Neoprene seal;
Thread pitch: 1.5 mm; Thread angle: 60°
Tightening with a plate crown on the whole diameter of cable (excluded the possibility to damage the cable itself)
Possibility to recover the cable clamp without compromising its efficiency.

Technical characteristics nuts of with metric pitch collar
Material: polyamide 6.6, self-extinguishing material according to UL94 V2 Standard and resistant to abnormal heat and to fire up to 750°C (glow wire test) according to IEC 60695-2-11 Standard

Europa65 junction boxes

Technical details designed to facilitate installation

Bi-material flanges allow easy entry of cables or conduits

Convenient mounting brackets (optional) on the back side allow to fix the box to the wall in a quick and accurate way

Accessories include base plates or DIN rails to better integrate different types of devices

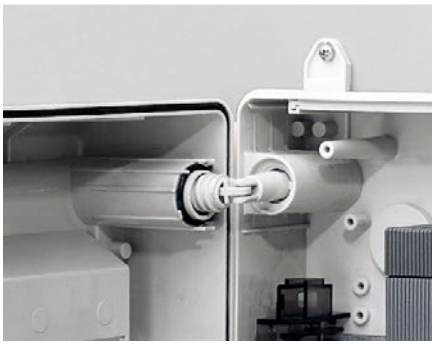
The front cover is provided with captive-type plastic clamping screws to ensure greater ease of use

Europa65 junction boxes

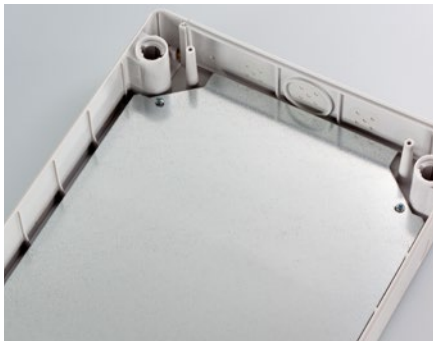
Technical details designed to facilitate installation

Rigid on one side and bi-material flange on the other to facilitate input of conduits and cables. The flanges are removeable and interchangeable.

The Polycarbonate GWT 960 ensure unique mechanical performances (Shock resistance IK10) and ensure high resistance against UV rays.



Perfectly symmetrical consumer units with the possibility of attaching the door hinge onto the front (by means of the special articulated screws supplied) on the right or left with 140° opening.



Different type of devices can be installed in an integrated and rational manner thanks to the many accessories such as base plates or a DIN rail.

The frame that can be fitted onto the consumer unit makes semi-flush mounting possible, guaranteeing an attractive finish.

The consumer unit can be fitted with Neutral (N) or Earth (E) terminals, by combining the copper terminal bars to the corresponding plastic terminal holders.

Europa65 junction boxes

Technical characteristics

- protection degree IP 65
- insulation class II ⧈
- available in RAL 7035 grey
- in polycarbonate material, self-extinguishing and resistant to abnormal heat and fire up to 960 °C (glow wire test) in compliance with IEC 60695-2-11 Standard
- installation temperature from -25 °C to +60 °C
- resistant to heat: ball thermopressure up to +125 °C in compliance with EN 60695-10-2 Standard
- rated insulation voltage: 1000 V AC; 1500 V DC
- shock resistance 20 Joules (IK level 10)
- perfectly symmetrical junction boxes with possibility of attaching the lid hinges, (using the special articulated screws supplied) on the right or left with 140° opening
- boxes code 12 808, 12 812, 12 814, 12 816 and 12 818 fitted with one rigid and one bi-material flange for facilitated input of conduits and cables
- junction boxes produced in compliance with CEI 23-49 (1996) + V1 + V2, CB certificate IEC 60670-24 Standards
- boxes are supplied complete with:
- 4 screw-cover caps to guarantee ⧈
- accessories for attaching the hinges on the front
- 1 certification plate
- instruction sheet
- use 3.5x9.5 self-tapping screws to fix the components on the back

Terminal blocks

The complete terminal blocks are composed of a combination of terminal holders and terminal bars as shown in the description, with the terminal bars already mounted on terminal holders. The complete terminal blocks are standard configurations. For different requirements (customized terminal blocks), the terminal holders and the terminal bars must be purchased separately in the versions given in the table.

