

Product Environmental Profile

Industrial and Residential Circuit Breaker Enclosures

General information

Representative product	Industrial and Residential Circuit Breaker Enclosures - L600AWK
Description of the product	The main purpose of circuit breaker enclosure is to provide the appropriate level of environment protection for the circuit breaker that is installed inside. Once a circuit breaker is installed the main purpose is to isolate power and provide an effective way to interrupt power in an emergency. Two primary applications for circuit breaker enclosure are as a lockout on sight disconnect and as a circuit isolation device.
Functional unit	Protect persons during 20 years against direct contact with live parts and allow grouping monitoring, control and protection devices in a single enclosure or a cabinet having the following dimensions 1445 mm x 491 mm x 208mm, while protecting against mechanical impacts and the penetration of solid objects and liquids (The NEMA Environmental rating is 12, which also includes 1, 3, 3R, and 5).

Constituent materials

Reference product mass	49890 g including the product, its packaging and additional elements and accessories
------------------------	--

Plastics	0.5%
Metals	94.9%
Others	4.6%

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

As the products of the range are designed in accordance with the RoHS Directive (European Directive 2002/95/EC of 27 January 2003), they can be incorporated without any restriction in an assembly or an installation subject to this Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

The Industrial and Residential Circuit Breaker Enclosures presents the following relevant environmental aspects

Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 2219.2 g, consisting of cardboard (99%), paper (1%)
Installation	Refl600AWK does not require any installation operations
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials No special end-of-life treatment required. According to countries' practices this product can enter the usual end-of-life treatment process. Recyclability potential: 93% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	20 years			
Product category	Unequipped enclosures and cabinets			
Installation elements	No special components needed			
Use scenario	Non applicable for unequipped enclosures and cabinets			
Geographical representativeness	US			
Technological representativeness	The main purpose of circuit breaker enclosure is to provide the appropriate level of environment protection for the circuit breaker that is installed inside. Once a circuit breaker is installed the main purpose is to isolate power and provide an effective way to interrupt power in an emergency. Two primary applications for circuit breaker enclosure are as a lockout on sight disconnect and as a circuit isolation device.			
Energy model used	Manufacturing	Installation	Use	End of life
	Energy model used: Mexico (Tlaxcala plant)	US	Not applicable	US

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.8.1, database version 2016-11 in compliance with ISO14044.

The manufacturing phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number :	SCHN-00448-V01.01-EN	Drafting rules	PCR-ed3-EN-2015 04 02
Verifier accreditation N°	VH33	Supplemented by	PSR-0005-ed2-EN-2016 03 29
Date of issue	03/2019	Information and reference documents	www.pep-ecopassport.org
		Validity period	5 years
Independent verification of the declaration and data, in compliance with ISO 14025 : 2010			
Internal	External X		
The PCR review was conducted by a panel of experts chaired by Philippe Osset (SOLINNEN)			
PEP are compliant with XP C08-100-1 :2014			
The elements of the present PEP cannot be compared with elements from another program.			
Document in compliance with ISO 14025 : 2010 « Environmental labels and declarations. Type III environmental declarations »
