

# Lexium™ Integrated Drives

## Motion control

Accessories for ILA, ILE and ILS  
Integrated Drives

Power cordsets VW3L30001R●●

Connector for Safe Torque Off signals VW3L50010

Set of connectors for I/O signals VW3L50200

Set of connectors for EtherCAT bus VW3L5E000

Connector for DeviceNet bus VW3L5D000

### Accessories for integrated drives with industrial connectors (continued)

| Description                                                                                                                              | Length<br>m | Reference     | Weight<br>kg |
|------------------------------------------------------------------------------------------------------------------------------------------|-------------|---------------|--------------|
| <b>Power cordsets</b>                                                                                                                    |             |               |              |
| <b>Pre-assembled</b> cordsets with:<br>Integrated drive end: 1 connector for power supply<br>Other end: flying leads<br>DESINA compliant | 3           | VW3L30001R30  | —            |
|                                                                                                                                          | 5           | VW3L30001R50  | —            |
|                                                                                                                                          | 10          | VW3L30001R100 | —            |
|                                                                                                                                          | 15          | VW3L30001R150 | —            |
|                                                                                                                                          | 20          | VW3L30001R200 | —            |

### Connector for Safe Torque Off signals

|                                                                                          |           |   |
|------------------------------------------------------------------------------------------|-----------|---|
| <b>Connector</b> , M8 round (4-way)<br>for creating cordsets for Safe Torque Off signals | VW3L50010 | — |
|------------------------------------------------------------------------------------------|-----------|---|

### Set of 2 connectors for I/O signals

|                                                              |           |   |
|--------------------------------------------------------------|-----------|---|
| <b>Set</b> consisting of:<br>Two M8 round connectors (3-way) | VW3L50200 | — |
|--------------------------------------------------------------|-----------|---|

### Set of 3 connectors for I/O signals

|                                                                |           |   |
|----------------------------------------------------------------|-----------|---|
| <b>Set</b> consisting of:<br>Three M8 round connectors (3-way) | VW3L50300 | — |
|----------------------------------------------------------------|-----------|---|

### Set of CANopen/RS 485 connectors for IL●1 Integrated Drives

|                                                                                                                                          |           |   |
|------------------------------------------------------------------------------------------------------------------------------------------|-----------|---|
| <b>Set</b> consisting of:<br>One M12 round male connector (A-coded)<br>One M12 round female connector (A-coded)<br>One M12 blanking plug | VW3L5F000 | — |
|------------------------------------------------------------------------------------------------------------------------------------------|-----------|---|

### Set of PROFIBUS DP connectors for IL●1 Integrated Drives

|                                                                                                                                          |           |   |
|------------------------------------------------------------------------------------------------------------------------------------------|-----------|---|
| <b>Set</b> consisting of:<br>One M12 round male connector (B-coded)<br>One M12 round female connector (B-coded)<br>One M12 blanking plug | VW3L5B000 | — |
|------------------------------------------------------------------------------------------------------------------------------------------|-----------|---|

### Set of EtherCAT connectors

|                                                                                                        |           |   |
|--------------------------------------------------------------------------------------------------------|-----------|---|
| <b>Set</b> consisting of:<br>Two M12 round male connectors (4-way), (D-coded)<br>One M12 blanking plug | VW3L5E000 | — |
|--------------------------------------------------------------------------------------------------------|-----------|---|

### Set of EtherNet/IP connectors

|                                                                                                        |           |   |
|--------------------------------------------------------------------------------------------------------|-----------|---|
| <b>Set</b> consisting of:<br>Two M12 round male connectors (4-way), (D-coded)<br>One M12 blanking plug | VW3L5K000 | — |
|--------------------------------------------------------------------------------------------------------|-----------|---|

### Set of Ethernet POWERLINK connectors

|                                                                                                        |           |   |
|--------------------------------------------------------------------------------------------------------|-----------|---|
| <b>Set</b> consisting of:<br>Two M12 round male connectors (4-way), (D-coded)<br>One M12 blanking plug | VW3L5P000 | — |
|--------------------------------------------------------------------------------------------------------|-----------|---|

### DeviceNet connector

|                                                            |           |   |
|------------------------------------------------------------|-----------|---|
| <b>Female connector</b> , M12 DeviceNet (5-way), (A-coded) | VW3L5D000 | — |
|------------------------------------------------------------|-----------|---|

### Modbus TCP connector

|                                                             |           |   |
|-------------------------------------------------------------|-----------|---|
| <b>Female connector</b> , M12 Modbus TCP (4-way), (D-coded) | VW3L5T000 | — |
|-------------------------------------------------------------|-----------|---|