Composed of 12543x2 + 12535x2	12818	12497	10/40

Terminal holder

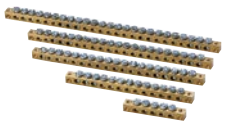
The construction of the terminal block is completed by combining the terminal holders with the necessary terminal bars, taking care to separate the latter from one another.

Terminal holder

Description	For boxes [type]	Order code	Packaging
Terminal holder	12 804	12538	12/360
Terminal holder	12 808	12539	12/360
Terminal holder	12 812 - 12 814 12 816	12540	12/144
Terminal holder	12 818	12543	12/108

Terminal bars

The terminal bars can be installed on any type of terminal holder; they can be hooked by means of 2 snap-on clips through two additional holes at the ends of the bar itself.



Terminal bars

Description No. of holes x Ø holes [mm] + No. of holes x Ø holes [mm]	Order code	Packaging
5x4,5	12531	20/240
10x4,5 + 3x5,6	12532	20/240
16x4,5 + 3x5,6	12533	20/240
15x4,5 + 6x5,6	12534	20/240
19x4,5 + 6x5,6	12535	20/240

ABB EVLunic 21/2

Electric vehicles charging
ABB EVLunic

EVLunic: Powerful AC chargers for residential and commercial applications
ABB EVLunic can charge electric vehicles and plug-in hybrids alike. With many different versions and variants there is a right model for every need.

Options	
Type 2 socket	For cars that have a type 2 connection. Mainly used when different cars will use the charger, or in locations where the driver is not the owner of the charger. The drivers will have to supply their own charge cable.
Type 2 socket with shutters	Same as above, mainly used in France.
Type 2 cable	Mainly used when the owner of the charger is also the driver. Or where the owner of the charger wants to offer the visitors the luxury of not having to supply their own charge cable. Cables are available in 4m and 6m length.
Type 1 cable	Used for cars that have a type 1 connection.
1 phase	The charger can only be connected with one phase.
3 phase	The charger can be connected with either 1 or 3 phases.
10A, 13A, 20A, 25A, 32A	The charger can be set (with a jumper setting) to this maximum current.
Energy meter	The charger has an energy meter to measure voltage, current, power and energy. It can be used to create an overview how much energy was delivered, and to do local load management. This includes a display.
MID	The energy meter is calibrated and certified to be MID compliant. This is necessary in the EU if payment is based on the delivered energy. E.g., if the energy is sold, or when the energy costs can be reimbursed at the lease company.
Enable input	An external device (like a knob) can be used to enable/disable the charger
Switch contact output	An external device can be connected to display charging status.
USB	All chargers have this feature, it is used for software upgrades.
Ethernet (RJ45)	All chargers have this feature, it is used for software upgrades and debugging.
Ethernet LSA+	Connection to a smart home server or to another EVLunic.
Load management + OCPP (slave)	Can be used for load management when connected to a load management master. Can be connected to a back office through OCPP, if connected to a master.
Load management + OCPP (master)	Can be used for load management and to OCPP; up to 15 slaves can be connected to one master.
UMTS/3G	The charger has a SIM card slot for wireless connection
RFID	The charger has authentication through an RFID card
Key	The charger has authentication through a key lock. This can be used to authenticate with the house key (if the charger has the same cylinder)

Safety
EVLunic includes an integrated onboard DC leakage detector, which eliminates the need for an expensive upstream RCD type B. Separate compartments for electronics and grid connection make installation easy. It also makes jumper selection and accessing the USB, Ethernet and SIM card possible without risk of touching the power circuits.

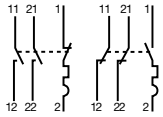
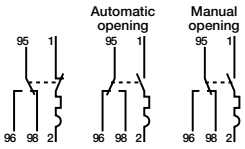
S2C-H6-02R	SN201-S	SN201-IH
		




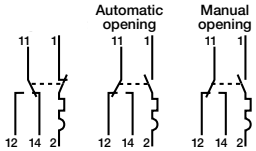


ABB has a full product range of auxiliary contacts completed by the S2C-S/H6R universal contacts. An auxiliary contact indicates the position of the MCB. A signal contact indicates the MCB position plus the fault event, i.e., overload or short-circuit.

