

# Product datasheet

Specifications

Variable speed drive, Altivar HVAC  
ATH200, ATH230, 1.5kW, 2hp, 200  
to 240V, 3 phase, IP20

ATH230U15M3

## Main

|                                                |                                                                   |
|------------------------------------------------|-------------------------------------------------------------------|
| Range of product                               | Altivar HVAC ATH200                                               |
| Product specific application                   | HVAC                                                              |
| Product or component type                      | Variable speed drive                                              |
| Variant                                        | Standard version                                                  |
| Device short name                              | ATH230                                                            |
| Product destination                            | Asynchronous motors<br>Synchronous motors                         |
| Mounting mode                                  | Cabinet mount                                                     |
| IP degree of protection                        | IP20                                                              |
| Network number of phases                       | 3 phases                                                          |
| [Us] rated supply voltage                      | 200...240 V - 15...10 %                                           |
| Relative symmetric mains voltage tolerance     | 10 %                                                              |
| Supply frequency                               | 50...60 Hz - 5...5 %                                              |
| Relative symmetric network frequency tolerance | 5 %                                                               |
| nominal output current                         | 8.0 A                                                             |
| Maximum transient current                      | 8.8 A                                                             |
| Motor power kW                                 | 1.5 kW                                                            |
| Motor power hp                                 | 2.0 hp                                                            |
| Safety function                                | STO (safe torque off)                                             |
| Safety level                                   | SIL 3 conforming to IEC 61508<br>PL = e conforming to ISO 13849-1 |
| EMC filter                                     | Without EMC filter                                                |
| Communication port protocol                    | Modbus serial<br>BACnet MS/TP                                     |
| Option card                                    | Communication module for BACnet IP                                |

## Complementary

|                        |                                                                                                                                                            |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Apparent power         | 3.9 kVA at 240 V                                                                                                                                           |
| Power dissipation in W | 72 W                                                                                                                                                       |
| Discrete input number  | 7                                                                                                                                                          |
| Discrete input type    | STO safe torque off, 24 V DC, impedance: 1.5 kOhm<br>DI1...DI6 logic inputs, 24 V DC (30 V)<br>DI5 programmable as pulse input: 0...30 kHz, 24 V DC (30 V) |

|------------------------------|----------|
| Unit Type of Package 1       | PCE      |
| Number of Units in Package 1 | 1        |
| Package 1 Height             | 18 cm    |
| Package 1 Width              | 18.5 cm  |
| Package 1 Length             | 18.4 cm  |
| Package 1 Weight             | 1.578 kg |
| Unit Type of Package 2       | S06      |
| Number of Units in Package 2 | 30       |
| Package 2 Height             | 75 cm    |
| Package 2 Width              | 60 cm    |
| Package 2 Length             | 80 cm    |
| Package 2 Weight             | 60.34 kg |

## Environmental Data

Schneider Electric aims to achieve Net Zero status by 2050 through supply chain partnerships, lower impact materials, and circularity via our ongoing “Use Better, Use Longer, Use Again” campaign to extend product lifetimes and recyclability.

Mounting and Clearance

Clearances and Mounting Position

Mounting Type A: Individual with Ventilation Cover

Mounting Type B: Side by Side, Ventilation Cover Removed

Mounting Type C: Individual, Ventilation Cover Removed

Connections and Schema

Control Block Wiring Diagram

- (1) : Analog output
- (2) : Analog inputs
- (3) : Potentiometer SZ1RV1202 (2.2 kΩ) or similar (10 kΩ maximum)
- (4) : Digital Inputs

Single or Three-phase Power Supply - Diagram With Line Contactor

- (1) : Line choke (if used)
- (2) : Use relay output R1 set to operating state Fault to switch Off the product once an error is detected

Single or Three-phase Power Supply - Diagram With Downstream Contactor

- (1) : Line choke (if used)
- (2) : Use relay output R1 set to operating state Fault to switch Off the product once an error is detected

Sensor Connection

It is possible to connect either 1 sensor on terminals AI2 or AI3 or DI6.