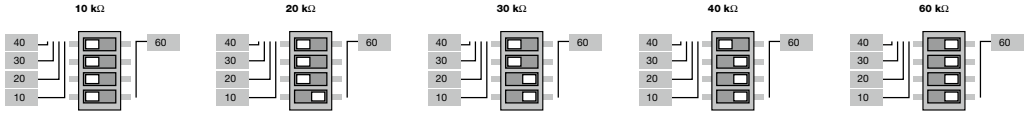
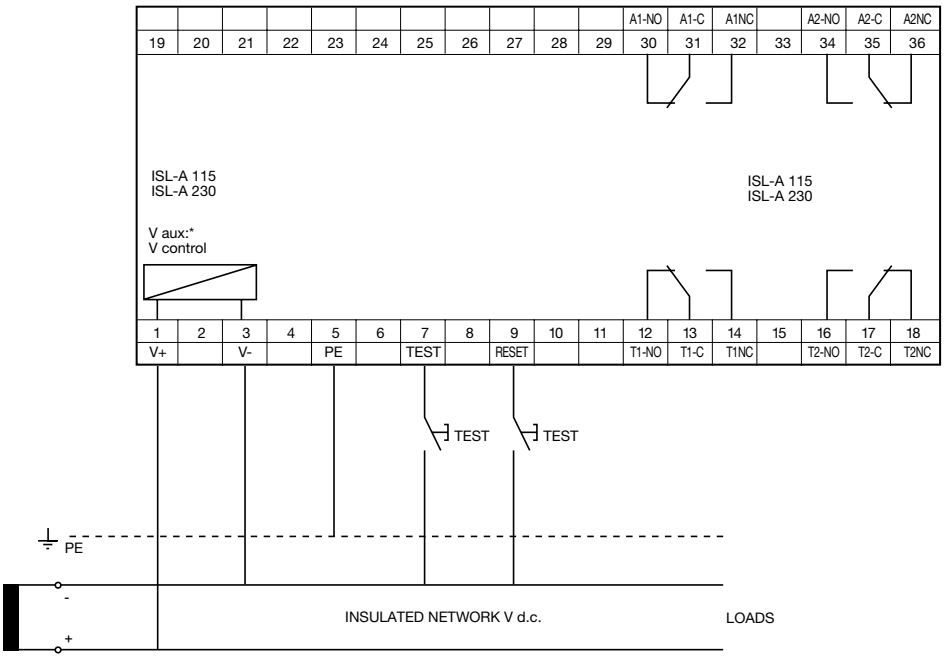
MICROSWITCH SETTINGS

The front microswitches allow the insulation threshold level to be adjusted between 10 and 60 kW, as shown below:



ISL-A 115 and ISL-A 230



MICROSWITCH SETTINGS

The front microswitches are used for adjusting the insulation threshold level, enabling the fail-safe function and configuring the reset mode for both the alarm and trip thresholds.

Microswitches A, B, C, D for programming the trip and alarm thresholds:

ALARM		TRIP	
300 kΩ:	A=0, B=0, C=0, D=0	100 kΩ:	A=0, B=0, C=0, D=0
150 kΩ:	A=1, B=0, C=0, D=0	60 kΩ:	A=1, B=0, C=0, D=0
80 kΩ:	A=1, B=1, C=0, D=0	40 kΩ:	A=1, B=1, C=0, D=0
50 kΩ:	A=1, B=1, C=1, D=0	20 kΩ:	A=1, B=1, C=1, D=0
30 kΩ:	A=1, B=1, C=1, D=1	10 kΩ:	A=1, B=1, C=1, D=1

Microswitch E for configuring the FAIL SAFE mode

E=0 fail safe mode disabled

E=1 fail safe mode enabled

Microswitch F for configuring the RESET mode

F=0 manual reset

F=1 automatic reset

MCBs and RCDs worldwide marks and approvals

This is the present situation regarding worldwide marks and approvals for ABB System pro M compact range devices.
Although some products already obtained some approvals or certificates, they don't necessarily bear the related marks on the product.

The F 200 range has obtained the EPD (Environmental Product Declaration), according to ISO 14040.

EPD®
This product/service has a
CERTIFIED ENVIRONMENTAL PRODUCT DECLARATION
describing information about environmental performance, contents and recycling which has been controlled and verified by Rina according to MSR 1999:2
Registration number: S-P 00080 and S-P 00081
